intro- duc- tion

It is our pleasure to present this year's INCLIVA Annual Scientific Report, an appraisal of the scientific activity carried out in 2021 by research groups at the *Hospital Clínico Universitario de Valencia* and its Department of Health, as well as the groups of scientific excellence at the Faculty of Medicine and Dentistry of the University of Valencia and the INCLIVA-affiliated IGENOMIX Foundation. The following pages show the result of the joint effort of our professionals, which have consolidated INCLIVA as among the foremost health research institutes in Spain in 2021, with great international prestige and exceptional scientific output. The main milestones reached this year are summarized below.

First and foremost, INCLIVA has obtained a five-year renewed accreditation from the Carlos III Health Institute (ISCI) as a health research institute after meeting the biomedical health research institute accreditation requirements and evaluation criteria set out in articles 4 and 11, respectively, of Royal Decree 279/2016, June 24. The members of the Evaluation Committee considered that INCLIVA "demonstrates consolidated governance processes and sustained progress in scientific activity and translation indicators". The board members concur that INCLIVA "is a clinical and translational research centre with a solid track record, on good course to adapt to the requirements of the new accreditation guide, especially in the areas of impact, transfer and citizen participation" and highlight "the work being carried out promoting leadership transition via incorporation of young researchers".

As a second notable milestone, INCLIVA Board of Trustees has approved the renewal of the *Conselleria de Sanidad Universal y Salud Pública* (Universal Healthcare and Public Health) agreement for research management at the Clinical Hospital and Department of Health. The first collaboration framework agreement between INCLIVA and the Ministry of Health establishing the rules of collaboration between the entities to support, promote, manage and facilitate research activity at the Clinical Hospital Department of Health was formalized in November 2000. New agreements have subsequently been signed, the latest in 2013 which was extended in 2017 until 2021. In light of the success of this collaboration, both entities have signed a new framework agreement.

Throughout its history, INCLIVA has been committed to quality of life in people with rare diseases; indeed, we are the first Health Research Institute in Spain to create a rare diseases research area, and have promoted the creation of the Alliance for Translational Research in Rare Diseases, an initiative awarded by the Spanish Federation of Rare Diseases (FEDER). This firm commitment to rare diseases research has led to the incorporation of FEDER to the INCLIVA Board of Trustees to intensify its line of transversal research into these pathologies. This addition also strengthens INCLIVA's competitive advantage in terms of links with civil society and patients, due to the translational nature of our research.

Regarding scientific output, our research staff published 834 articles in 2021, with a cumulative impact factor of over 6,000 points. The quality of our scientific output should also be highlighted: around 80% of published articles are in the first and second quartiles, 20% in the first decile and 21% with an impact factor higher than 7. In addition, 46% of scientific output has involved international collaboration. A total of 65 doctoral theses were defended in 2021, 12 of them with European mention.

1 introduction

INCLIVA continues to consolidate its reputation for high quality, competitive projects, confirming the upward trajectory of recent years by obtaining nearly five million euros in funding for 20 new national and regional projects.

Our researchers have also achieved great success in European Commission competitive calls for proposals, obtaining nearly 6.4 million euros in accumulated funds for projects in the areas of oncology, women's health, microbiology, big data and artificial intelligence, personalized medicine, aging and fragility. In other standout activity, we have participated in international networks such as the Big Data Value Association [BDVA/DAIRO], the European infrastructure for translational medicine [EATRIS], the European high-capacity screening network [EU-OPENSCREEN] and Worldwide innovative networking [WIN] in personalized cancer medicine.

Turning to calls for staff funded by the Carlos III Health Institute, in total, Incliva staff were awarded two *Joan Rodés* grants, two *Río Hortega* grants, a new *Miguel Servet* grant, the confirmation of a *Miguel Servet* type II grants, and two predoctoral grants in health research. In addition, two national predoctoral grants were obtained [Ministry of Science, Innovation and Universities and Ministry of Universities]. Likewise, ten grants were awarded from the Department of Innovation, Universities, Science and Digital Society of the Autonomous Public Health Department, and two grants from the Valencian Innovation Agency.

Another key achievement in 2021 has been formal recognition of a new emerging group working within the priority research lines of cardiovascular, metabolism and organ damage and reproductive medicine.

Regarding clinical trials, our Drug Research Ethics Committee [CEIm] at the *Hospital Clínico Universitario de Valencia*, the first to receive this certification in the Valencian Community and among the first at a national level, has been a reference committee in 70 of 84 studies since the new legislation was approved in 2016, and throughout 2021 it has started 206 of 269 new clinical studies, and is involved in 579 of a total of 596 active studies this year.

In December 2021, the INCLIVA Innovation Unit [UAI] obtained renewed certification to the UNE166002 standard. Another of the Unit's successes this year has been two newly licensed patents: "Maxillo-mandibular prosthesis and manufacturing method" [number ES2525506] in July, and "Mass spectrometry-based methods for the detection of circulating histones H3 and H2B in plasma from sepsis or septic shock (ss) patients" [number EP16382509] in September. In addition, the *Agència Valenciana de la Innovació* has approved two innovation agents for the INCLIVA Innovation Unit.

Finally, the institute's quality and excellence strategy this year has resulted in an important milestone for the Quality and Data Protection Unit, which obtained the certificate of compliance with the ISO:9001:2015 quality standard for technical and scientific research support services [bioinformatics, biostatistics and high-efficiency liquid chromatography].

origin & struc- ture

INCLIVA SCIENTIFIC REPORT 2021

INCLIVA origin and structure

2.1. History

The *Hospital Clínico Universitario de Valencia* Research Foundation was constituted in the year 2000 as the first Valencian research foundation affiliated to a public hospital. Ten years later, various centers of excellence in biomedical research from the University of Valencia and IGENOMIX joined the Foundation through the establishment of specific agreements, and thus INCLIVA Health Research Institute was created.

INCLIVA's main aims are to manage the biomedical research carried out by the *Hospital Clínico Universitario de Valencia* and its Health Department, and to encourage teaching and scientific activities, thus improving patient treatment and knowledge sharing.

In 2011 INCLIVA was accredited as a Health Research Institute by the Ministry of Science and Innovation thus obtaining preferential treatment from the Carlos III Health Institute, in recognition of its excellence in research.

During 2021 INCLIVA received the official notification of renewal of its accreditation as Health Research Institute for the next five years.

INCLIVA origin and structure

2.2. Organizational structure

2.2.1. Government structure

The highest government body in the Foundation, the Board of Trustees is headed by the Regional Minister for Health of the Valencian Government. This body appoints a Board of Governors – headed by the Chief Executive Officer of the Health Department – the General Director, the Scientific Director and the Financial Director. These are guided by two Research Committees: the External Scientific Committee and the Internal Scientific Committee.

2.2.1.1 Board of Trustees

President, Ms. Ana Barceló Chico, Regional Minister for Health of the Valencian Government

Vice-president, Mr. Álvaro Bonet, Chief Executive Officer of the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department

Board members

- Mrs. María Vicenta Mestre, Distinguished Dean of the University of Valencia
- Mrs. Concha Andrés Sanchis, Autonomous Secretary of Efficiency and Health Technology of the *Conselleria de Sanidad Universal y Salud Pública* (Autonomous Public Health Department) of the Valencian Government
- Mr. Javier Burgos Muñoz, General Director of Research and High Sanitary Inspection of the *Conselleria de Sanidad Universal y Salud Pública* (Autonomous Public Health Department) of the Valencian Government
- Mrs. Emilia Adán García. President of the Social Council of the University of Valencia
- Mr. Carlos Simón, Scientific Director of the IGENOMIX Foundation
- Mr. Francisco Javier Chorro, Distinguished Dean of the Faculty of Medicine of the University of Valencia

- Mr. José Bernardo Noblejas Pérez, Valencia Chamber of Commerce

- Mrs. María Ángela Nieto Toledano, *Instituto de Neurociencias de Alicante CSIC*

- Mr. Rafael Alcón Traver, President of Bancaja Foundation

- Mr. Joaquín Santo, Valencian Council of Culture

- Mr. Juan López-Trigo Pichó, Cañada Blanch Foundation

- Mr. Andrés Cervantes Ruipérez, INCLIVA General Director

- Mr. Rubén Ventura, Fero Foundation

- Mrs. Bárbara Congost Mirón, FEDER representative, *Federación Española de Enfermedades Raras*

Board members under own name

- Mr. Carlos Pascual
- Mr. Joaquín Ortega Serrano
- Mrs. Ana Lluch Hernández
- Mr. Tomás Trénor Puig
- Mr. Manuel Delgado Rodríguez, Board of Trustees Secretary

2.2.1.2 Board of Governors

- Mr. Álvaro Bonet Pla, Chief Executive Officer of the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department
- Mr. Francisco Javier Chorro, Distinguished Dean of the Faculty of Medicine of University of Valencia

- Mr. Andrés Cervantes Ruipérez, INCLIVA General Director

- Mr. Vicente de Juan Martín, Financial-Administrative Director

- Mrs. Ana Sanmartín Almenar, Primary Care Director of the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department

INCLIVA origin and structure

- Mr. Jorge Navarro Pérez, Medical Director of the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department
- Mr. Javier Burgos Muñoz, General Director of Research and High Sanitary Inspection of the *Conselleria de Sanidad Universal y Salud Pública* (Autonomous Public Health Department) of the Valencian Government
- Mr. Pascual Medina Besó, Coordinator of Central Medical Research Unit of the Faculty of Medicine of University of Valencia
- Mr. Manuel Alós, Head of the Pharmacy Service of *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department
- Mrs. Marina Soro, President of Ethic Committee for Investigation with medicinal products
- Mr. Federico Pallardó, Professor of the Department of Physiology of the University of Valencia
- Mr. Carlos Simón, IGENOMIX Foundation
- Mrs. Maite Sáenz, Secretary General

2.2.1.3 General and Scientific Director

Professor Andrés Cervantes Ruipérez is Full Professor of Medicine at the University of Valencia, Head of the Oncology Service of the *Hospital Clínico Universitario of Valencia* and Director of the Cancer Area at the INCLIVA Health Research Institute.

His training as a resident medical intern took place at the *Hospital Clínico Universitario of Valencia*. After completing this residency, he obtained a predoctoral fellowship at the Free University Hospital in Amsterdam, where he obtained his Doctorate in the laboratory of cellular pharmacology, with work on multidrug resistance.

His areas of interest and research are gastrointestinal and gynecological cancer, as well as phase I trials and new drugs development.

As a clinical researcher in rectal cancer, he has published several papers on the quality of multidisciplinary work as well as on evaluating the quality of mesorectal surgery, how to optimize initial therapy choices and especially, how to treat cancer of the upper third of the rectum.

He is the President of the European Society of Medical Oncology (ESMO) since July 2019.

2.2.1.4 External Scientific Committee

- Mr. Javier Díez. Professor of Medicine, University of Navarra. Director of the Cardiovascular Sciences Area, Center for Applied Medical Research (CIMA). University of Navarra
- Mr. Antonio Vidal-Puig. Professor of Molecular Nutrition and Metabolism, University of Cambridge. Honorary consultant in metabolic medicine. Metabolic research laboratories. Addenbrooke's Hospital, Cambridge, United Kingdom
- Mr. Josep Tabernero. Head of the Medical Oncology Service. Vall d'Hebrón Hospital.
- Mr. Juan Carlos Lacal Sanjuán. Research Professor at the CSIC. Institute of Biomedical Research, Madrid
- Mr. Manuel Tena Sempere. Professor of University. Department of Cell Biology, Physiology and Immunology. University of Cordoba
- Mr. M Roser Torra Balcells. Nephrologist, Fundació Puigvert. Research line in the study of Hereditary Kidney Diseases
- Mrs. Laura Saucék. Group leader at VHIO (Oncology Institute of the Vall d'Hebron Hospital). Head of Modeling of Antitumor Therapies in mice. Founder executive director (CEO) at Peptomyces SL

INCLIVA origin and structure

2.2.1.5 Internal Scientific Committee

- Mr. Andrés Cervantes Ruipérez, INCLIVA General Director
- Mrs. Ana Sanmartín Almenar, Primary Care Director of the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department
- Mr. Jorge Navarro Pérez, Medical Director of *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department
- Mr. Julio Núñez, Associate Professor of the Department of Medicine of the University of Valencia, attached to the Scientific Direction
- Mr. Vicente Bodí, Full Professor of the Department of Medicine of the University of Valencia
- Mr. Josep Redón, INCLIVA Emeritus Researcher
- Mr. Federico Pallardó, Full Professor of the Department of Physiology of the University of Valencia
- Mrs. María Jesús Sanz Ferrando, Full Professor of the Department of Pharmacology at the University of Valencia
- Mrs. Ana Lluch Hernández, Emeritus Professor of the Department of Medicine of the University of Valencia
- Mrs. María del Mar Tormo García, Oncologist at the *Hospital Clínico Universitario of Valencia* and of the Valencia Clínico – Malvarrosa Health Department Hematology Service
- Mr. Felipe Vilella Mitjana, researcher at INCLIVA
- Mrs. Isabel Gabaldón Sánchez, Valencia Clínico - Malvarrosa Health Department
- Mr. David Moro Valdezate, General Surgery Associate Physician
- Mrs. María del Mar Tormo Díaz, Hematology and Hemotherapy Associated Physician
- Mrs. Laura Piqueras Ruiz, researcher at INCLIVA
- Mrs. Patricia Roselló, Pediatrics Associated Physician
- Mr. Sergio Martínez Hervás, Endocrinology and Nutrition Associated Physician
- Mrs. Herminia González Navarro, researcher at INCLIVA
- Mrs. Pilar Eroles Asensio, researcher at INCLIVA
- Mrs. M^a Cruz González Villaescusa, Neumology Associate Physician
- Mrs. Carmina Montoliu Félix, researcher at INCLIVA
- Mr. José Real Collado, Head of the Endocrinology and Nutrition Service
- Mr. Raúl Gómez Gallego, researcher at INCLIVA
- Mr. F. Javier Chaves Martínez, researcher at INCLIVA
- Mr. Daniel Monleón Salvadó, researcher at INCLIVA
- Mrs. Desamparados Roda Pérez, Oncology Associate Physician
- Mr. Carlos Tornero Tornero, Head of the Anesthesia/ Reanimation Service
- Mrs. Nuria Cabedo Escrig, researcher at INCLIVA
- Mrs. Pilar Rentero Garrido, coordinator of Precision Medicine Unit
- Mrs. Ana Belén Paes, researcher at INCLIVA
- Mr. José Luis Górriz Teruel, Head of the Nephrology Service
- Mr. Antonio Martínez Sabater, general supervisor at the *Hospital Clínico Universitario de Valencia*
- Mr. César Ríos Navarro, researcher at INCLIVA
- Mrs. Lorena Peiró Chova, researcher at Biobank

RESEARCH COMMISSION

President: Mr. Luis Sabater Ortí, Section Head of the General Surgery

Vicepresident: Mr. Julio Núñez Villota, Cardiology Associate Physician

Vocals:

- Mrs. Marta Peiró Signes, Scientific Subdirector at INCLIVA
- Mr. Jaime Signes-Costa, Neumology Service Head
- Mrs. Rosa Zaragozá Colom, researcher at INCLIVA
- Mr. Vicente José Bodí Peris, Professor of the Department of Medicine of the University of Valencia
- Mrs. M^a José Terol Castera, Hematology and Hemotherapy Associated Physician
- Mrs. Gema Miñana Escrivá, Cardiology Associate Physician

Commission Management Unit: Mrs. Sofía Galant

INCLIVA origin and structure

INNOVATION COMMISSION

President: Andrés Cervantes Ruipérez, INCLIVA General Director

Commission Management: Mrs. Marta del Olmo Zurriaga, Head of UAI

- Mr. Vicente de Juan Martín, Financial-Administrative Director
- Mr. Jorge Navarro Pérez, Medical Director of Hospital Clínico Universitario de Valencia and of the Valencia Clínico – Malvarrosa Health Department
- Mrs. Marta Peiró Signes, Scientific Subdirector at INCLIVA
- Mrs. Maite Sáenz González, Secretary General at INCLIVA
- Mr. Josep Redón, INCLIVA Emeritus Researcher
- Mr. Enrique Rodríguez Borja, Clinical researcher with experience in the field of innovation
- Mr. Miguel Puche Torres, Clinical researcher with experience in the field of innovation
- Mr. Federico Pallardó Calatayud, Basic researcher with experience in the field of innovation
- Mr. Rubén Artero Allepuz, Basic researcher with experience in the field of innovation
- Mrs. Consuelo Borrás Blasco, Basic researcher with experience in the field of innovation
- Mr. Felip Vilella Mitjana, Basic researcher with experience in the field of innovation
- Mrs. Carolina Mir Sánchez, Clinical researcher with experience in the field of innovation
- Mrs. Maite Sánchez, Clinical researcher with experience in the field of innovation

2.2.1.6. Ethics Committee for Investigation with Medicinal Products

President: Mrs. Marina Soro Domingo, Head of Section of the Anesthesiology and Reanimation Unit

Vice-president: Mr. Esteban Morcillo Sánchez, Clinical pharmacist

Technical Secretary: Mr. Julio Palmero Da Cruz, Head of Radio-diagnosis Service

Members:

- Mr. Manuel Alós Almiñana, Head of the Pharmacy Department
- Mr. Diego V. Cano Blanquer, Hospital Pharmacist
- Mr. José Luis Trillo Mata, Primary Care Pharmacist
- Mrs. Mª José Tarín Blasco, Law Degree
- Mr. David Juan López Ortega, Law Degree
- Mrs. Carmen Celda Ortega, Nurse
- Mr. Luis González Luján, Primary Attention doctor
- Mr. Joaquín Ortega Serrano, Head of the General Surgery Service
- Mrs. Patricia Roselló Millet, Specialist of the Pediatrics Department
- Mr. Ricardo Ruiz Granell, Head of Section of Cardiostimulation of Cardiology Department

- Mrs. Mª Jesús Puchades Montesa, Specialist of the Nephrology Department
- Mr. José Alejandro Pérez Fidalgo, Specialist of the Oncology Department
- Mrs. Tania Fleitas Kanonnikoff, Specialist of the Oncology Department
- Mrs. Mª Luisa Calabuig Muñoz, Specialist of the Hematology Department
- Mr. Antonio Peláez Hernández, Allergy Specialist
- Mr. Francisco Dasí Fernández, Stabilized Miguel Servet Researcher
- Mr. Luis Miguel Bayo Calaforra, "Amics de la Gent Major" Foundation
- Mr. Rafael Barajas Cenobio, Responsible for Quality and Data Protection INCLIVA

Administrative Secretary: Mrs. Sofía Galant,
Mr. Carlos Ballesteros

Administrative: Mrs. Maialen Llopis

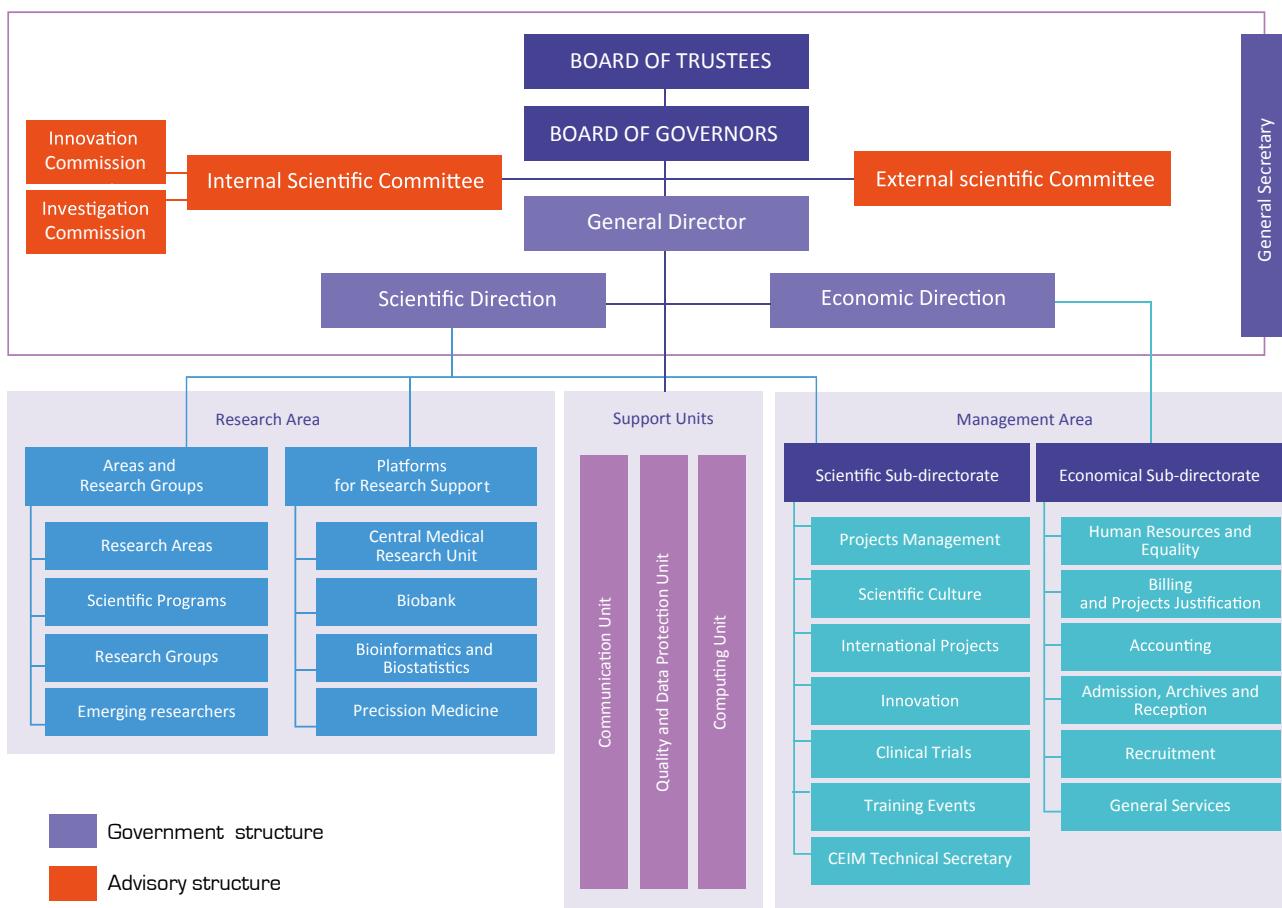

INCLIVA origin and structure

2.2.2. Management structure

The organizational chart, approved at the Board of Trustees, is comprised of two sub-directorates, economical and scientific.

The first sub-directorate is in charge of the administrative area, which deals with the financial and administrative matters as well as with human resource management.

The second is in the charge of scientific activity management and innovation. It is responsible for integral scientific management that includes controlling and monitoring clinical trials and research projects, organizing courses, conferences and seminars, and several tasks related to general administration. Furthermore, it acts as an administrative support to the different affiliated scientific committees and to the Medical Research Central Unit. It comprises the innovation area in charge of quality and planning, innovation management, international programs and scientific and innovative culture promotion (UCCI).

INCLIVA origin and structure

ADMINISTRATIVE AREA:

- Financial Director: Vicente de Juan
- Budget Control and Economic Management: Consuelo López
- Human Resources and Equality Unit: Ruth Cano, Anabel Gil, Lucía Toledo
- Invoicing and Project Justify: Vera Marín, Karen Iglesias, M^a Pilar Boix
- Accounting: M^a José Rosalén
- Records Unit: Alicia Belenguer
- Purchasing Unit: Isabel Gomis
- General Services Unit: Cristina García
- Receptionists: Inmaculada Montalt, Alicia Gumié
- Clinical Trials Platform: Dolores Iglesias, Ana Portolés, Mercedes Peris, Mireya Ferrandis, Carlos Peris
- Training and Events Unit: Cristina García, Mercedes Navarro, Clara Soriano
- CELM Administrative Management: Sofía Galant, Maialen Llopis, Carlos Ballesteros
- Data Quality and Protection: Rafael Barajas, María Domínguez
- Scientific Production Unit: Patricia Mañas
- Communication: Alexandra Muñoz

SCIENTIFIC MANAGEMENT AREA:

- Scientific Subdirector and Project Management: Marta Peiró
- Scientific Culture Unit: Mercedes Navarro
- International projects Unit: Ana Ferrer, Ana Duarte, Eugenia Flores
- Innovation Management Unit: Marta de Olmo, Carlos Guerreiro
- Clinical Trials Management Unit: Dolores Iglesias, Laura Silla

COMPUTING UNIT:

- Head of Information Systems and High Performance Computing: Miguel Herreros
- IT system administrator and programmer: Enrique Herreras
- Computer technician: Joan Josep Bruno Ramírez

SECRETARY GENERAL

- Head: Maite Saenz
- Technician: Lorena Munuera

2.3. Core facilities

RESEARCH SUPPORT PLATFORMS

- Cell Culture Unit
- Flow Cytometric Unit
- Multigenic Analysis Unit
- Confocal Microscopy Unit
- Sequenom Platform
- Laboratory of Molecular Imaging and Metabolomics
- Animal Housing and Experimental Operating Theaters Unit
- Proteomics Unit
- Small Animals PET/CT Camera and Laboratory for Radioactive Isotopes
- Personal Autonomy, Dependence and Severe Mental Disorders Assessment Unit

INCLIVA PLATFORMS

- Biobank
- Bioinformatics Unit
- Precision Medicine Unit
- Cytogenetics Laboratory

global analy- sis

INCLIVA SCIENTIFIC REPORT 2021

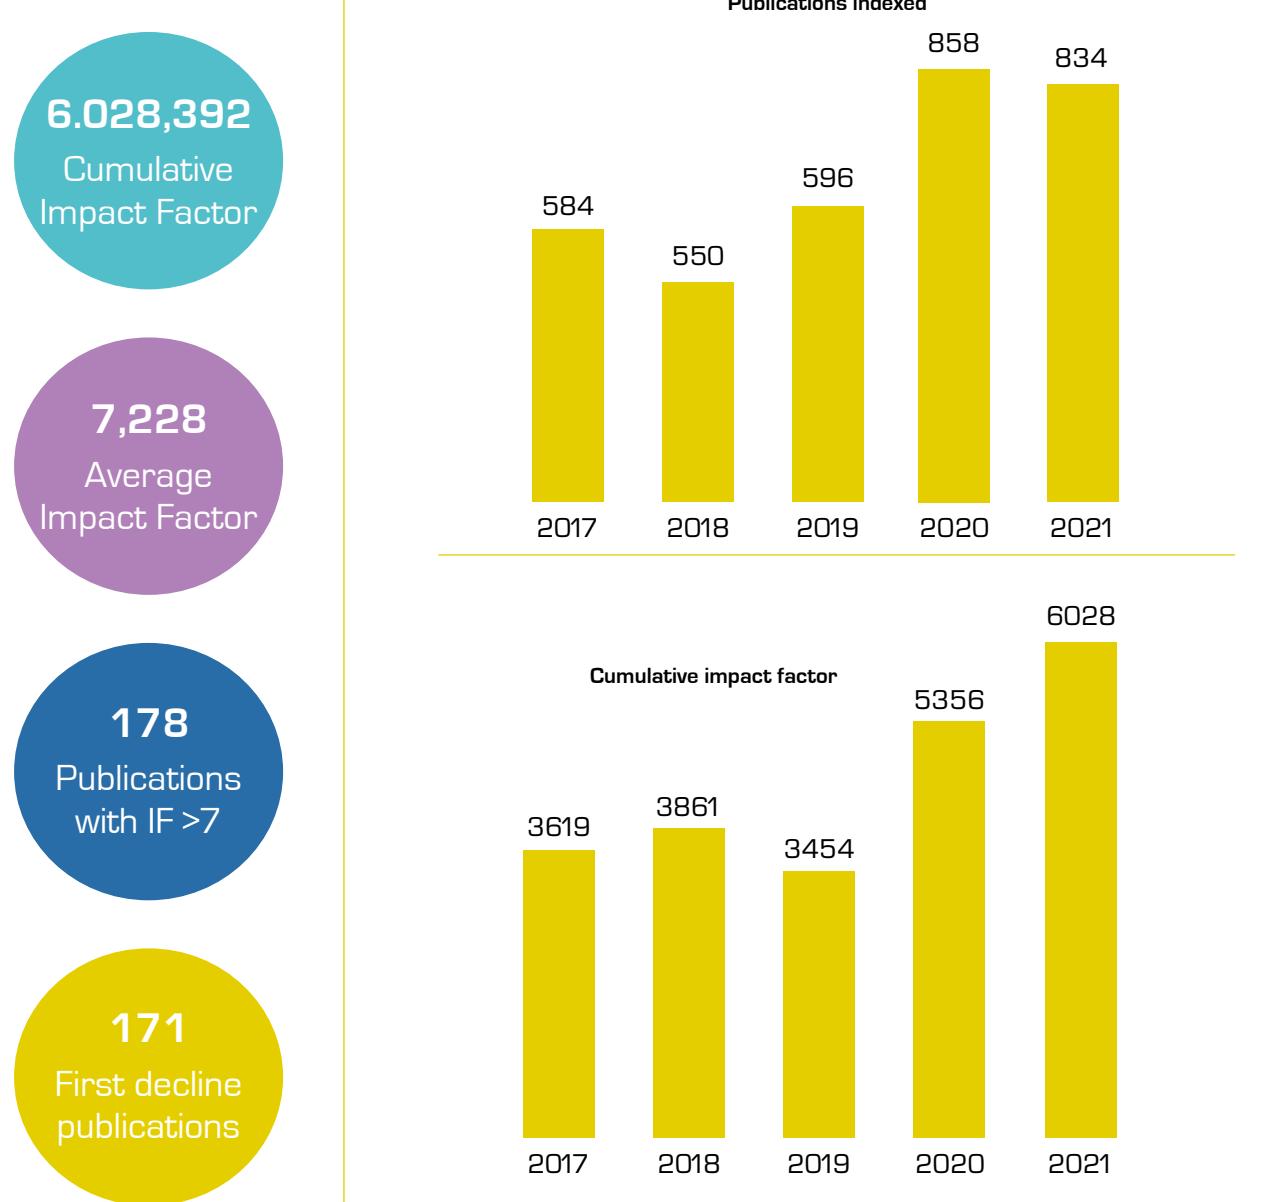

global analysis

3.1 Scientific production global analysis

As in previous years, INCLIVA continued in 2021 with the upward trend in the quality of scientific production. The number of publications this year is 834, with a cumulative impact factor of 6.028,392 which translates into an average impact factor 7,228.

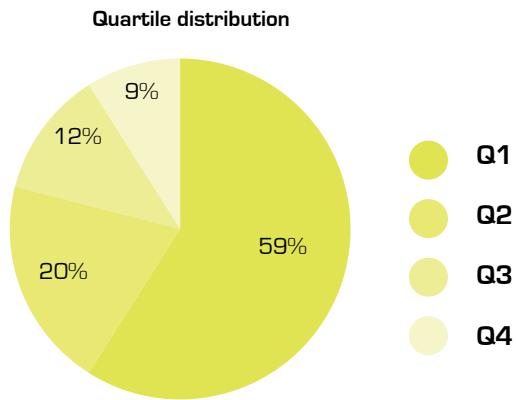

The following figures depict the number and quality of the published manuscripts expressed in terms of total and average impact factor.

834
Publications

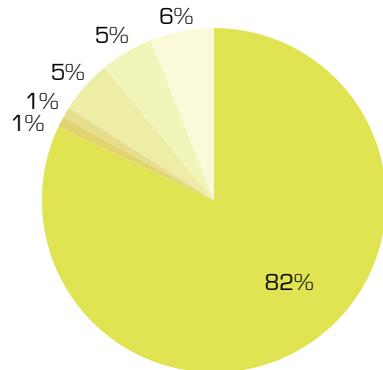

3 global analysis

The distribution by quartiles within their thematic categories is shown below. In 2021, about 80% of the papers that were published in indexed journals belong to the first and second quartiles of their corresponding thematic categories:

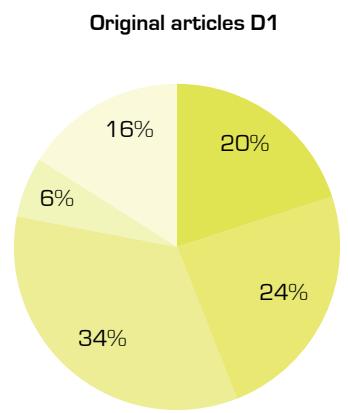

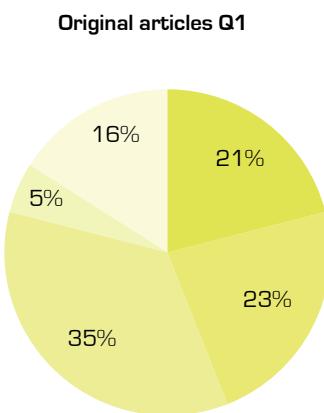

The number and percentage of scientific publications according to category are:

Category	Value
Articles	691
Case reports	7
Corrections	7
Editorials	43
Letters	39
Reviews	54

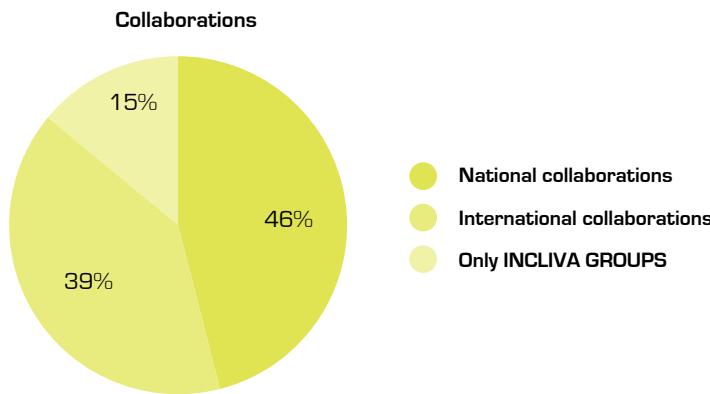

The percentage of originals in first decile and first quartile publications in 2021 are:

 Cardiovascular Oncology Metabolism Reproductive Hospital divisions

global analysis

One of the main success factors for a biomedical research institution has to do with its potential to establish high level scientific collaborations. The percentage of national and international collaborations which led to scientific output in 2021 is listed below.

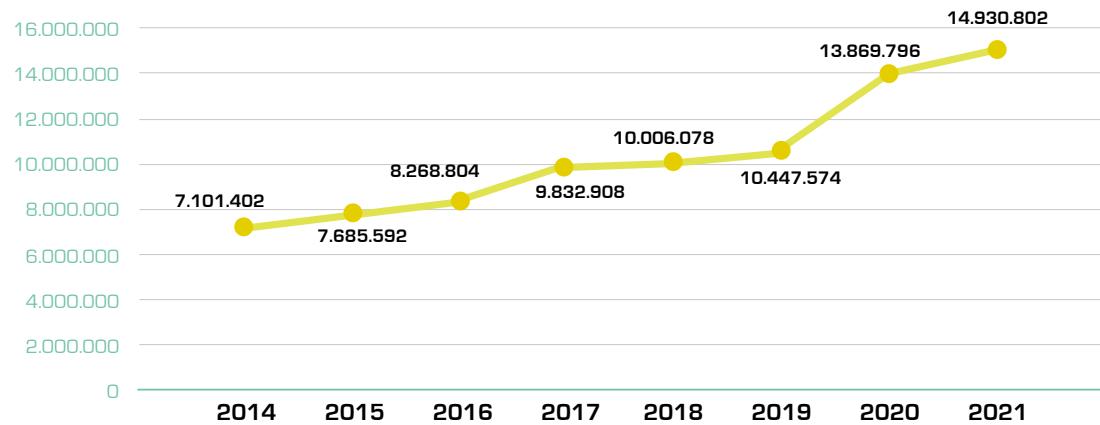

Another key performance indicator is the leadership role in scientific publications. The chart below shows the number of published articles in which INCLIVA researchers sign as corresponding author, first and last author.

3 global analysis

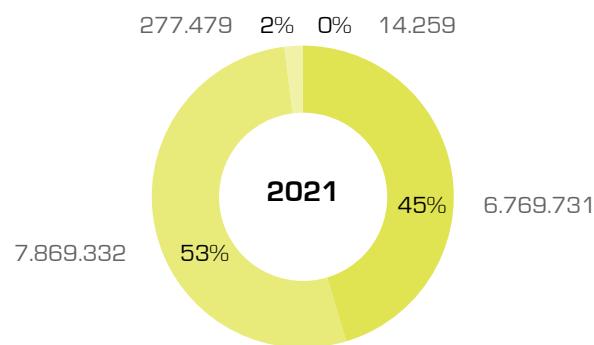

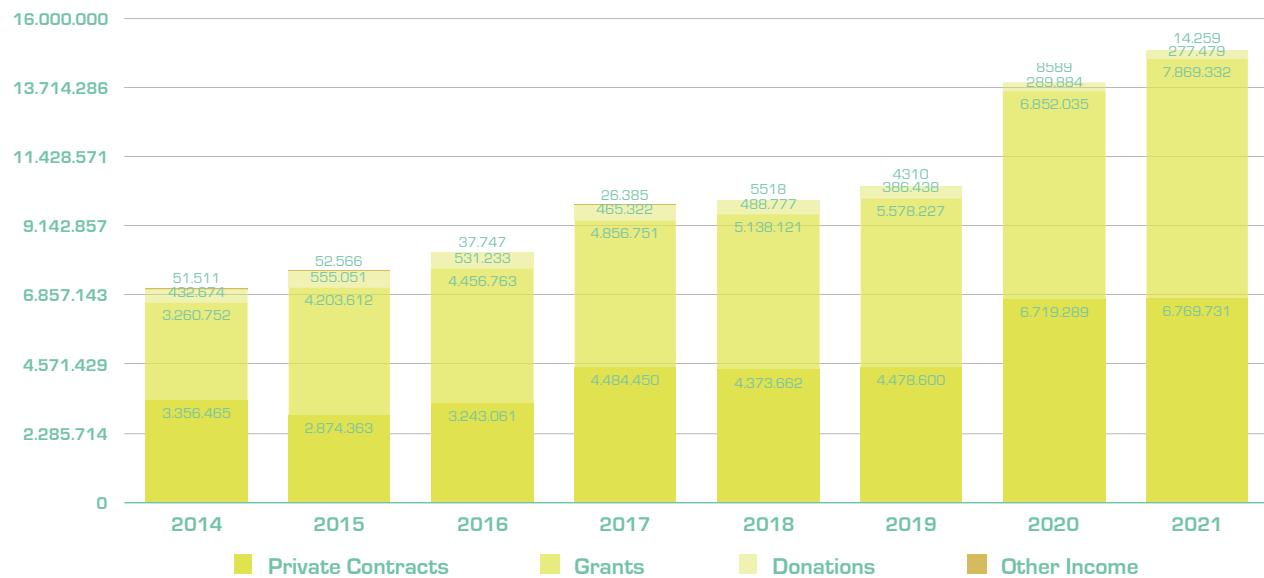

3.2. Financial resources

INCLIVA's funding during 2021 totaled €14.930.802. The funds raised from competitive sources were still higher than the average of recent years.

Funding source in the indicated period is shown below.

The remaining income corresponds to private sources of funding, clinical trial revenues and grants among others. The graph below shows this distribution of the year 2021.

global analysis

The analysis of the income obtained by the Foundation in its last fiscal year (2021) is shown in the table.

INCOME	AMOUNT	OVERHEADS	TOTAL
TURNOVER	5.599.768,99	1.169.961,81	6.769.730,80
DONATIONS	232.963,98	44.515,41	277.479,39
GRANTS	6.027.004,40	605.345,44	6.632.349,84
CAPITAL GRANTS	1.236.982,27		1.236.982,27
FINANCIAL	48,56		48,56
EXTRAORDINARY	14.210,84		14.210,84
TOTAL INCOME	13.110.979,04	1.819.822,66	14.930.801,70

Also used as a source of information the Annual Accounts of 2021 approved by the Board of Trustees of the Foundation and audited by the General Intervention of the Generalitat Valenciana (through the audit firm Fides Auditores) the information of the expenses executed is provided, with the explanation of the use of the corresponding indirect costs.

EXPENSES	TOTAL
CASH FUNDING	92.334,78
SUPPLIES	1.747.409,47
OTHER FUNCIONAL EXPENSES (ACTIVITY)	2.118.040,25
STAFF COSTS	6.506.567,54
OTHER FUNCIONAL EXPENSES (STRUCTURAL)	389.718,04
EXTRAORDINARY EXPENSES	27.927,92
INVENTORY ITEM DONATION EXPENSES	54.454,56
AMORTIZATION OF FIXED ASSETS	1.452.750,11
TOTAL EXPENSES	12.389.202,67

3 global analysis

Finally, this is the balance sheet of the foundation in official format, extracted from the Annual Accounts of 2021:

ASSETS			FISCAL YEAR 2021	FISCAL YEAR 2020
A) NON-CURRENT ASSETS			16.571.327,92	16.160.931,24
	I.	Intangible assets	2.453.753,52	2.561.187,29
	2.	Concessions	2.443.818,38	2.534.050,18
	3.	Patents, licences, trademarks and similar rights	6.057,50	6.485,80
	5.	Computer Software	3.877,64	20.651,31
	III.	Investment property	6.946.953,82	7.742.393,94
	2.	Technical facilities and other tangible fixed assets	6.946.953,82.	7.742.393,94
	VI.	Deferred tax assets	7.170.620,58	5.857.350,01
	1.	Other government loans	4.242.885,23	3.088.778,55
	2.	Other loans from private entities	786.533,37	741.115,03
	3.	Other European Union loans	2.141.201,98	2.027.456,43
B) CURRENT ASSETS			26.406.646,77	22.201.492,96
	III.	Trade and other receivables	5.341.276,58	5.267.161,86
	IV.	Current investments in group companies and associates	7.121.236,16	9.349.331,29
	6.	Other government loans	7.121.236,16	9.349.331,29
	VI.	Prepayments for current assets	2.416,00	2.416,00

3.3 Cooperative research networks

The Carlos III Health Institute develops – through the General Subdirection of Networks and Centers for the Cooperative Research – the creation of stable research network structures such as CIBER (Network of Centres for Biomedical Research). INCLIVA participates in this research structure through its associated groups.

The following table shows the participation in scientific networks according to the prioritized research area, the center and its principal investigator.

CIBER

Research Area	INCLIVA PI		Scientific Network	Reference
Cardiovascular	Mr. José Tomás Real Collado	CIBERdem		CB07/08/0018
	Mrs. Empar Lurbe i Ferrer	CIBERRobn		CB06/03/0039
	Mr. Francisco Javier Chorro Gascó	CIBERcv		CB16/11/00486
	Mr. Juan Sanchis Forés	CIBERcv		CB16/11/00420
Metabolism and Organ Damage	Mr. Esteban Morcillo Sánchez	CIBERres		CB06/06/0027
	Mr. Federico V. Pallardó Calatayud	CIBERrer		CB06/07/0073
	Mr. Julio Sanjuán Arias	CIBERSam		CB07/09/006
	Mr. Rafael Tabarés Seisdedos	CIBERSam		CB07/09/0021
	Mr. José Viña Ribes	CIBERfes		CB16/10/00435
Oncology	Mr. Andrés Cervantes Ruipérez	CIBERonc		CB16/12/00473
	Mrs. Rosa Noguera Salvá	CIBERonc		CB16/12/00484

global analysis

3.4 Knowledge transfer activities

INCLIVA Health Research Institute is fully committed to transfer the knowledge created both to the National Health System and to the industrial sector in order to fulfil its organizational mission.

3.4.1 Knowledge transfer to the National Health System

Clinical guidelines and consensus documents are one of the best indicators of knowledge transfer from research to clinical practice. The following table shows the guidelines published in indexed journals in which authors affiliated with INCLIVA have participated. Of these clinical practice guidelines, 4 have been implemented in the IIS health centers.

Clinical guidelines	IF
7	86,496

- Vogel A, Martinelli E, ESMO Guidelines Committee. Updated treatment recommendations for hepatocellular carcinoma (HCC) from the ESMO Clinical Practice Guidelines. *Annals of Oncology*. 2021 Jun;32(6):801-805. doi: 10.1016/j.annonc.2021.02.014. PMID: 33716105. IF: 32,976

global analysis

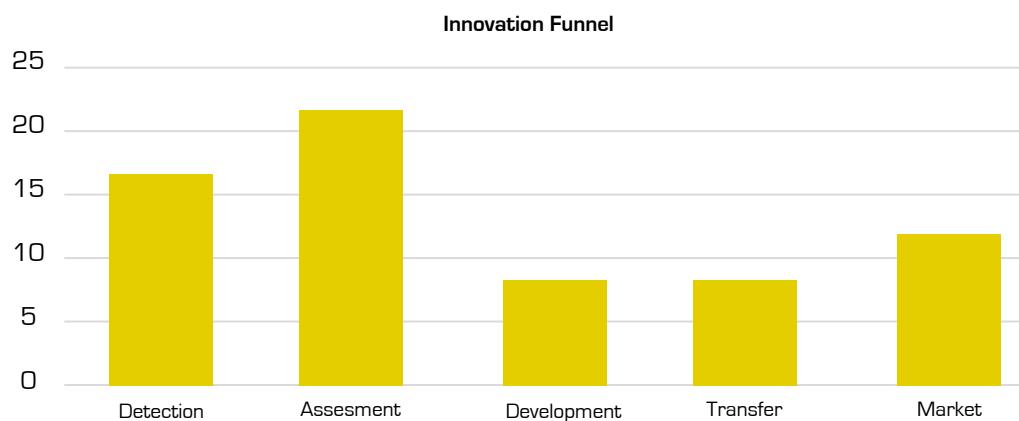

3.4.2. Innovation and Knowledge transfer

One of the main objectives of INCLIVA is the development of translational research, that is, research that transports scientific knowledge into clinical practice. To achieve this objective, multidisciplinary collaboration between basic and clinical researchers is necessary, so that the discoveries generated can be taken as products or processes capable of effectively improving the diagnosis, treatment and, in conclusion, the quality of life of the patient.

The Innovation Unit of INCLIVA gives support in this translational process, detecting ideas, evaluating them and facilitating their access to the market. This process that goes from the identification of a wide range of ideas to the market launch of those selected products or services through different phases is known as an innovation funnel.

The breakdown of the INCLIVA innovation funnel in 2021 is the following:

Innovation Funnel	ITC Health	Device	Pharma	Bio	Imaging	Organizational	Total
Detection	3	4	0	6	0	3	16
Assessment	1	3	3	12	1	1	21
Development	1	2	2	3	0	0	8
Transfer	1	1	2	4	0	0	8
Market	2	2	1	3	1	2	11

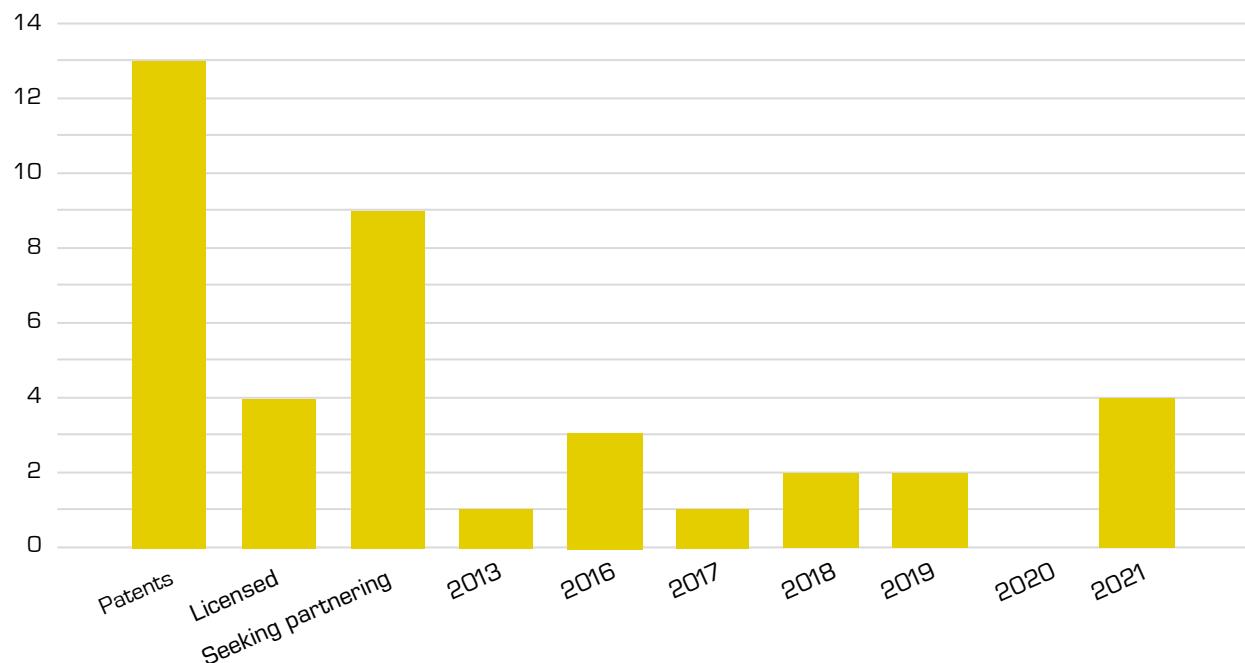

3 global analysis

3.4.2.1 Intellectual Assets

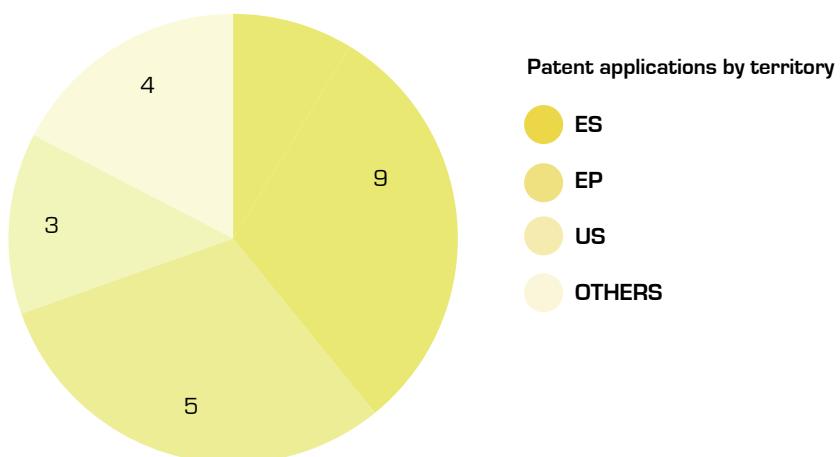

The protection of knowledge is the first step to move scientific findings and ideas from researchers to the industry and the most common way to protect technologies that are new, inventive and have industrial application are patents. Research institutions can exploit the patents they hold by licensing them to companies.

A large part of the results derived from the research activity, generated by the research staff in the field of their teaching and research functions, are capable of being protected by means of some of the forms of protection of industrial or intellectual property.

INCLIVA counts on 13 active patents applications in 2021. During this year INCLIVA has obtained the license of two patents. The next plot summarizes the current status of these protected inventions.

During 2021, 4 patents have been applied. The following graph summarizes the status of patent applications by territory

global analysis

The following family patents were active on 2021:

Invention	Priority number	IP/% INCLIVA	Status
2021. Use of Musashi 2 [msi2] as therapeutic target for the treatment of the characteristic myopathy of type 1 myotonic dystrophy	EP21382133	5%	EP
2021. Antitumor agent based on Ruthenium (III)	P202130624	40%	ES
2021. APC protein for the detection and prediction of septic shock	EP21382173	10%	EP
2021. Epigenetic signature for the diagnosis and prognosis of Spitzoid cutaneous melanocytic tumors	EP21382569	66,67%	EP
2019. Moxifloxacin for use in the treatment of spinal muscular atrophy	ES201930436	23%	PCT
2019. Oropharyngeal obturation device	ES20190003	100%	PCT
2018. Injectable material for the regeneration of the articular cartilage	ES201830730	29%	PCT
2018. In vitro method for the prediction of response to chemotherapy in triple negative breast cancer patients	EP18382390.5	58,3%	EP
2017. Prenylated benzopyranes as PPAR agonists	P201731470	40%	PCT
2016. Mass spectrometry-based methods for the detection of circulating histones h3 and h2b in plasma from sepsis or septic shock (ss) patients	EP16382509.4	6%	EU, USA, JP, CN, CA (Licensed)
2016. Intramedullary fixation device	P201631220	2,5%	EU, EEUU, Brasil (Licensed)
2016. Device for the exo-prosthetisation of limbs and other percutaneous applications	P201631218	2,5%	EU, EEUU (Licensed)
2013. Maxillomandibular prosthesis and production method	ES20130030734	33,33%	Licensed

3 global analysis

3.4.2.2 Competitive innovation

In order to develop the innovation ideas, INCLIVA submit proposals to autonomic, national and international founding calls. During 2021, 10 projects were granted for a total of €1.029.373,57.

INNOVATION COMPETITIVE PROJECTS OF 2021	TOTAL (€) OF 2021
<i>Valorización e internacionalización de HistShock, un test IVD para el diagnóstico y pronóstico de la sepsis y el shock séptico (FIPSE)</i>	€ 30.000
<i>Uso de moduladores de microRNAs como terapias experimentales en distrofia miotónica de tipo 1 (GVA-APOTIP)</i>	€ 36.000
<i>Mejora del diagnóstico del cáncer colorrectal (QUIBIM) (GVA-APOTIP)</i>	€ 8.600
<i>Desarrollo preclínico de gaptmers contra una nueva diana terapéutica en Distrofia Miotónica tipo 1 (DM1) (DTS-ISCIII)</i>	€ 127.600
<i>Validación de test basados en péptidos marcados isotópicamente y espectrometría de masas para la cuantificación de histonas circulantes y proteína APC (DTS-ISCIII)</i>	€ 122.100
<i>Preservación de órganos de trasplante (riñón y corazón). Proyecto de CPI (CDTI-AINIA)</i>	€ 169.491,70
<i>2 Agentes de innovación (AVI-Promoción Talento)</i>	€ 250.677,62
<i>Sistema de visión Artificial aumentada para la caracterización molecular y morfológica del Cáncer de piel (SAMUEL) (AVI-Estratégico)</i>	€ 176.999,4
<i>Sistema inteligente de apoyo a la toma de decisiones clínicas en medicina de precisión (OGMOS) (AVI-Estratégico)</i>	€ 107.904,85
Total	€ 1.029.373,57

global analysis

3.4.2.3 Entrepreneurship

When the knowledge generated in INCLIVA is disruptive and the researchers willing to exploit it by themselves, the knowledge transfer is direct, thanks to the creation of a new venture [also known as a spin-off or start-up] based on such knowledge with the support of INCLIVA.

INCLIVA counts with the following companies officially recognized as spin-offs:

Epidesase S.L.

Company created in 2014 as a result of a project led by researchers from INCLIVA and the Center for Research in Biomedicine Network (CIBER) in the area of Rare Diseases to transfer knowledge in the field of epigenetics and biomedical sciences at the service of society.

Founding year: 2014

INCLIVA entrepreneurial team: Mr. José Luis García Giménez and Mr. Federico Pallardó

<http://www.epidisease.com/>

Sequencing Multiplex S.L.

Company created in 2013, which was born from the idea of generating solutions for research and clinical applications, using as a basis the introduction of new techniques and advanced genetic platforms, mainly next-generation sequencing (NGS).

Founding year: 2013

INCLIVA entrepreneurial team: Mr. Javier Chaves

<https://www.seqplexing.com/es>

Nela BioDynamics S.L.

The company arises from the results of a Final Master Thesis in Biomedical Engineering, which lead to the obtaining of two patents on a novel intramedullary fixation system for joint endoprostheses, nails for fractures and exoprostheses; and a percutaneous ostomy collar. Both patents are currently licensed to the spin-off itself.

Founding year: 2020

INCLIVA entrepreneurial team: Mr. José Expósito Ollero

<http://www.nelabiodynamics.com/>

ArtHex Biotech S.L.

Company created in 2020 at the University of Valencia that develops advanced RNA treatments against genetic diseases. ARTHEX Biotech's mission is to find effective treatments for unmet medical needs. The first objective of the company will be to investigate anti-microRNAs for the treatment of myotonic dystrophy type 1 (DM1).

Founding year: 2020

INCLIVA entrepreneurial team: Mr. Rubén Artero

<http://www.arthexbiotech.com/>

ITEMAS PLATFORM

INCLIVA has the status of Adhered Center of the ITEMAS Platform of the IDIBELL Node. INCLIVA is part of the Alliance for Health Innovation and Industrialization of the Mediterranean Axis (AISEM) coordinated by the IDIBELL Foundation and created by the following institutions: IIS La Fe, FISABIO, IDIBELL, ISABIAL, IISPV, IdISBa, IDIAP and IMIB. AISEM nodes meet once a month, both the Technical Commission and the Strategic Commission. The Alliance has a 3-year Action or Work Plan divided into 5 key objectives.

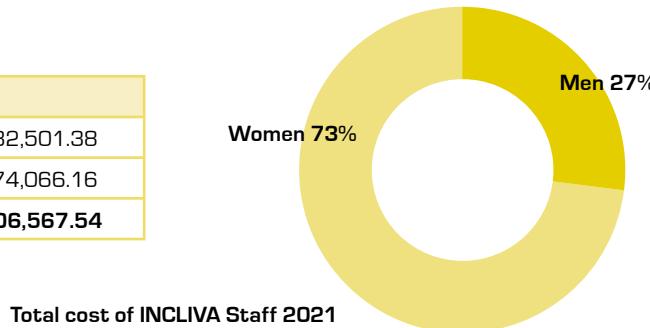

3 global analysis

3.5 Gender perspective

As part of its commitment to contribute towards guaranteeing real equality between women and men, INCLIVA's Board of Trustees has approved the II INCLIVA Equality Plan (2020-2024) following approval by the Equality Committee. Through INCLIVA's II Equality Plan, the different planned actions will be implemented throughout its four-year duration following the timeline established for each one.

Currently, 73.37% of INCLIVA employees are women. The data corresponding to activity in 2021 is as follows:

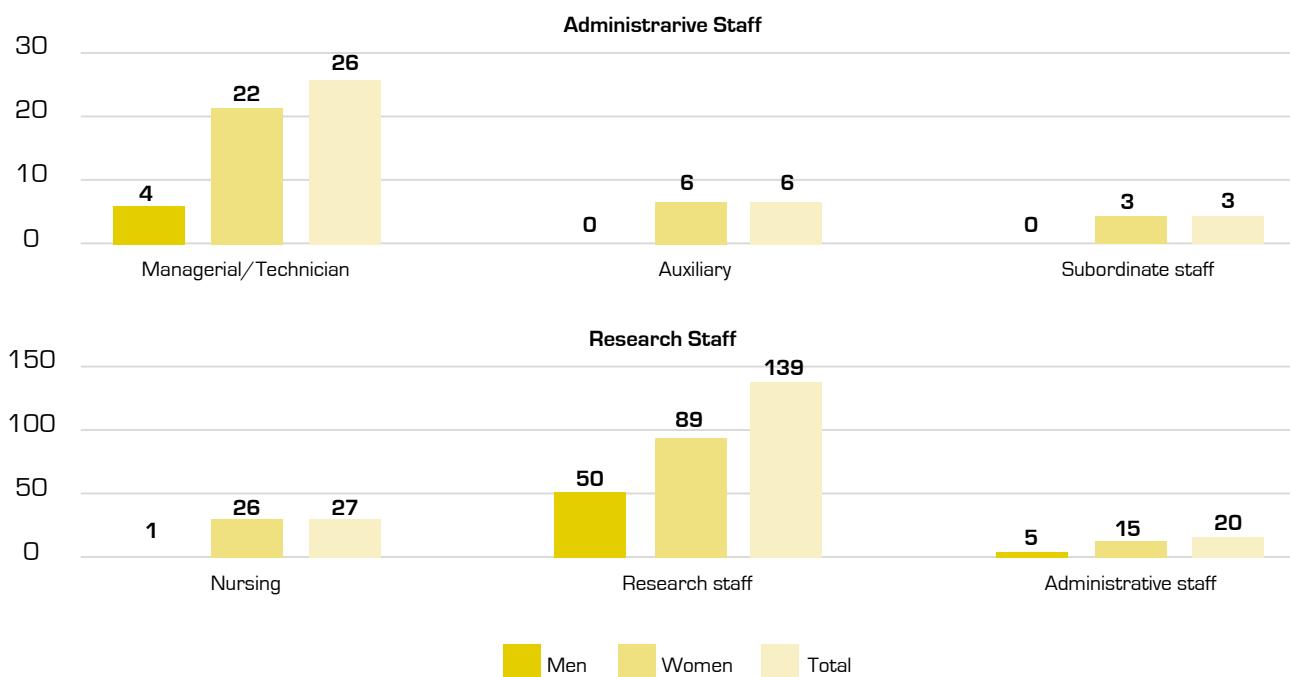

Total cost of INCLIVA staff	2021
Men	€1,732,501.38
Women	€4,774,066.16
TOTAL	€6,506,567.54

A total of 148 employees joined INCLIVA in 2021, of whom 75.68% are women. The percentage of women hired has increased every year for the last three years.

The following graphs differentiate between personnel hired for administration tasks and research staff:

- Women comprise 88.57% of staff contracted to carry out administration tasks and 69.89% of those who carry out research tasks
- Within the administrative area, 84.62% of Managerial/Technician positions are women and 100% of Auxiliary and Nursing staff contracts are for women
- In research, 96.30% of those hired as Nursing staff, 75% of Administrative staff and 64.03% of Research staff are women.

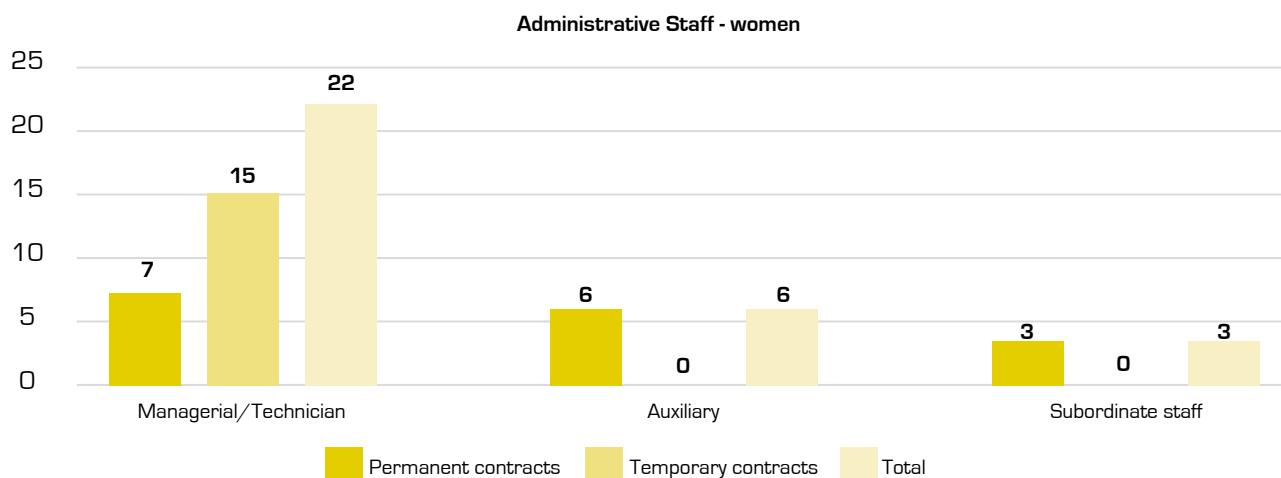

global analysis

Distribution by contract type

The breakdown of contracts granted to women is shown in the following graphs:

- 87.50% of permanent contracts for administration tasks and 58.33% of permanent contracts for research tasks are for women.
- 88.89% of temporary contracts for research tasks and 70.69% of temporary contracts for research tasks are for women.
- in administration: 77.42% of contracts for women are temporary contracts. Of these, 68.18% are contracts to carry out Managerial/Technician tasks and 100% for Auxiliary and Subordinate staff jobs. Fixed contracts for women within the administration are 100% for positions such as Managerial/Technician.
- in research: 94.62% of contracts awarded to women are temporary contracts. Of these, 96.63% of temporary contracts for research tasks, 96.15% of temporary contracts for nursing tasks and 80% for research administration tasks are for women.

Shared parental leave

Maternity/paternity leave was requested by only 9 employees throughout 2021: 3 by men, 6 by women.

Organizational structure

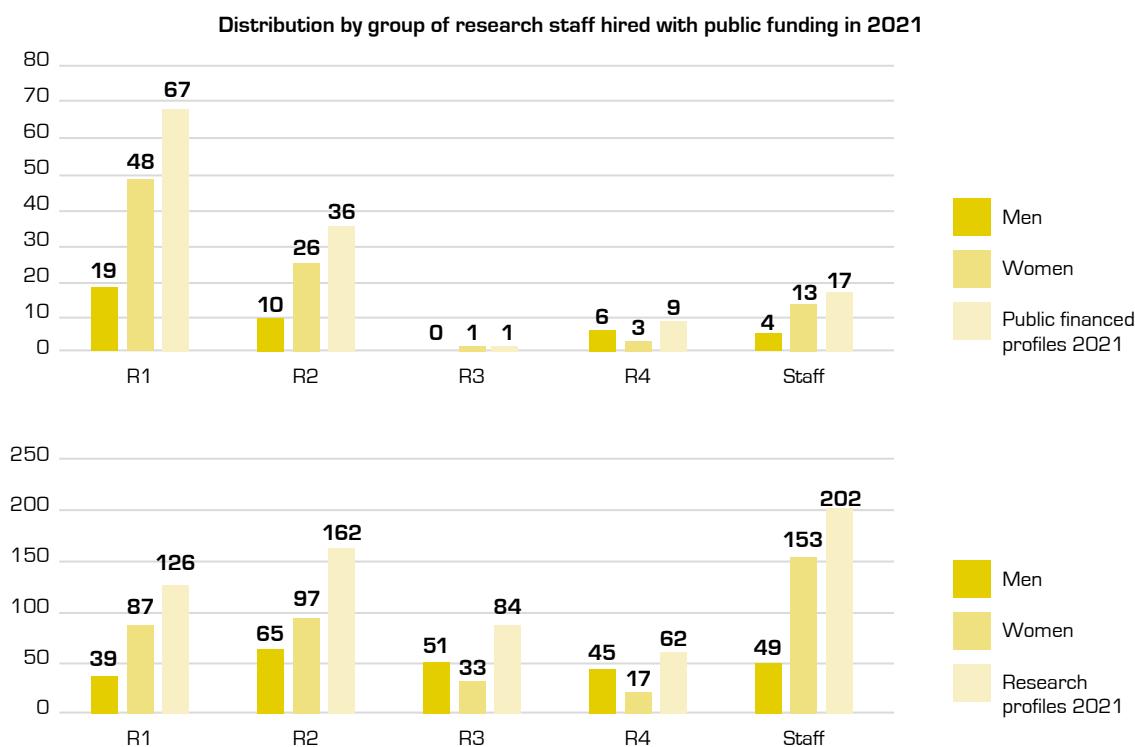

Unlike within our staff structure, women are clearly underrepresented in governing bodies and scientific committees. The distribution of each is summarized below:

	Men	Women	Total 2021
Board of Trustees	14	7	21
Board of Governors	10	3	13
External Scientific Committee	5	2	7
Internal Scientific Committee	6	4	10
Research Committee	15	18	33
Innovation Committee	10	5	15
Ethical Committee in Clinical Research	15	9	24
Research areas	4	0	4
Scientific translational programs	11	3	14
Research Groups	34	16	50

3 global analysis

Breakdown of Research Group staff

A total of 636 researchers belong to consolidated, emerging and associated research groups, and whose EURAXESS profile distribution is as follows. Distribution by group of research staff in 2021:

Research projects

Throughout 2021, competitive tendering began for 20 new public projects, making a total of 129 currently active public projects under competitive tender. The Principal Investigators are distributed as shown in the table. In total, 33.33% of regional projects are led by women, compared with 36.67% of national projects and 7.69% of international projects.

	Men	Women	Total 2021
Autonomous Regions	17	8	24
National	57	33	90
International/European	12	1	13

Clinical studies and trials

A total of 396 new studies and 207 new clinical trials have been conducted throughout 2021. The tables below indicate the distribution of Principal Investigators, and number of male and female evaluators.

	Men	Women	Total 2021
Studies presented	217	179	396
Submitted Essays	106	101	207
Evaluators	14	8	22

global analysis

Transfer to the Productive Sector

Calls for proposals, innovation awards and patent portfolios during 2021 are distributed by gender as shown in the table:

	Men	Women	Total 2021
External calls for innovation proposals requested in 2021	12	4	16
Patents in portfolio [IPs that have co-ownership of a patent]	11	9	20
Vlc-Bioclinic Applications 2021	14	16	30
Vlc-Bioclinic Concessions 2021	6	7	13
Applicants for Innovation Awards 2021	11	19	30

Bibliometric analysis: Biomedical Research Institute (IIS) corresponding author, first and last author

Of the 834 INCLIVA publications in 2021, the distribution of men to women according to the relevant position of signature [first, last or corresponding author] is 13.39% for female researchers and 34.14% for male researchers.

Training Activities

In total, 1,703 people participated in training activities carried out during 2021. According to registration questionnaires, 73% of participation was female (1,250) and 24% male (411), the question being left blank in the remaining 3%. In 79% of activities, participation was mainly female.

Title	Date	Scope	Activity Type	Modality	Hours	Participants	Men	Women
Biomedical Research on Pain with a Gender Perspective	03/08/2021	Regional	INCLIVA Seminar	Online	1	21	4	17
With equality you always win [1st session]	03/10/2021	Local	Training Day	Online	3	10	2	8
Colloquium on Valencian Researchers' Vision of Science	09/24/2021	Local	Informative Open Day	Mixed, face-to-face/online	1	9	0	9
With Equality You Always Win [2nd session]	10/20/2021	Local	Training Day	Online	2	17	3	14

1. Colloquium on Valencian Researchers' Vision of Science

The Mediterranean Researchers' Night [MEDNIGHT 2021] is a project conceived under the umbrella of European Researchers' Night. The objective is to show the public the importance of science and research developed in Mediterranean countries -emphasizing the role of women in this area- and seeking to address the issues shared by Mediterranean society.

global analysis

The MEDNIGHT project brings together a consortium of 13 institutions from Greece, Cyprus, the Valencian Community and the Murcia Region and is funded by the European Commission as part of the Marie Skłodowska-Curie actions programme [grant agreement no. 101036107].

YouTube link: <https://youtu.be/90Jk-ugCJX4>

Participant Profile: of the 8 responses received, 75% were from women [6 responses] and 25% from men [2 responses]. The professional profile comprised 25% technical research staff, 12.5% IP from consolidated groups, 12.5% predoctoral research staff, 12.5% postdoctoral research staff, 12.5% management, administration and service staff, 25% others.

2. With equality you always win (2 sessions)

The goals of this information day were to:

- Include the gender perspective in INCLIVA research projects.
- Disseminate key concepts on equality adapted to the work area.
- Make resources available to disaggregate data and statistics by sex.
- Provide resources and practical strategies to apply inclusive language in writing.
- Set guidelines and recommendations to contribute to real equality in research.

Training material was provided.

Participant profile in 1st session: of the 10 responses received, 80% were from women [8 responses] and 20% from men [2 responses]. The professional profile comprised 40% PI from Emerging Groups, 20% management staff, 10% emerging research staff, 10% management, administrative and services staff, 10% nursing staff, 10% others.

Participant profile in 2nd session: of the 17 responses received, 82.4% were from women [14 responses] and 17.6% from men [3 responses]. The professional profile comprised 35.3% management, administrative and services staff, 23.5% predoctoral research staff, 11.8% technical research staff, 5.9% PI Consolidated Group, 5.9% nursing staff, 5.9% principal research staff, 11.8% others.

3. Biomedical Research on Pain with a Gender Perspective

Seminar given by Dr. Ana Peiró, Professor of Pharmacology at the Miguel Hernández University of Elche and researcher at the ISABIAL Institute.

YouTube link: <https://youtu.be/-MAaVHQ8j28>

Participant Profile: of the 21 responses received, 81% were from women [17 responses] and 19% from men [4 responses]. The professional profile comprised 28.6% administrative and services staff, 19% medical staff, 14.3% research staff, 33% others.

External stays

Of a total of 8 external stays, 3 were granted to women, while of the 17 external stays funded by INCLIVA, 9 were women. In total, 48% of stays were completed by women.

global analysis

Internal Stays

Of a total of 5 internal stays, 3 were granted to women, entailing 60% of total internal stays.

Training placements

The classification and distribution by gender of training placements in 2021 is shown in the following table:

	Men	Women	Total 2021
Secondary school and vocational training placements	3	19	22
Bachelor's placements	10	40	50
Master's placements	1	10	11
Bachelor's final project (TFG) agreements (including INCLIVA Calls)	2	7	9
Master's final project (TFM) agreements (including INCLIVA Calls)	2	12	14
Total	21	88	109

Doctoral theses

Below is a breakdown by gender of the 65 doctoral theses defended or supervised by INCLIVA research staff. 70.83% of predoctoral researchers who defended their thesis in 2021 were women, and 32.22% of those supervising the theses defended in 2021 were women.

INCLIVA SCIENTIFIC REPORT 2021

4. Scientific activity

4.1 Scientific structure

4.2 Scientific translational programs

4.2.1 Overweight and cardiovascular and renal risk

4.2.2 Detection and control of ventricular dysfunction

4.2.3 Rare Diseases

4.2.4 Neurological Decline

4.2.5 Translational Oncology

4.2.6 Reproductive Medicine

4.2.7 Ageing and associated diseases

4.3. Research areas

4.3.1 Cardiovascular Area

4.3.2 Oncology Area

4.3.3 Metabolism Area

4.3.4 Reproductive Medicine Area

4.4. Hospital divisions research areas

4.5 Other scientific contributions from scientific platforms

4.5.1 Biobank

4.5.2 Oncology Phase I Oncology Clinical Trials unit

4.5.3 Innovation Platform ITEMAS

4.5.4 Spanish Clinical Research Network (SCReN),
Clinical Research and Clinical Trials of the Clinical
Trials Platform (UICEC INCLIVA)

4.5.5 Precision Medicine Unit

4.5.6 Bioinformatic and Biostatistics Unit

4.1 Scientific structure

INCLIVA articulates its research in 4 areas of research, 7 scientific programs, 4 platforms and one associated clinical group.

Areas of research constitute the basis on which to articulate the scientific work of the groups:

- Research area in cardiovascular
- Research area in oncology
- Research area in metabolism and organ damage
- Research area in reproductive medicine
- Associated clinical group

Scientific programs are aimed at specific diseases from a translational perspective:

- Program in Overweight and cardiovascular and renal risk
- Program in Detection and control of ventricular dysfunction
- Program in Rare Diseases
- Program in Neurological Decline
- Program in Translational Oncology
- Program in Reproductive Medicine
- Program in Aging and associated diseases

Platforms are based on the provision of research services to the whole institute:

- Central Unit for Medical Research (UCIM)
- Biobank
- Precision Medicine Unit
- Bioinformatics and Biostatistics Unit

scientific activity

4.2 Scientific translational programs

4.2.1 Overweight and cardiovascular and renal risk

Obesity and overweight is a field in which new strategies are developed both for prevention and treatment with the use of traditional resources and the new technologies. The present program is focused on the study of pathology on the first stages of obesity (overweight with or without metabolic syndrome) integrating different clinical and experimental research studies.

Coordinators: Dr. José Tomás Real and Dr. Josep Redon i Mas

Objectives:

- To deepen in the early alterations, mechanisms and biomarkers that contribute to the development of obesity, vascular and renal alterations as a complication, from its fetal, biological, genetic and environmental origins
- To know potential signaling pathways susceptible to be therapeutic targets
- Early application of new technologies for the prevention and treatment of obesity and vascular and renal alterations in overweight subjects

Research lines:

- To identify early vascular and renal changes in overweight subjects and in animal models
- To study the state, mechanisms of vascular inflammation and endothelial injury in overweight and animal models
- To analyze the relationship of “omic” markers (genomic, epigenetic and metabolomic) with obesity and vascular and renal alterations in overweight and animal models
- Interaction of biomarkers (biological, genomic and metabolic) and intervention in progression to obesity and vascular and renal complications

Clinical groups:

- Research Group on the Study of Cardiometabolic and Renal Risk (Dr. Josep Redón i Mas)
- Cardiometabolic Research Group on Primary Care (Dr. Jorge Navarro Pérez)
- Research Group on the Study of Cardiovascular Risk in Children and Adolescents (Dr. Empar Lurbe i Ferrer)
- Research Group on Oxidative Pathology (Dr. Guillermo Sáez Tormo)
- Research Group on Cardiometabolic Risk (Dr. José Tomás Real Collado)

Experimental groups:

- Research Group on Endothelial Cells (LINCE) (Dr. Carlos Hermenegildo Caudeville, Dr. Susana Novella del Campo)
- Research Group on Molecular Imaging and Metabolomics (Dr. Daniel Monleón Salvadó)
- Research Group on Inflammation (Dr. Esteban Morcillo Sánchez, Dr. Mª Jesús Sanz Ferrando)
- Research Group on Genetics of Osteoporosis (Dr. Miguel Ángel García Pérez)
- Genomics and Diabetes Unit (Dr. Felipe Javier Chaves Martínez)
- Molecular biology of renal and vascular dysfunction (Dr. Raquel Cortés Vergaz)

scientific activity

4.2.2 Detection and control of ventricular dysfunction

The program focuses on the study of the pathophysiological mechanisms involved in myocardial ischemic damage, on its structural, functional and electrophysiological repercussions on the evaluation of diagnostic tools and markers and prognoses and on the study of new therapeutic approaches that may help to prevent their adverse consequences.

It is a truly and translational research program that capitalizes the synergies between clinical and experimental research groups and also includes specialists in cardiac imaging techniques and technological development experts. The multidisciplinary approach extends the possibilities of collaboration between groups, strengthens those already existing and incorporates other groups into the activities of the program. Innovation through the development of analytical tools [imaging techniques such as cardiac magnetic resonance, cardiac electrical signals or cartographic techniques], allows the generalize of patents in the field of technological development.

Coordinators: Dr. Francisco J. Chorro Gascó, Dr. Vicente Bodí Peris and Dr. Juan Sanchis Forés

Objectives:

- Electrical remodeling: experimental studies on the protective effect against the arrhythmic vulnerability of modifications of the signaling pathways
- Ventricular remodeling: evaluation of the role of microvascular damage, prediction of postinfarction clinical evolution
- Biomarkers: clinical studies aimed at the validation of biomarkers related to the degradation of components of the extracellular matrix

Research lines:

- Characterization of the direct electrophysiological effects of the active metabolite of sacubitril
- Study of the modifications of the electrophysiological effects of overload sharp mechanics
- Analysis of the protective effects produced by chronic treatment with inhibitors
- Mechanisms involved in the deterioration of systolic function, fibrosis and the inducibility of arrhythmias
- Development of useful working instruments in the study of cardiac electrophysiology
- Basic research related to ischemia and myocardial infarction
- Prospective and multicenter registry (*Hospital Clínico Universitario de Valencia* and *Hospital Clínic de Barcelona* and *Hospital Vall d'Hebrón de Barcelona*) of patients
- Prognostic value of geriatric conditions in older patients admitted for acute coronary syndrome

Clinical groups:

- Research Group on Clinical Cardiology [Dr. Juan Sanchis Forés]
- Research Group on Cardiac Experimental Electrophysiology [Dr. Francisco Javier Chorro Gascó]
- Research Group on Heart Failure [Dr. Julio Núñez Villota]
- Group on Translational Research in Ischemic Heart Disease [Dr. Vicente Bodí Peris]
- Cardiometabolic Research Group on Primary Care [Dr. Jorge Navarro Pérez]
- Research Group in Care. INVESTENF-INCLIVA [Dr. M^a José Gastaldo Zaragoza]

Experimental groups:

4.2.3 Rare Diseases

The program's main objectives are to improve the diagnosis and current treatments of rare diseases (RDs). To this end, we will proceed to identify and validate rare disease biomarkers for which we do not have effective diagnostic and/or prognostic indicators. On the other hand, new therapeutic strategies will be developed to treat these diseases. Human and animal model samples will be used to understand the molecular basis of disease, evaluate the activity of candidate drugs, and discover new biomarkers.

The program seeks to fill the gap between basic research and commercial development of diagnostic systems and treatments, so it aims to transfer this knowledge to companies to transform biomedical knowledge into products and services that improve human health. With these objectives, contacts with biotechnology and pharmaceutical companies have been established. On the other hand, the program aims to disseminate its findings to society to get feedback about actual patients' needs.

Coordinators: Dr. Francisco Dasí Fernández and Dr. Federico

Pallardó Calatayud

Objectives:

- Development of cell models derived from cells of patients diagnosed with the RDs being studied obtained either through the genetic manipulation of healthy cells to mimic the mutations associated with these diseases or from animal models in order to improve the knowledge of the pathophysiology of each disease
- Discover new therapeutic targets and propose new pharmacological strategies for the treatment of these pathologies
- Promote collaboration with services of the Clinical Hospital involved in the treatment of these RDs, emphasizing primary care to improve its diagnostic potential
- Development of new diagnostic and prognostic methods
- Development of "omics" technologies to advance research in RRDD

Research lines:

- Study of the physiopathology of rare neuromuscular diseases
- Epigenetic regulation of neonatal sepsis
- Pathophysiology of telomeres
- Pathophysiology of alpha-1 antitrypsin deficiency, primary ciliary dyskinesia, childhood interstitial diseases and Prader-Willi syndrome
- Genetic and epigenetic modifiers in Friedreich's ataxia
- Gene therapy for the treatment of rare respiratory diseases
- Design and testing of new biomarkers for rare diseases
- Characterization of the cellular and molecular mechanisms associated with the pathology of neuromuscular diseases like Myotonic Dystrophy and Friedreich's ataxia and identification of molecular targets for the development of new therapies

Clinical groups:

- Research Group on Respiratory Diseases (Dr. Jaime Signes-Costa Miñana)

Experimental groups:

- Research Group on Translational Genomics (Dr. Rubén D Artero Allepuz)
- Research Group on Rare Respiratory Diseases (RRD) (Dr. Francisco Dasí Fernández)
- Research Group on Cellular and Organic Physiopathology of Oxidative Stress (Dr. Federico V. Pallardó Calatayud)
- Research Group on Molecular Imaging and Metabolomics (Dr. Daniel Monleón Salvadó)

Clinical Services Associated to the Program:

- Department of Pediatrics
- Department of Pneumology
- Department of Traumatology and Orthopedic Surgery

4.2.4 Neurological Decline

Inflammation, which is associated with many chronic diseases (diabetes, liver cirrhosis, etc.), aging or major surgeries, leads to neuroinflammation and brain alterations that eventually lead to cognitive and functional impairment. This deterioration reduces the quality of life and increases the risk of accidents, falls, fractures and adverse consequences, which implies an increase in hospitalizations and the use of public resources.

Cognitive and functional impairment associated with aging and many chronic diseases is one of the most important challenges in order to improve the quality of life of the population and secure the sustainability of health systems. Early detection and treatment and prevention of cognitive and functional impairment would improve the quality of life of the elderly or with chronic diseases and reduce the demand for resources to the health system, improving its sustainability. Therefore, it is necessary to design new approaches to address these challenges, based on advances in knowledge on mechanisms, early diagnosis, prevention and treatment of cognitive and functional impairment.

Coordinators: Dr. Carmina Montoliu Félix and Dr. Vicente Felipo Orts

Objectives:

- Characterize the alterations in inflammation, neuroinflammation, neurotransmission, function and brain structure associated with the appearance of cognitive and functional impairment
- Characterize cognitive and functional disturbances in detail
- Identify biomarkers for the early detection of cognitive and functional impairment
- Identify the mechanisms by which:
 - a) peripheral inflammation leads to neuroinflammation
 - b) neuroinflammation leads to functional, structural and neurotransmission alterations in the brain
 - c) brain disorders lead to cognitive and functional impairment
- Identify therapeutic targets to reverse or prevent cognitive and functional impairment
- Design and test new therapeutic procedures to reverse or prevent cognitive and functional impairment

Research lines:

- Develop new early diagnostic procedures for cognitive and functional impairment
- Try to transfer the new diagnostic procedures developed to clinical practice
- Evaluate in patients the efficacy and usefulness of new therapeutic procedures to prevent or reverse cognitive and functional impairment that has been effective in animal models
- Transfer to clinical practice the new validated therapeutic procedures

Clinical groups:

- Research Group on the Study of Cardiometabolic and Renal Risk (Dr. Josep Redón i Mas)
- Research Group on Anesthesiology and Reanimation (Dr. Marina Soro Domingo, Dr. Ernesto Pastor Martínez, Dr. Rafael Badenes Quiles)
- Research Group on Cardiometabolic Risk (Dr. José Real Tomás)

Experimental groups:

- Research Group on Neurological Impairment (Dr. Carmina Montoliu Félix)
- Research Group on Personal Autonomy, Dependence and Severe Mental Disorders (TMAP) (Dr. Rafael Tabarés Seisdedos, Dr. Gabriel Selva Vera)
- Research Group on Aging and Physical Activity (Dr. José Viña Ribes, Dr. Ana Lloret Alcañiz)
- Research Group on Inflammation (Dr. Esteban Morcillo Sánchez, Dr. M^a Jesús Sanz Ferrando)

Clinical Services Associated to the Program:

- Department of Digestive Medicine (Dr. Miguel Mínguez Pérez, Dr. Amparo Escudero García)
- Department of Neurophysiology (Dr. Paula Cases Bergón)

University Department Associated with the Program:

OBJECTIVES	NEUROLOGICAL DECLINE			COMMENTS	
	Achieve	STATE			
		Partially achieved	Not achieved		
1. Characterize the alterations in inflammation, neuroinflammation, neurotransmission, function and brain structure associated with the appearance of cognitive and functional impairment		X		We analysed the presence of neuroinflammation in post-mortem samples of the cerebellum from patients died with different grades of liver disease, from mild steatohepatitis to cirrhosis. We are analysing alterations in neural connectivity by functional magnetic resonance imaging.	
2. Characterize cognitive and functional disturbances in detail		X		Gait, balance, hand strength and motor speed performance were evaluated in cirrhotic patients. Evaluation and characterization of sensory thresholds was also performed by quantitative sensory testing using a CASE IV. We are characterizing cognitive and functional disturbances in patients with other pathologies: NASH (non-alcoholic steatohepatitis), diabetes mellitus, schizophrenia, bipolar disorder, and post-surgery patients. We are better characterizing executive functions in cirrhotic patients by computerized tests.	
3. Identify biomarkers for the early detection of cognitive and functional impairment		X		We are studying the altered genes in peripheral blood cells and the involved pathways associated with the appearance of cognitive impairment; we are characterizing the changes in inflammation and metabolites associated to cognitive impairment. We are performing an integrated multiomics analysis to identify biomarkers of cognitive and functional impairment. We are characterizing eye movements in patients with different pathologies: cirrhosis, NASH, and diabetes mellitus.	

4 scientific activity

4. Identify the mechanisms by which: a) peripheral inflammation leads to neuroinflammation b) neuroinflammation leads to functional, structural and neurotransmission alterations in the brain c) brain disorders lead to cognitive and functional impairment	X		We have identified alterations of the immune system associated with the appearance of neurological alterations in cirrhotic patients with MHE. We have identified, in animal models, mechanisms by which peripheral inflammation induces neuroinflammation, and how this alters neurotransmission and cognitive and motor function. We have shown that there is a dysregulation in the urea cycle in non-alcoholic fatty liver disease. We are analyzing the role of exosomes as mediators of neuroinflammation and of alterations in neurotransmission and cognitive and motor function in animal models of MHE.
5. Identify therapeutic targets to reverse or prevent cognitive and functional impairment	X		We have identified several therapeutic targets in animal models of MHE.
6. Design and test new therapeutic procedures to reverse or prevent cognitive and functional impairment	X		We are testing the effect of treatments on cognitive impairment and immunophenotype in patients to reverse or prevent cognitive and functional impairment. We have designed several treatments that improve cognitive and motor function in animal models.
7. Programme activity: Seminars of the Neurological Impairment Program	X		Seminars are scheduled for the third Thursday of each month. Time: 13:30h

4.2.5 Translational Oncology

The translational oncology program called "Identification of oncogenic biomarkers: mechanisms and clinical implications, detection in non-invasive samples, omics analysis" tries to apply to the clinical practice the genomic screening in patients tumors.

Its main objective is to evaluate the dynamics of the disease through non-invasive biopsies in order to detect minimal residual disease, early onset of markers after surgery and patient response to different treatments.

The high heterogeneity of cancer results in inefficiency of treatments, even when they are directed against specific molecular targets. The low availability of tumor specimens makes genomic studies difficult.

In this sense, the use of liquid biopsies would facilitate the serial collection of samples to carry out molecular analysis and would guarantee a minimum risk for the patient. Thus improving the follow-up and allowing a dynamic understanding of the evolution of the genomic parameters of the patient.

This point of view benefits the National Health System as a whole since it allows the application of more specific treatments to patients, thus avoiding those that would have been less effective, reducing hospitalization and improving life expectancy and quality thereof. It could also prevent generalized treatments, secondary toxicities and rapid treatment adequacy responses.

Finally, it would improve the inclusion of patients in clinical trials which are stratified by molecular mutations.

Coordinator: Dr. Andrés Cervantes Ruipérez

Objectives:

- Identification of diagnostic biomarkers that help the early identification of patients
- Identification of biomarkers of resistance to treatment or relapses
- Development of functional models mimetic to the characteristics of the patient
- Development of decision support systems through data analysis

Research lines:

- Liquid biopsy as a diagnostic tool
- Functional models of organoids, murine and 3D bioprinted for the study of resistance and drug screening
- Integration of molecular and image data for the development of decision support systems
- Promote the development and implementation of programs in advanced therapies, particularly, CAR-T cells cell therapy and other models
- Continuous improvement of the inclusion of patients in clinical trials, in coordination with primary care

Clinical Groups:

- Research Group on Breast Cancer Biology (Dr. Ana Lluch Hernández, Dr. Pilar Eroles Asensio)

- Research Group of Innovative Diagnostic and Therapeutical Developments in Solid Tumors - InDeST (Dr. Andrés Cervantes Ruipérez)
- Research Group on Hematopoietic Transplantation (Dr. Carlos Solano Vercet)
- Research Group on Myeloid Neoplasms (Dr. Mar Tormo Díaz)
- Research Group on Lymphoproliferative Disorders (Dr. Mª José Terol Casterá)
- Translational Research Group on Pediatric Solid Tumors (Dr. Samuel Navarro Fos, Dr. Rosa Noguera Salvá)

Clinical Services Associated to the Program

- Department of Radiology
- Department of Pathological Anatomy
- Central Laboratory
- Department of Pharmacy
- Department of Urology

Associated program platforms:

- Biobank
- Precision Medicine Unit

4.2.6 Reproductive Medicine

This program comprises two main lines:

1. Molecular characterization at single-cell resolution of the human uterus as a basis for both understanding uterus health and disease, and improving diagnosis, monitoring and new therapies.
2. Study of maternal-embryonic communication mechanisms and their impact on reproductive health.

Coordinators: Dr. Carlos Simón Vallés and Dr. Felipe Vilella Mitjana

Objectives:

- To create comprehensive reference map at single-cell resolution of the human uterus
- To study the origin of fibroids at the single-cell level
- To study the origin of late gestational pathology focuses on decidualization deficiency
- To establish the maternal-fetal communication mechanisms before embryo implantation
- To provide early diagnosis and treatment of endometriosis and endometrial cancer
- To study the molecular mediators in hormone-dependent oncogenesis in endometrium and ovary
- To establish a success strategy in the implementation of physical activity to reduce the risk of chronic disease in women

Research lines:

- Study of endometrial receptivity and cell map of the human uterus. Previous research in our laboratory using microarray technology has established a transcriptomic signature of human endometrial receptivity
- Maternal-fetal communication
- Role of the endometrial microbiome in reproduction
- Early diagnosis of preeclampsia and other complications of pregnancy
- Study at the single-cell level of the origin of uterine fibroids
- Early diagnosis and treatment of endometriosis and endometrial cancer
- Molecular factors involved in the initiation and progression of hormone-dependent tumours in the endometrium and ovary
- Implementation of physical activity as a strategy to improve health indicators in women

Clinical groups:

- Research Group on Women Health [Dr. Antonio Cano Sánchez]
- Research Group on Endometriosis and Endometrial Cancer Therapies [Dr. Raúl Gómez Gallego]

Experimental groups:

- Research Group on Maternal Fetal Communication [Dr. Felipe Vilella Mitjana]
- Research Group on Reproductive Medicine [Dr. Carlos Simón Vallés]
- Emergent researcher [Dr. Aymara Mas Perucho]

Clinical Services Associated to the Program

- Department of Gynaecology and Obstetrics
- Department of Microbiology

4.2.7 Ageing and associated diseases

This program has the priority of improving the quality of life of the elderly and promoting longevity as much as possible. The aging population is a challenge for current health systems since the population over 65 years old contributes, in a very significant percentage, to health expenditure. As life expectancy increases, so do age-associated diseases.

In this context, the concept of "healthspan" (quality of life) has emerged. The program is formed by many researchers and health professionals who consider that efforts to extend life at the expense of causing a severe physical or psychic disability are undesirable and, on the contrary, they should focus on lengthening the part of life during which we are able to maintain autonomy, independence, productivity, and well-being.

A central guiding idea in this program is that people who achieve exceptional longevity (i.e., centenarians) serve as a model of satisfactory aging. On the other hand, it is considered that the most problematic expression of the population aging is the clinical condition of frailty since an important part of the people over 65 and older fulfill several frailty criteria. Approximately one-fourth of people over the age of 85 are estimated to be frail. Frailty is a geriatric syndrome characterized by increased vulnerability to external aggressions as a result of an alteration in the physiological reserves of multiple systems, leading to difficulties in maintaining homeostasis. The program tries to identify specific molecular targets to be able to intervene concretely and rationally to improve the quality of life of the elderly.

For this, INCLIVA has an enormous advantage because of the great integration that exists, by proximity and interests, between the Hospital Clínico Universitario de Valencia and the Faculty of Medicine of the University of Valencia. This framework allows intense collaboration between basic research groups, that analyze possible biomarkers associated with healthy aging, frailty, or age-associated diseases and clinical research groups that provide biological human samples and, on the other hand, can transfer to the patient those studies that have been successfully developed at the bench.

In addition to this, INCLIVA has registered the first and only Spanish Group for the Study of Centenarians, which includes research groups working in this field distributed in different Spanish communities.

Coordinators: Dr. José Viña Ribes, Dr. Consuelo Borrás Blasco,

Dr. María Carmen Gómez Cabrera

Objectives:

- Determination of oxidative stress and inflammation parameters associated with healthy aging, frailty, and age-associated diseases
- Determination of genetic biomarkers (microRNAs, mRNAs, and SNPs) associated with healthy aging, frailty, and age-associated diseases
- Determination of epigenetic biomarkers associated with healthy aging, frailty, and age-associated diseases
- Determination of metabolomic biomarkers associated with healthy aging, frailty, and age-associated diseases
- Protocols of physical exercise and other healthy life interventions for the treatment and prevention of frailty

Research topics:

- Biomarkers of aging
- Mechanisms of aging with special attention to exceptional aging: centenarians
- Healthy aging: frailty and prevention of disability
- Intervention for successful aging: physical exercise, nutrition, molecular interventions (extracellular vesicles)
- Age-associated diseases: cardiovascular and neurodegenerative diseases
- Mitochondrial implications in age-associated frailty
- Skeletal muscle repair, exercise, frailty, and sarcopenia
- Regenerative medicine in aging and age-associated diseases

scientific activity

4.3. Research areas

INCLIVA Health Research Institute has four research areas in order to organize its scientific activity. Despite their independence, they have a common objective: meeting health needs and improving R&D&i system.

Their main aim is to establish a common reference framework to promote collaboration between INCLIVA attached researchers.

Each of the lines counts on the participation of one or several advisers from the External Scientific Committee. These lines are led by the following coordinators:

Cardiovascular Area

- **Coordinator:** Dr. Francisco Javier Chorro Gascó
- **Mission:** to contribute to the study of different aspects of cardiovascular disease (CVD) from its origins to its consequences

Oncology Area

- **Coordinator:** Dr. Andrés Cervantes Ruipérez
- **Mission:** to contribute to the study of different aspects of oncological diseases, at the stage of diagnosis and molecular characterization and selection of specific molecular targets of therapeutic interest

Metabolism and Organic Damage Area

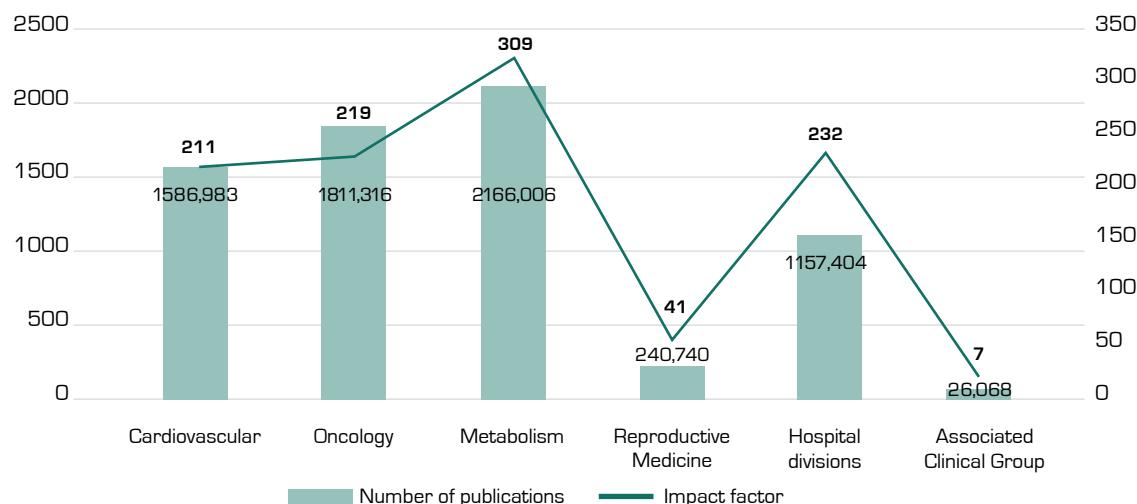

- **Coordinator:** Dr. José Viña Ribes
- **Mission:** to contribute to the study of the etiology, pathophysiology and diagnosis mechanisms or treatment of various metabolic diseases; or those that generate organ damage as a fundamental link of its trigger action

Reproductive Medicine Area

- **Coordinator:** Dr. Carlos Simón Vallés
- **Mission:** to advance in knowledge of human reproduction for translational application, improving the efficiency of assisted reproduction treatment and reducing adverse effects

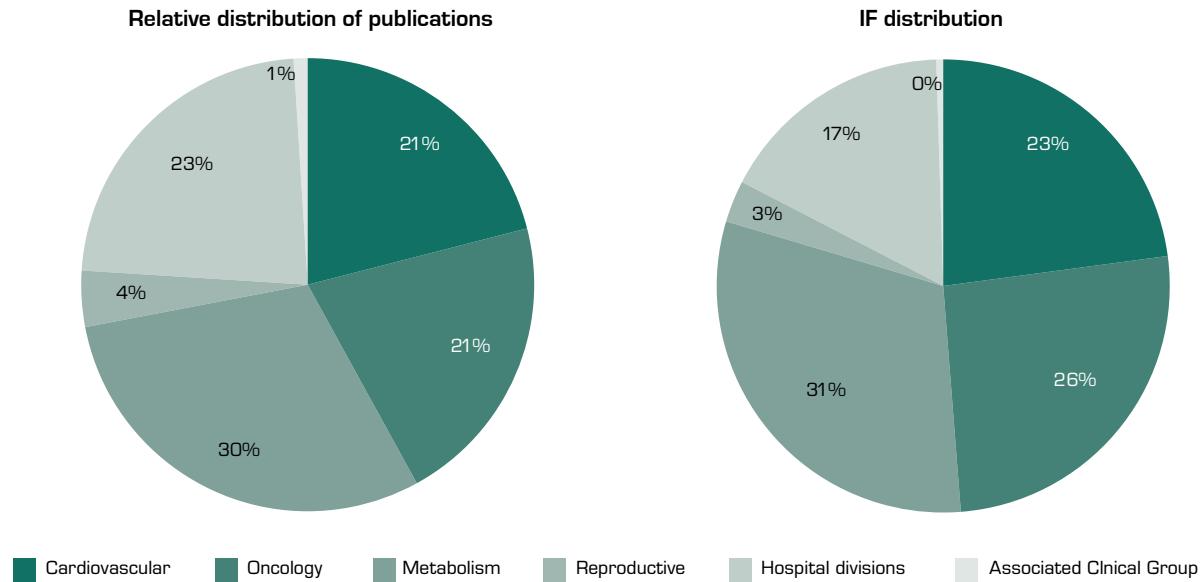

Scientific production analysis by research area

The following charts and figures summarize the main scientific activity indicators of the four areas of research and the other divisions from *Hospital Clínico de Valencia*.

4 scientific activity

Since there are some scientific articles which are shared by two or more areas, it is worth mentioning that the sum of publications by area exceeds INCLIVA's total scientific output. Additionally, the next tables shows scientific publications distribution by area in terms of number of articles and impact factor.

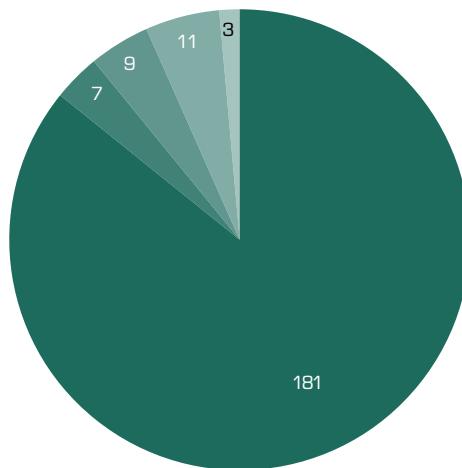

scientific activity

4.3.1 Cardiovascular area

Groups

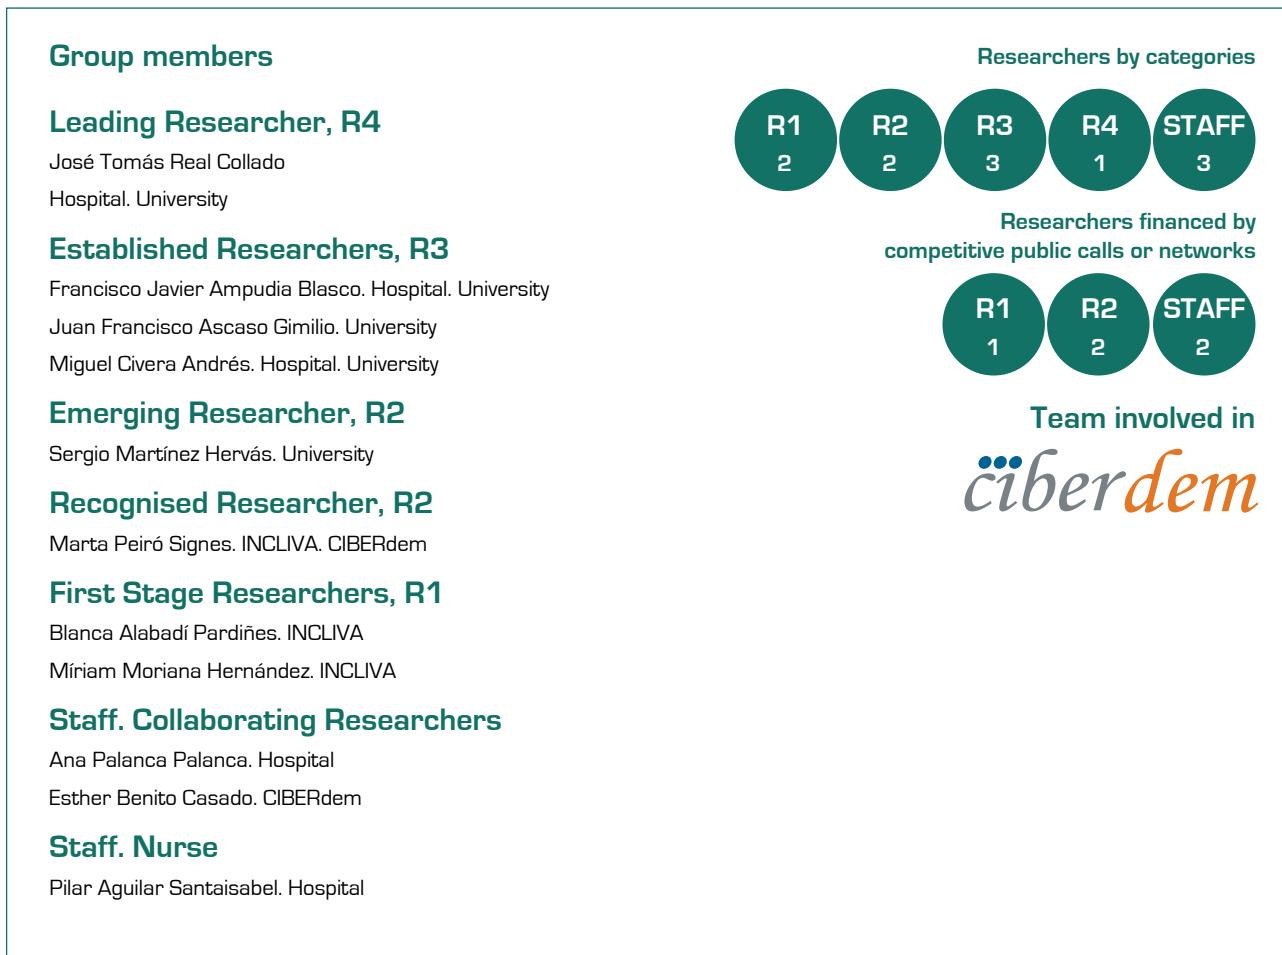

- Research Group on Cardiometabolic Risk
- Genomics and Diabetes Unit
- Research Group on Cardiac Experimental Electrophysiology
- Research Group on Endothelial Cells (LINCE)
- Research Group on Clinical Cardiology
- Research Group on the Study of Cardiovascular Risk in Children and Adolescents
- Cardiometabolic Research Group on Primary Care
- Research Group on the Study of Cardiometabolic and Renal Risk
- Research Group on Vascular Function
- Research Group on Pediatric Nutrition
- Group on Translational Research in Ischemic Heart Disease
- Research Group on Heart Failure

■ original articles ■ letters ■ editorial ■ review ■ case reports

scientific activity

Research Group on Cardiometabolic Risk Consolidated group

Strategic aims

In terms of scientific activity of the research group during 2021, our group is participating in the development of three competitive and multidisciplinary research projects that include the following aims:

- Project: Immunopharmacological modulation of the systemic inflammation associated to metabolic disorders. Search for new therapeutic targets and synthesis of novel drugs
- Project: Study of new inflammatory and angiogenic mechanisms associated to severe morbid obesity
- Project: Role of the inflammatory processes in metabolic diseases and associated complications

Main lines of research

- Role of inflammatory axes in the modulation of metabolic and vascular dysfunctions in obesity, insulin resistance and diabetes
- Primary dyslipidemias: molecular mechanisms, insulin resistance and novel therapeutic targets
- Ageing, frailty, sarcopenia and neurodegeneration in people with diabetes
- New diabetes technologies
- Pharmacogenetic-based personalized treatment in diabetes
- Applying Big Data and Artificial Intelligence technologies to analyse cardiovascular risk in dyslipidemia and diabetes

scientific activity

4

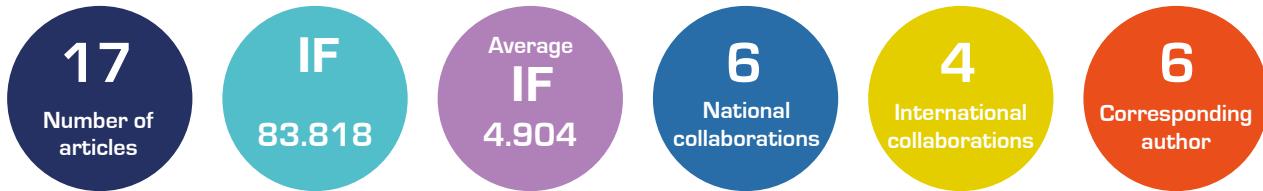

- Adipokines, inflammatory axes, new therapeutic targets and cardiovascular risk in metabolic fatty liver disease
- Body composition analysis
 - effect of body composition analysis, vascular risk and treatment in people with diabetes
 - impact of body composition analysis on prognosis, quality of life and therapeutic response in onco-haematological patients

Emerging Researcher

Sergio Martínez Hervás

The line of research is based lipid metabolism, inflammation, fatty liver, insulin resistance, and diabetes and its associated complications.

Strategic aims

- Publication of the results obtained on using the 1,4-benzothiazepine derivative JTV-519 to modify the proarrhythmogenic manifestations of mechanoelectric feedback and continuation of the programmed experimental series to analyze the effects of KN-63, carvedilol and analogues, late Na⁺ current inhibitors and the Nitric Oxide carrier S-nitrosoglutathione
- Continuation of the analysis of the effects of modifications of the basic electrophysiological properties on the processes involved in the induction and maintenance of ventricular fibrillation
- Analysis of the electrophysiological effects of chronic physical exercise and its protective effect against arrhythmias, the influence of the cardiac nervous system and mitochondrial oxidative stress and the involvement of the IKATP current
- Development of instruments for recording, processing and analysing cardiac electrophysiological signals obtained with mapping systems
- Progressive development of the experimental series aimed to study the mechanisms involved in the deterioration of the systolic function, fibrosis and the inducibility of arrhythmias in a chronic model of infarction
- Progressive development of an experimental model of metabolic syndrome to analyze the electrophysiological modifications and the inducibility of cardiac arrhythmias

Main lines of research

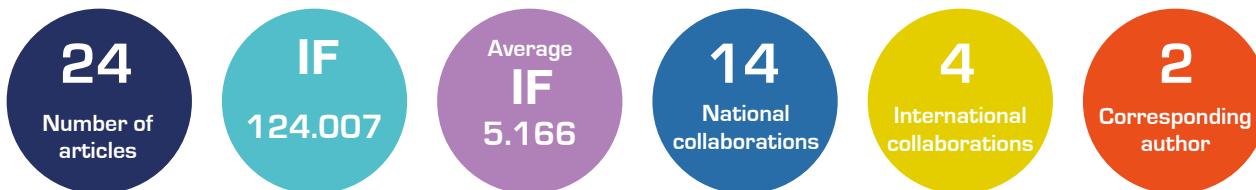

- Myocardial stretching: analysis of electrophysiological changes induced by mechanical stretching. Autocrine/paracrine influences and study of protective actions by means of drugs
- Clinical and basic research on heart failure: role of calcium homeostasis in arrhythmogenesis. Study on the effects of drugs acting on intracellular Ca²⁺ dynamics
- Analysis of the effects of modifications in basic electrophysiological properties on the processes involved in induction and maintenance of ventricular fibrillation

scientific activity

4

- Study of electrophysiological effects of chronic physical activity by: a) analysis of the protection against arrhythmias or scientific activity facilitation of its reversion; b) study of the influence of heart's nervous system and mitochondrial oxidative stress; and c) analysis of the effects on the electrical instability induced by myocardial ischemia and the implication of IKATP current
- Development and extension of tools for the registration, processing and analysing of cardiac electrophysiological signals based on multielectrodes and optical mapping systems able to analyze voltage and calcium signals
- Study of mechanisms involved in the deterioration of the systolic function, fibrosis and the inducibility of arrhythmias in a chronic model of infarction
- Study of electrophysiological modifications and inducibility of cardiac arrhythmias in an experimental model of metabolic syndrome

Beneficiary Institution: Universidad de Valencia - INCLIVA

Duration: 2021-2022

scientific activity

Research Group on the Study of Cardiovascular Risk in Children and Adolescents Consolidated group

Strategic aims

- The iPEDITEC Unit brings healthcare workers into daily contact with engineers developing software for signal capture through mobile devices. Studying the psychological parameters that facilitate personalized therapy has been a priority aim during 2021, resulting in improved treatment of obese pediatric patients in the Unit.
- The PAIDO Program is focused on personalized medical care extended through initiatives involving family, educators, nutritionists, physical education teachers and other social agents. Treatment goes beyond the hospital setting to include the child's environment and personal sphere and is supported by state-of the art artificial intelligence technologies
- To improve the knowledge of fetal life and postnatal growth on the development of cardiometabolic risk factors early in life. The KITE cohort is a prospective study starting at birth and assessing the determinants of cardiometabolic risk factors in the first decades of life. Omics data from umbilical cord are available and the analysis of the interaction between clinical data and omics may help to introduce actions in critical periods of life and the potential contribution to reduce cardiometabolic disease later in life. Mrs. Lurbe is the coordinator of the new document of the European Guidelines on Arterial Hypertension in Children and Adolescents

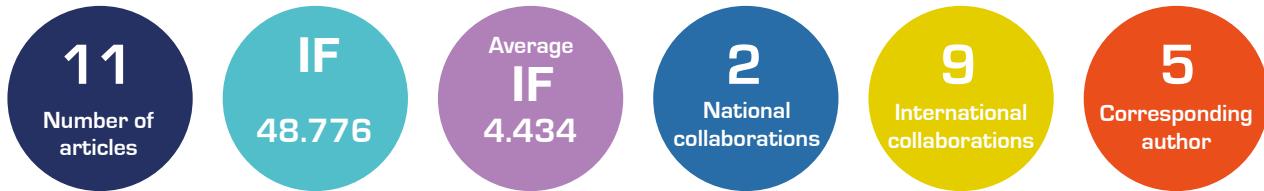

Main lines of research

- New technologies applied to the detection of congenital heart diseases and sepsis in asymptomatic newborn babies
- Childhood obesity: new insights in the personalized treatment: study of the cardiorespiratory capacity
- New technologies applied to the treatment of obesity: physical exercise preventing and treating obesity
- Arterial hypertension in children and adolescents
- Cardiovascular and renal risk in diabetes

scientific activity

- Early origins of cardiometabolic risk factors assessed in a prospective study starting at birth (Cohort KITE)
- HyperChildNET: European Network for Research on Blood Pressure in Children and Adolescents

scientific activity

Research Group on the Study of Cardiometabolic and Renal Risk Consolidated group

Emerging Researcher

Raquel Cortés Vergaz

The main objective of this new field of research is to study the molecular mechanisms associated with the development of early kidney damage due to hypertension and diabetes, focusing on the characterization of extracellular vesicles and their roles as intercellular mediators. In addition, a new line of research has been opened in kidney damage associated with systemic lupus erythematosus, autoimmune disease, and the role of extracellular vesicles as diagnostic, prognostic and monitoring biomarkers of disease activity

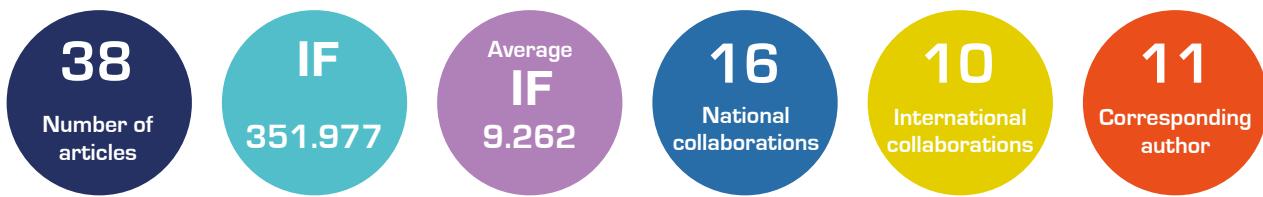

scientific activity

Main lines of research

- Analysis of podocytes -renal proximal tubular epithelial cell communication as key player in kidney damage progression [miRNAs and exosomes]
- Impact of cardiovascular risk factors and renal function in absolute morbidity and mortality in high-risk population and in the general population
- Inflammation and oxidative stress in the development of cardiovascular disease
- Genomics, proteomics and metabolomics of early cardiometabolic and renal disorders
- Impact of environmental toxins (metals) in cardiometabolic risk
- Identification of polymorphisms and related to the control of BMI and waist circumference and the risk of obesity genes
- Venous thrombosis in young patients: factors associated with its development
- The relationship between risk of venous thromboembolic disease and arteriosclerosis
- Molecular mechanisms associated with activity changes and renal damage development in systemic lupus erythematosus

Strategic aims

Cardiovascular area:

- Study of metabolome and microbiome in obese children with/without insulin resistance before and after personalized nutritional intervention and physical exercise

Area of human milk:

- Characterization of mother-infant microbiome in term and preterm infants. Influence of perinatal variables

Area of hospital malnutrition and artificial nutrition:

- Validation of the pediatric screening tools for detecting the risk of malnutrition linked to chronic disease and pediatric hospitalization

Main lines of research

Cardiovascular area:

- Analysis of microbiota in obese children before and after intervention
- Analysis of metabolome in obese children with/without insulin resistance
- Monitoring exercise and energy consumption in obese schoolchildren and teenagers to adjust nutritional intervention

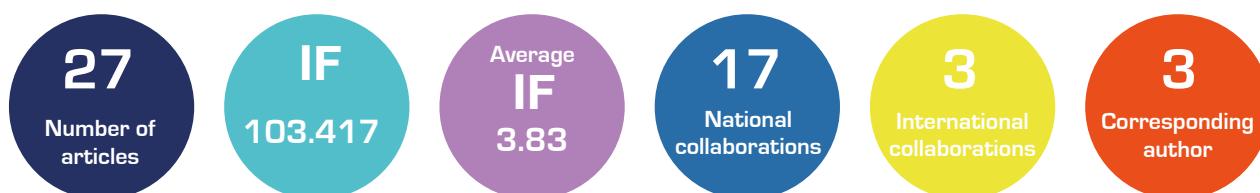

Area of human milk:

- Analysis of nutritional and bioactive components in human milk: influence of genotype FUT2 on oligosaccharides
- Analysis of mother-fetal microbiome in term and preterm infants. Influence of delivery mode, maternal diet and development. Impact on host response and intestinal function

Area of hospital malnutrition and artificial nutrition:

- Validation of the pediatric screening tools for detecting the risk of malnutrition
- Multicenter study of acceptance and quality of life in children treated with home enteral nutrition

Strategic aims

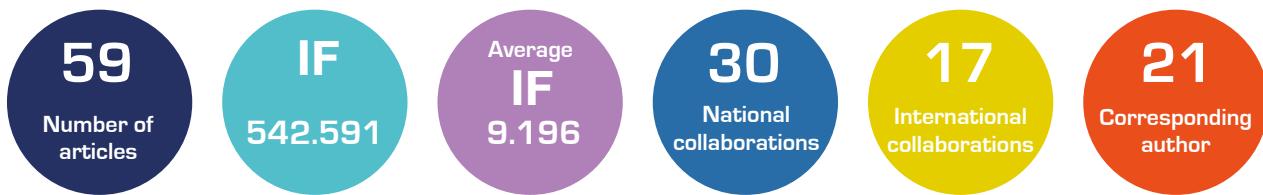

- Phenotypic characterization of heart failure syndrome
- Deepen into pathophysiological mechanisms in the different phenotypes of the disease
- Development of tools to improve the diagnostic process of heart failure
- Risk stratification in patients with acute and chronic heart failure
- Evaluation of different therapeutic and monitoring strategies that allow improving the prognosis of heart failure

Main lines of research

- Effect on functional capacity of withdrawal of beta-blockers in patients with heart failure and preserved ejection fraction and chronotropic incompetence
- Myocardial effects of iron repletion
- Prevalence and clinical implications of frailty in heart failure
- Usefulness of the carbohydrate antigen 125 marker in the evaluation of congestion and a guide to titrate diuretic treatment
- Effect of dapagliflozin on functional capacity in patients with heart failure and reduced ejection fraction
- Utility of continuous ambulatory peritoneal dialysis in the treatment of patients with heart failure and reduced ejection fraction
- Usefulness of intrarenal Doppler to evaluate intrarenal congestion and its clinical significance

Strategic aims
The group obtained funding to continue working on to the line of Tissue Engineering with new projects:
<ul style="list-style-type: none"> • Bone regeneration in prosthetic implants. Biological processes conditioned by age and gender. Design of new biomaterials • Biomimetic microgels for the study of the tumor microenvironment (TME) and the mesenchymal epithelial transition (EMT) in lung cancer • Cartilage and bone regeneration techniques and their application in pathologies
Main lines of research
<p>Regenerative Medicine:</p> <ul style="list-style-type: none"> • Study of articular cartilage regeneration • Study of bone regeneration. Effect of age and gender on the regeneration process

scientific activity

- Study of the use of dental pulp cells as precursors in regenerative therapies
 - Study of regeneration of dental and periodontal tissues
 - Study of tumor microenvironment using biomimetic microgels
- Histopathology:
- Study of ciliary pathology

Strategic aims

Our group aims to improve the patient's life through the development of new diagnostic and therapeutic methods. In addition to this main goal, we intend to implement strategies to facilitate the development of precision medicine in solid tumors with innovative therapeutic approaches and provide knowledge on how to approach precision medicine in colorectal and gastric cancer from different points such as molecular classification, the use of predictive biomarkers and new therapeutic approaches.

Main lines of research

- To develop first-in-human Phase I trials of antineoplastic agents with innovative designs
- To develop liquid biopsies [ctDNA, cmicroRNAs] for early diagnosis, monitoring and the prediction of therapeutic effects in patients with gastro-intestinal malignancies
- To use the latest technologies to improve our knowledge of the molecular and genetic causes of cancer
- To implement the use of organoids (3D cell cultures) from patients as functional models, in order to understand the underlying causes of tumorigenesis and to test the appropriateness of the treatments

Emerging Researchers

Noelia Tarazona Llaver

Our scientific interests are based on the use of liquid biopsy with the use of circulating tumor DNA in plasma to detect minimal residual disease and its association with survival, identify mechanisms of progression and resistance to therapy and identify new therapeutic targets. Likewise, the use of circulating tumor cells to characterize minimal residual disease and the establishment of organoids from the tumor and circulating tumor cells of patients with localized colon cancer and the study of new biomarkers

Tania Fleitas Kanonnikoff

Our scientific interests are based on the understanding of the tumor immune microenvironment of Gastric Cancer. Moreover, we are also focused on the study of the clinical-epidemiological-molecular characteristics of patients with young gastric tumors under 50 years of age, the study of the clinical-pathological-molecular characteristics of patients diagnosed with advanced Her2-positive Gastric C resistant to trastuzumab and the observational study of the clinical-epidemiological-molecular characteristics of patients diagnosed with gastric cancer from European and Latin American cohorts

THESIS

Thesis title: Multi-omic characterization of advanced colorectal cancer patients derived organoids in the context of Precision Medicine

Doctoral candidate: Federica Papaccio

Director(s): Andrés Cervantes Ruipérez, Josefa Castillo Aliaga

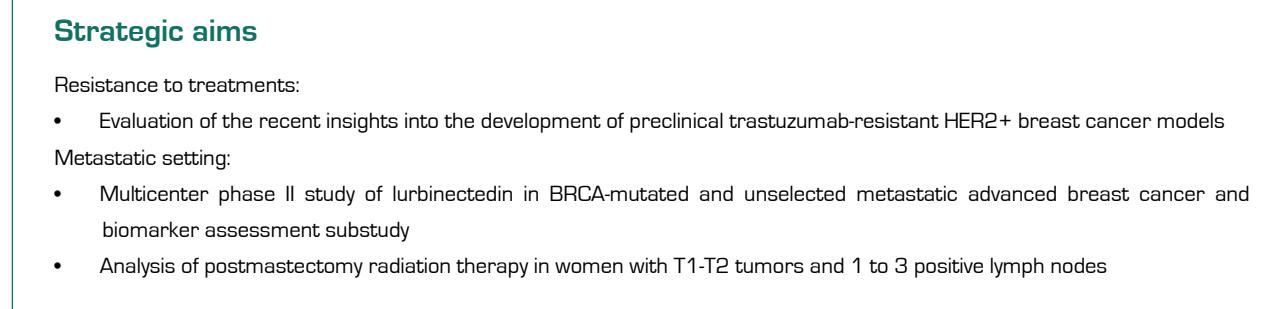

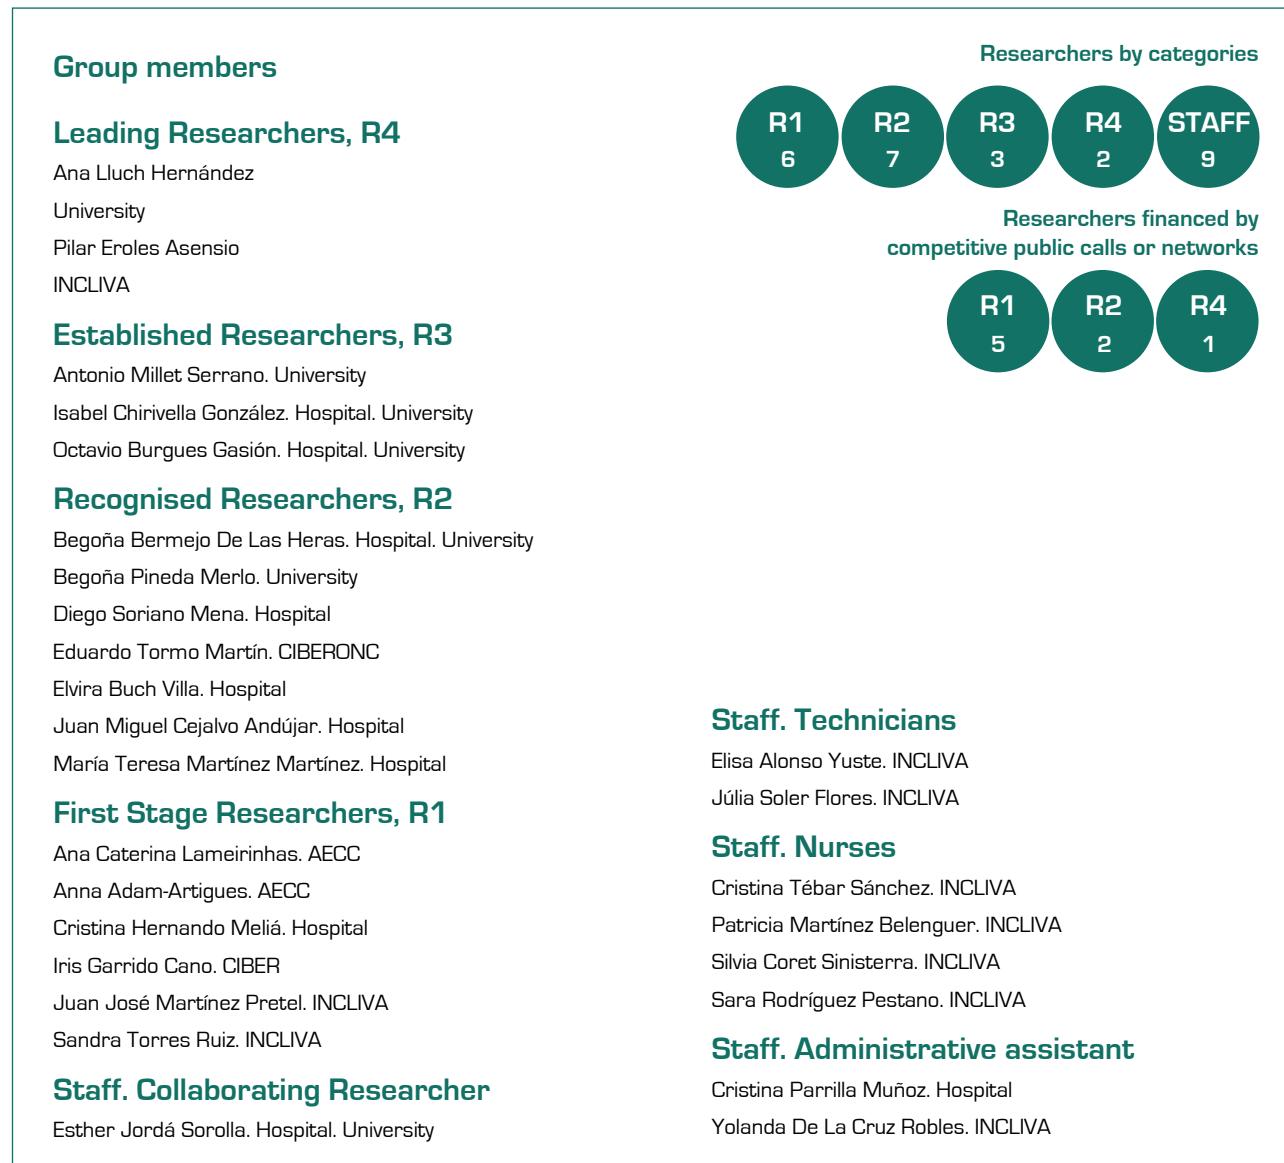

Date of the defense: 23/12/2021

Grade: Sobresaliente "cum laude"

Quality recognition/Award: European PhD

scientific activity

Research Group on Breast Cancer Biology Consolidated group

scientific activity

ER+ breast cancer:

- Evaluation of the outcomes of single versus double hormone receptor-positive breast cancer
- Description that the ER+ breast cancers resistant to prolonged neoadjuvant letrozole exhibit an E2F4 transcriptional program sensitive to CDK4/6 inhibitors
- Design of adjuvant endocrine therapy for premenopausal breast cancer

Breast cancer in very young women:

- Identification of miR124-2 as a survival biomarker by methylation deregulation of its promoters
- Review of breast cancer in pregnant patients

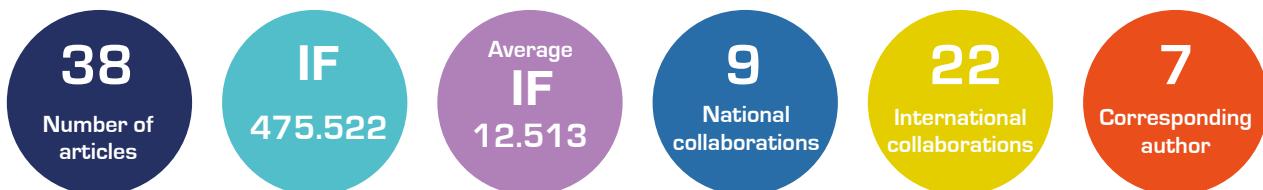

Prognostic and prediction:

- Prognostic role for the derived neutrophil-to-lymphocyte ratio in early breast cancer
- Evaluation of the pathologic complete response rate to neoadjuvant chemotherapy in triple negative breast cancer subtypes
- Study of the incidence, characteristics, and prevention of the alopecia following adjuvant docetaxel
- Molecular characterization of oligometastatic breast cancer patients

Main lines of research

- Evaluation of microRNAs and mRNAs differentially expressed after chemotherapy treatment
- Involvement of miRNAs and other epigenetic regulations in breast cancer processes
- Role of tumor heterogeneity and dynamic reprogramming of tumor cell resistance to anti-HER2 therapy
- Evaluation of the involvement of stem cells and epithelial mesenchymal transition in the mechanisms of resistance to treatment in HER2 + breast cancer
- Primary and secondary resistance in HER2 + breast cancer: search for new treatments
- Interaction between estrogen receptors, tumor angiogenesis and breast cancer metabolism
- Molecular and Clinical characterization of breast tumors from very young women
- The role of AXL in trastuzumab-resistant breast cancer

scientific activity

Translational Research Group on Pediatric Solid Tumors Consolidated group

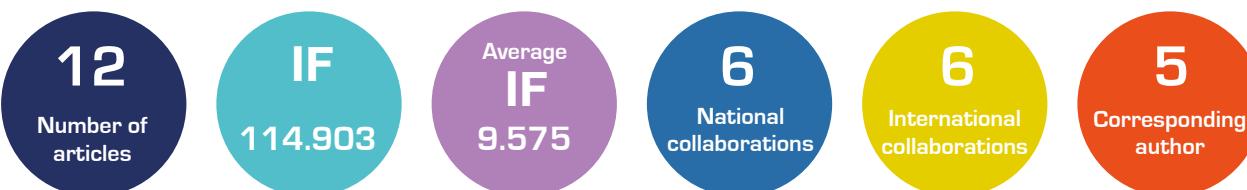

Strategic aims

- Genomic heterogeneity in neuroblastoma (NB), especially in MYCN amplification
- Xenotransplant models of NB
- Importance of extracellular matrix and vascularization in NB
- Morphological and molecular analysis of neuroblastic and malignant infantile skeletal tumors

Main lines of research

- Genetic analysis in neuroblastoma. At the European level, we participate in the establishment of a uniform nomenclature, and standard practices and quality validation studies, essential to obtain and maintain high quality in genetic results used for therapeutic stratification
- Identification of new genetic factors with prognostic value in neuroblastic and malignant infantile skeletal and soft tissue tumors
- Histopathologic studies of the expression of diagnostic and prognostic markers in solid pediatric tumors
- Tumor microenvironments in low prevalence tumors
- Preclinical models. Obtaining and characterizing cell lines in vivo and in vitro (2D and 3D) from fresh neuroblastic and malignant infantile solid tumor material

Emerging Researchers

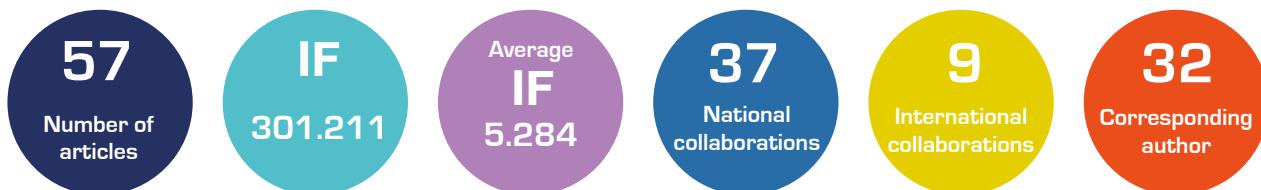

Estela Giménez Quiles

The main objective is the study of the dynamics of the composition and of the viral load of the main components of the human plasma virome as a predictor of functional immunity in the context of allogeneic transplantation of hematopoietic progenitors

Eliseo Alejandro Albert Vicent

The main objective is the study of infection in immunosuppressed patients, particularly in Cytomegalovirus and Alphaherpesvirus infection in patients undergoing allogeneic hematopoietic stem cell transplantation

Strategic aims
<ul style="list-style-type: none"> During the year 2021, we were able to deepen the knowledge of the role of the NOTCH1/FBXW7/PI3K/PTEN/AKT signaling pathway in the progression of Chronic Lymphocytic Leukemia B (CLL-B) to advanced forms. Thus, in the cell lines and in the patient's primary cells, we observed a variation in the number of gene copies by both FISH and PCRq in the NOTCH1, FBXW7 and PTEN genes, with an inverse relationship between NOTCH1 and FBXW7/PTEN A second objective has been to analyze the clinical significance of the rearrangements of MYC, BCL-2 and BCL-6 in diffuse large cell lymphoma. We have been able to verify that patients with concomitant C-MYC and BCL-2 protein expression present a worse prognosis in terms of SLP and Sg than the rest Thirdly, during 2021, the study of the mutational status of IgVH in CLL and its prognostic impact in a wide series of patients has been implemented. New molecular markers (mutations TP53, BIRC3, MYD88, NOTCH1 and SF3B1) have also been studied in CLL by new generation sequencing techniques. In addition, we have continued the collaboration in the GENOMA CLL sequencing project, with a clinical-evolutionary update Finally, we have expanded our participation in clinical research projects in CLL, refractory lymphomas and multiple myeloma, both with the incorporation of new drugs and in the design and development of new therapeutic options
Main lines of research
<ul style="list-style-type: none"> Analysis of the interactions of CLL cells with their cellular microenvironment: further study of the intracellular mechanisms triggered by VEGF. Analysis of the possible correlation with CXCR4/CCR7 cytokines pathway. Transactivation mechanisms of the aforementioned receptors Role of the NOTCH1/FBXW7/PI3K/PTEN/AKT signaling pathway in the progression of Chronic Lymphocytic Leukemia B (CLL -B) to advanced forms: pathway molecular profile analysis in 100 patients with CLL-B of primary cells obtained at diagnosis and at the time of the progression, analyzing for this, the presence of mutations and number of copies of DNA, gene expression, FISH and (RT-PCR)

- Study of the rearrangements of bcl-2, bcl-6 and MYC in diffuse large cell lymphoma: clinical significance and correlation with immunohistochemical expression using FISH and IHQ techniques
- Study of new molecular markers (mutations of IgVH, TP53, BIRC3, MYD88, NOTCH1 and SF3B1) in CLL: conventional versus NGS techniques. Implication in clonal evolution associated with tumor progression
- New therapeutic options for CLL/MM patients who are resistant to chemoimmunotherapy

Strategic aims

- Analyse of the risk factors for thrombosis in myelofibrosis
- Analyse patients diagnosed with myelodysplastic syndromes with 20q deletion and del[20q]. Assess the incidence, prognostic value and impact on response to azacitidine of azacitidine
- Analyse in patients diagnosed of acute myeloid leukemias and del[7q] the incidence, prognostic value and potential as a therapeutic target of chromosomal deletions of the EZH2 gene and of genetic mutations alterations and other genetic mutations

Main lines of research

- Study of mechanisms involved in leukemic transformation in myeloproliferative neoplasms
- Study of risk factors for thrombosis in myelofibrosis
- Study of acute myeloid leukemias with 7q deletion
- Study of myelodysplastic syndromes with 20q deletion and del[20q]
- Collaborative studies with the CETLAM group (LMA, SMD), PETHEMA (LLA, LMA), the Spanish Philadelphia-negative chronic myeloproliferative disorders group (GEMFIN), the Spanish LMC group (GELMC) and the Spanish SMD group (GESMD)

THESIS

Thesis title: *Estudio metabolómico de la interacción huésped-microbiota intestinal en la enfermedad cardiometabólica. Detección temprana, prevención y tratamiento*

Doctoral candidate: María Mercedes Pardo Tendero

Director(s): Daniel Monleón Salvadó, Vannina González Marrachelli

Date of the defense: 25/06/2021

Grade: Sobresaliente "cum laude"

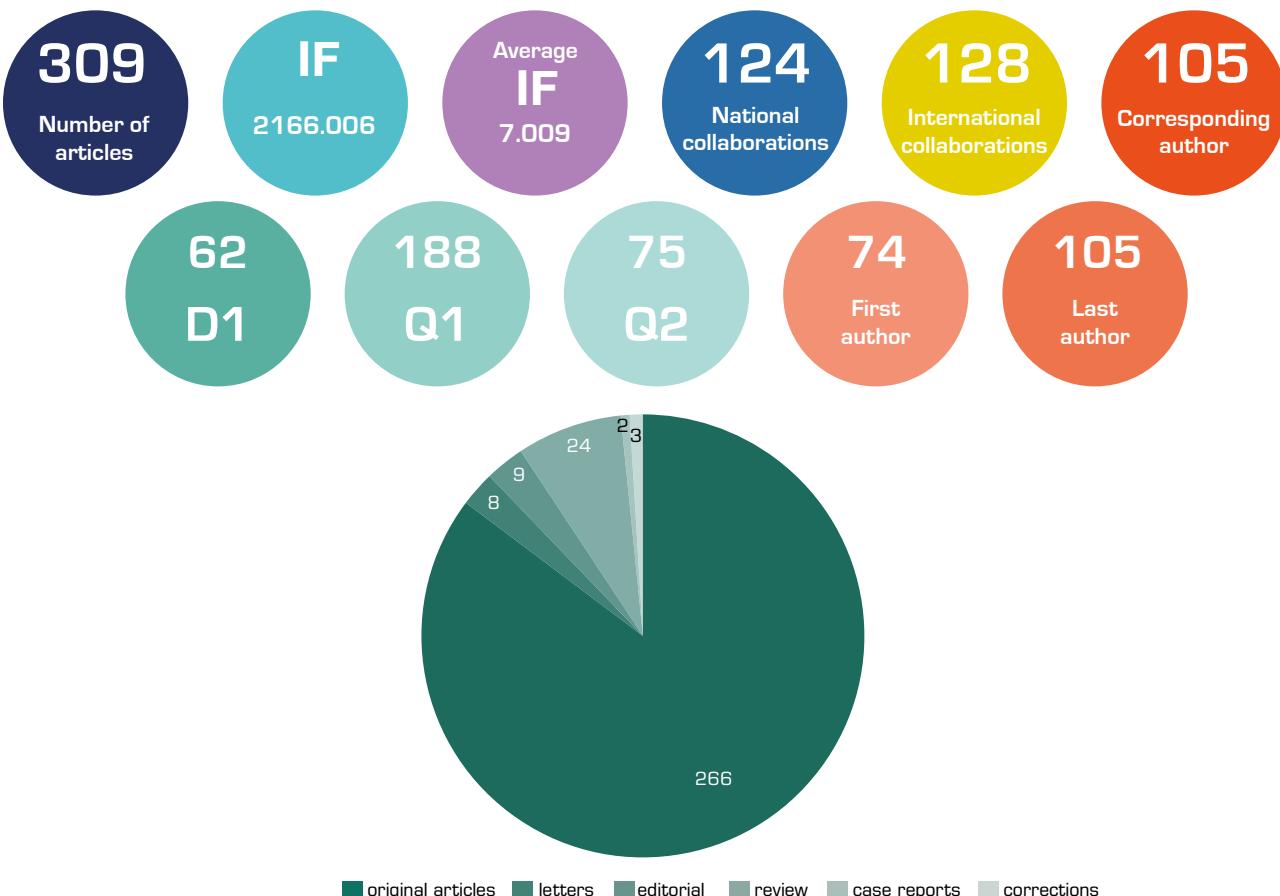

Quality recognition/Award: European PhD

Strategic aims

- Evaluation of cognitive and motor alterations in patients with liver cirrhosis and minimal hepatic encephalopathy (MHE)
- To characterize the inflammatory processes and create a bioinformatic model of the molecular and cellular events of the immune system associated to the onset of MHE. Assess its utility to predict or diagnose MHE
- To analyse cerebral alterations: visual evoked potentials; neuronal connectivity using functional magnetic resonance
- Analysis of alterations in thermal and mechanical sensitivity and in peripheral nerve conduction velocity
- Assess the utility of the analysis of eye movements for early diagnosis of MHE
- Assess the effects of rifaximin treatment on the alterations analysed in the above objectives
- To identify procedures based on above results, which improve diagnosis of MHE

Main lines of research

- Main Line of research: Characterization of neurological and cerebral alterations in patients with minimal hepatic encephalopathy (MHE). Mechanisms: Contribution of inflammation. Diagnostic and therapeutic implications. Sublines:
- Characterization of cognitive, functional and cerebral alterations in patients with minimal hepatic encephalopathy
 - Characterize alterations in inflammation, neuroinflammation, brain function and structure associated with the onset of MHE
 - Identify biomarkers for the early detection of mild cognitive impairment in MHE

scientific activity

- To assess the effects of rifaximin treatment and new treatments: mechanisms involved
- Identification and modelling of molecular and cellular events of the immune response associated to the appearance of minimal hepatic encephalopathy in cirrhotic patients
- To assess the usefulness of eye movement analysis for the early diagnosis of MHE
- Research on cognitive and motor alterations in patients with non-alcoholic fatty liver disease showing mild cognitive impairment (MCI)

Strategic aims

- Study of intracellular mucin MUC1 in lung fibrosis
- Study of the anti-inflammatory effects of AZD8999, a novel bifunctional muscarinic acetylcholine receptor antagonist / β 2-adrenoceptor agonist (MABA) in COPD patients
- Study of MUC1 deficiency in corticosteroid insensitivity in asthma
- Study of the systemic inflammation associated to Primary Hypercholesterolemia and Metabolic Syndrome
- Study of the CCL11/CCR3 axis in Primary Hypercholesterolemia and atherosclerosis
- Study of the impact of PCSK9 blockade in the systemic inflammation associated to Familial Hypercholesterolemia
- Synthesis of new dual PPAR α/γ agonists and pharmacology study in ob/ob mice
- Synthesis of new dual LXR/PPAR α/γ agonists and pharmacology study in ob/ob mice

Main lines of research

- Pharmacological modulation of chronic inflammation and remodeling in the context of chronic obstructive pulmonary disease, asthma and idiopathic pulmonary fibrosis
- Study of the vascular inflammation induced by different risk factors of atherosclerosis: metabolic syndrome, primary and familial hypercholesterolemia. Effect of PCSK9 inhibitors in the systemic inflammation associated to familial hypercholesterolemia
- Synthesis of new dual PPAR α/γ agonists to be used in the control of cardiometabolic disorders
- Synthesis of new dual LXR/PPAR α/γ agonists to be used in the control of cardiometabolic disorders

scientific activity

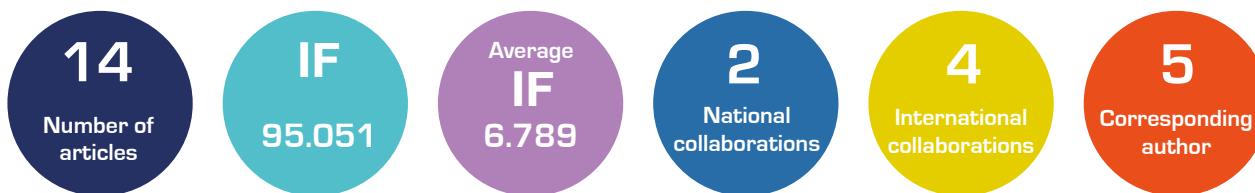

4

Emerging Researcher

Nuria Cabedo Escrig

In the field of medicinal chemistry, the research is focused on the development of new synthetic molecules, analogues of natural products, with potential effect to regulate lipid metabolism, glucose homeostasis, dopaminergic pathway and inflammatory processes in order to treat cardiometabolic disorders and neurological diseases. We are working in the hit-to-lead strategy on therapeutic targets such as peroxisome proliferator activating receptors (PPAR), liver X receptors (LXR), dopaminergic receptors, and pro-inflammatory cytokines

Research Group on Psychiatry and Neurodegenerative Diseases Consolidated group

Strategic aims

- Elaboration of a mobile application associated to the Clinical Records to improve adherence to the treatment of patients with first episode psychosis
- Publication of Results of Gene-Environmental interaction First Episode Psychosis projects
- Development of new techniques to diagnosis psychosis by fMRI and machine learning approach
- Development of animal models in severe mental disorder and neurodegenerative diseases
- Models of prediction of response in first psychotic episodes
- Identification of genetic and epigenetic modifiers and molecular targets in Friedreich's Ataxia

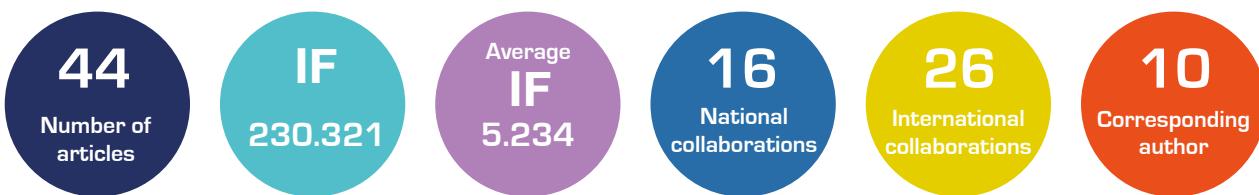

Main lines of research

- Identifying risk polymorphisms in psychosis and affective disorders
- Epigenetic studies (functional expression) of candidate genes in psychosis and mental illness
- Study on animal models in serious mental illness

scientific activity

- Generating Studing models of neurodegenerative diseases (Friedreich Ataxia) on invertebrate animals (*Drosophila*)
- Study of mutations in monogenic neurodegenerative diseases
- Identifying genetic and environmental risk factors in affective and psychotic disorders
- Identifying abnormal patterns in neuroimaging (morphometry, functional, spectroscopy) in psychotic patients
- Design and coordination of clinical, genetic and neuroimaging data bases oriented to performing multicenter projects
- Development of interactive systems for improving therapeutic adherence
- Study on the efficiency of psycho-social intervention techniques in serious mental illness

scientific activity

4

Strategic aims

- Study of respiratory complications in patients with neuromuscular diseases. Utility of mechanical ventilation and other respiratory supports
- Implication of early diagnosis of obstructive airway diseases in the prognosis and follow-up of patients. Emphysema early detection program. Program for early detection of Alpha 1 Antitrypsin Deficiency
- Early follow-up program for COPD with exacerbator phenotype
- Severe Asthma control program
- Control of respiratory disorders during sleep as prevention of cardiovascular risk factors
- Early diagnosis of idiopathic interstitial respiratory diseases (IPF) and secondary diseases (drug toxicity and post-BMT)

Main lines of research

- Usefulness of non-invasive ventilation in the weaning process of patients with prolonged mechanical ventilation
- Improve the effectiveness of mechanically assisted cough procedures in patients with ALS, as well as the precision of the clinical tools available to evaluate frontotemporal dementia in them
- Study in smokers of the early stages of COPD. GOLD classification paradigm 0
- Identify cardiac morphological changes in patients with sleep-disordered breathing and ischemic heart disease treated with CPAP
- Follow-up of patients admitted for bilateral COVID19 pneumonia: changes in pulmonary function tests for the early diagnosis of pulmonary fibrotic sequelae
- Study of oxidative stress and inflammatory mechanisms underlying acute lung damage caused by SARS-CoV-2

scientific activity

Research Group on Aging and Physical Activity Consolidated group

Strategic aims

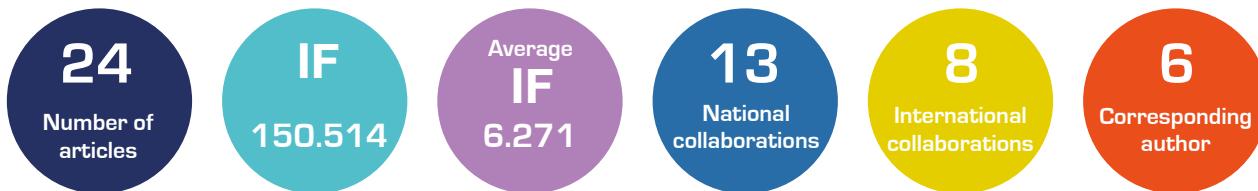

- Regenerative medicine in aging
- Identification of physical training as a drug to treat age-related frailty
- Prove that G6PD protects against oxidative damage and improves lifespan in mice
- Reducing stress: a new concept in disease Alzheimer's

Main lines of research

- Aging: identification of genes associated with aging, particularly genes that are specific in centenary people. Implication of the estrogens and phytoestrogens in the prevention of age-related damage
- Physical activity: identification of the molecular mechanisms by which physical activity is good for health. Identification of the mechanisms by which physical activity and antioxidant supplements help preventing primary and secondary sarcopenia in both human and animal studies. Identification of the best exercise intervention to delay and to treat frailty in humans
- Physiopathology of the Alzheimer's disease: identification of the mechanisms by which free radicals, originators of the oxidative stress are used to unleash cell signals that lead to cell death in Alzheimer disease

Strategic aims

- The effects of advanced monitoring and drugs on hemodynamic management in patients undergoing surgery
- Open Lung Approach for the Acute Respiratory Distress Syndrome
- Study and development of methods of detection of infections
- Development of new strategies and drugs for pain treatment

Main lines of research

- Oxidative stress and protection of organs in ischemia-reperfusion surgery
- Ventilatory and pharmacological strategies to decrease organ damage in the lungs associated with mechanical ventilation in healthy and injured lungs
- Development of hemodynamic monitoring and its application in the field of patients undergoing surgery or admitted to critical care units
- Study and development of methods of detection of infections, especially fungal and virological, and how to prevent them

- Study and development of therapeutic drug monitoring (TDM) to describe antimicrobials pharmacokinetics (PK) and determination of minimum inhibitory concentration (MIC)
- Development of new strategies and drugs for pain treatment
- Development of new strategies and monitoring for Traumatic Brain Injury
- Neurocritical patients
- Delirium
- Critically ill patients with COVID-19
- Organ donation
- Using PK/PD to optimize antibiotic dosing for critically ill patients
- Sepsis and septic shock management

Strategic aims

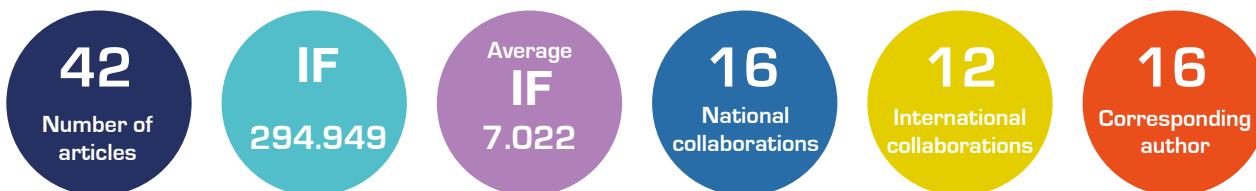

- Research about the incidence of pandemic COVID19 on surgery
- Development of 3D modelling for hepatic and pancreatic tumours
- Research about the influence of postoperative complications on the oncologic outcome of metastatic disease
- Development of a protocol for the outpatient treatment of hyperparathyroidism
- Research about the revisional techniques within the bariatric surgery

Main lines of research

- Coloproctology: quality standards for coloproctology, 3D endorectal ultrasound, sacral neuromodulation and perianal fistula surgery

- Hepato-bilio-pancreatic surgery: acute pancreatitis, gene transfection, pancreatic-duodenectomy
- Endocrine surgery: laparoscopic adrenal tumors, parathyroid adenomas intraoperative localization, ambulatory surgery in hyperparathyroidism
- Bariatric surgery: pathophysiology of postoperative changes after bariatric surgery
- Breast surgery: fibrin sealants in seroma. Selective sentinel node biopsy. Axilla assessment in DCIS
- Gastroesophageal surgery: mutations in GIST tumors, overexpression of HER2 and HER3 in gastric tumors, perioperative QT in advanced gastric cancer, preoperative gastric arteries embolization in esophageal surgery, PIPAC technique in carcinomatosis surgery

Research Group on Cellular and Organic Physiopathology of Oxidative Stress Consolidated group

Strategic aims

- Remarkable achievements are the extension to PCT phase of the European patent "Mass spectrometry-based methods for the detection of circulating histones H3 and H2B in plasma from sepsis or septic shock (ss) patients" (PCT/EP2017/078362)
- Development of new therapies for the treatment of neuromuscular diseases
- Development of new therapies for the treatment of neurodegenerative diseases

Main lines of research

- Pathophysiology of Friedreich's Ataxia and other neuromuscular diseases
- Development of new therapeutic strategies for Friedreich's Ataxia
- Development of new biomarkers in both adult and neonatal sepsis
- Epigenetic regulation in the pathophysiology of rare diseases
- Epigenetic regulation of immunosuppression events in patients from Intensive Care Units

Emerging Researcher

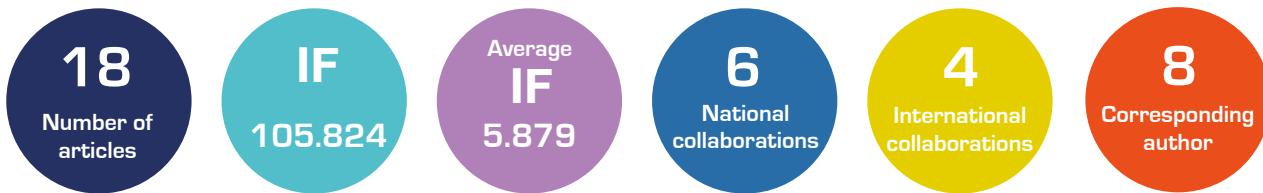

Juan Antonio Navarro Langa

Our scientific interests are focused on deciphering the programmed death mechanism followed by cells in Friedreich's Ataxia patients using *Drosophila melanogaster* models. With Filippo Santorelli (University of Pisa), he is establishing a translational platform using *Drosophila* to model hereditary spastic paraparesis.

Strategic aims

- Identification of new mechanisms involved in angiogenesis and inflammation in obese patients:
 - Study and characterization of the role of the CCR4 receptor and its ligands CCL17/TARCE, CCL22/MDC and CKLF1 in angiogenesis and inflammation associated with obesity and in response to bariatric surgery
 - Characterization of the role of constitutive nuclear receptors for androstane [CAR] in endothelial dysfunction and angiogenesis associated with obesity and in response to bariatric surgery
- Identification of new mechanisms involved in angiogenesis and inflammation in acute myocardial infarction. Role of the antiangiogenic isoform VEGF165b:
 - Determination of VEGF-A165b levels in patients with STEMI and its relationship with microvascular obstruction
 - To study the effects of the neutralization of the VEGF-165b isoform in a mouse model with acute myocardial infarction
- Study of the role of the SGLT2 transporter in the development of abdominal aortic aneurysm:
 - To evaluate the effect of empagliflozin, an SGLT2 inhibitor, in an animal model of abdominal aortic aneurysm and to investigate the possible anti-inflammatory effect of empagliflozin on endothelial dysfunction

Main lines of research

- Identification of new mechanisms involved in angiogenesis and inflammation in obese patients. Role of CCR4 chemokine receptor ligands and constitutive nuclear androstane receptors
- Identification of new mechanisms involved in angiogenesis and inflammation in acute myocardial infarction. Role of the antiangiogenic isoform VEGF165b
- Study of the SGLT2 transporter in the development of abdominal aortic aneurysm

scientific activity

Research Group on Rare Respiratory Diseases (RRD) Emerging group

Strategic aims

- We have shown that NK and lymphocytes B express and secrete alpha-1 antitrypsin
- We have discovered a group of miRNAs that could be used for the diagnosis and prognosis of alpha-1 antitrypsin deficiency.
We are currently validating these results using an external cohort
- A new method based on oxidative stress markers to identify patients with Primary Ciliary Dyskinesia has been set up
- We have set up the high-speed video method to identify patients with Primary Ciliary Dyskinesia
- We have shown that hypoxia modifies neutrophil degranulation and enhances oxidative damage in alpha-1 antitrypsin deficiency patients

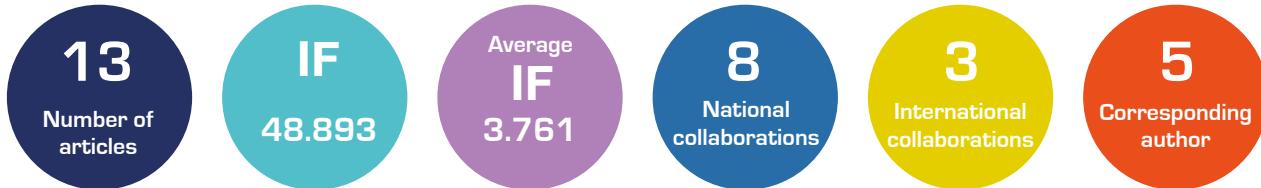

Main lines of research

- The group is currently conducting active basic research on two rare respiratory diseases (RRDs): Alpha-1 Antitrypsin Deficiency (AATD) and primary ciliary dyskinesia (PCD)
- The specific lines of action of the group are:
 - To characterize the molecular mechanisms (especially those aspects related to REDOX regulation) involved in the development of disease in AATD and PCD
 - To evaluate the diagnostic and/or prognostic value of circulating nucleic acids in plasma/serum
 - Development of cellular models from cells of patients with RRD, which allow research in these diseases
 - To develop new therapeutic strategies based on gene therapy
 - To generate social awareness of RRD, through the scientific dissemination of biomedical advances and social and health policies aimed at improving the quality of life of patients

scientific activity

Research Group on Healthy Aging Emerging group

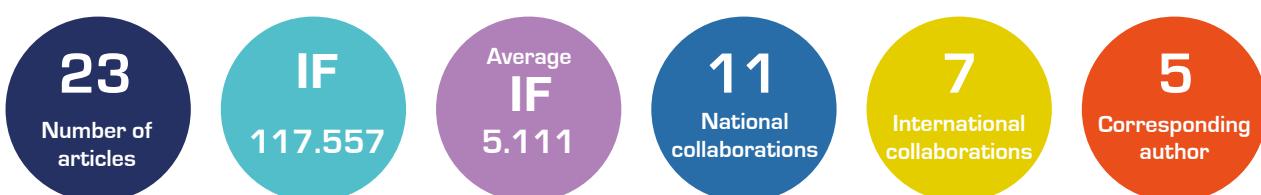

Strategic aims

- To know the molecular mechanisms involved in aging and frailty processes
- To develop possible methods to evaluate them
- To develop appropriate intervention strategies
- To determine an index of quality of life in experimental animals
- To develop human imaging biomarkers for the diagnosis of frailty
- To study interventions to delay aging and prevent frailty:
 - Therapy with small extracellular vesicles
 - Role of the antiapoptotic gene Bcl-xL

Main lines of research

- Development of a quality of life index (healthy aging) in experimental animals (derived from intervention studies in aging)
- Development of image biomarkers in the diagnosis of frailty:
 - Fragility biomarkers based on ultrasound image analysis (echointensity, fractals, textures)
- Interventions for healthy aging:
 - Stem cell derived extracellular medicine (based on previous studies on stem cells and senescence)
 - Study of Bcl-xL as a longevity gene (based on previous studies in centenarians)

Research Group on Women Health Consolidated group

Group members	Researchers by categories
Leading Researcher, R4 Antonio Cano Sánchez. Hospital. University Juan José Tarín Folgado. University	R2 6
Recognised Researchers, R2 Ana Martínez Aspas. Hospital. University Celia Bauset Castelló. Hospital Ester Ortiz Murillo. Hospital Gemma Arribas Ferriol. Hospital Irene Zolfaroli. Hospital Juan José Hidalgo Mora. Hospital	R4 2
Staff. Collaborating Researchers Aitana Monllor Tormos. Hospital Laura Carbonell López. Hospital Rocío Belda Montesinos. Hospital	STAFF 4
Staff. Nurses Alicia García Vigara. Hospital	

Strategic aims
The group is positioned in the field of healthy ageing, particularly in what relates women, with special interest to frailty, where it has collaborated in the support of INCLIVA in the project ADVANTAGE. We have collaborated to position the reference site of the Valencia Region within EIPAH, the partnership of the European Commission. Moreover, we have participated in the application to different European projects with groups from different European countries, including an application to the Marie Curie grants
Main lines of research
<ul style="list-style-type: none"> In healthy ageing in the female we are continuing our interest on osteoporosis but also have added frailty and functional decline The group is consolidating the CARMEN cohort (see the EIPAH commitment tracker, https://ec.europa.eu/eip/ageing/commitments-tracker/a3/integrated-care-and-ict-reduce-frailty-and-chronic-diseases-ageing-women_en) There is a new area of interest on the use of ICT to promote women's health with regard to endometriosis: <ul style="list-style-type: none"> To analyze the role of microRNA and vascularization regulators and pain mechanisms. Role of the TNF cytokine family To analyze the initial atherogenesis and selective estrogen receptor modulators

scientific activity

Research Group on Reproductive Medicine Consolidated group

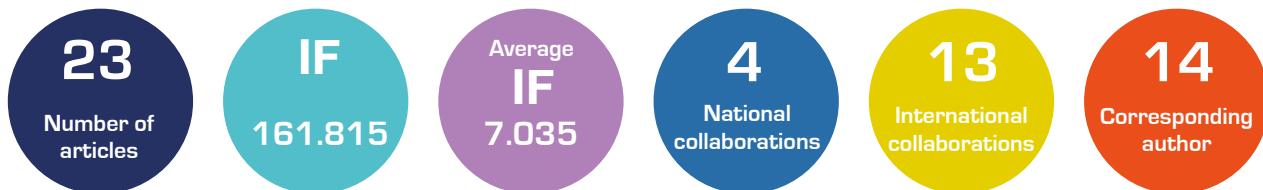

- The embryo viability: nowadays the selection of embryo is based solely on morphological parameters, which doesn't guarantee its genetic viability. We aim to develop a non-invasive approach based on molecular techniques to identify euploid embryos
- Study of endometrial receptivity and performe the Cell Atlas of the human uterus: we discovered the transcriptomic signature of human endometrial receptivity. Now, we are part of the International Human Cell Atlas initiative to create the first human cell atlas of the uterus
- The endometrial microbiome in human reproduction: our research group has described the existence of the endometrial microbiome and its clinical implications on the reproductive outcome. We investigate the impact of uterine microbiome dysbiosis and its clinical impact
- The maternal implication in the origin of pre-eclampsia: our research has provided evidence that endometrial decidualization resistance is implicated in the origin of this disease. This finding offers a new perspective based on the maternal contribution to gestation, aiming to develop a tool that will diagnose pre-eclampsia
- Molecular diagnosis of myometrial tumors: our previous work has demonstrated the genomic differential characterization of myomas and leiomyosarcomas. We aim to shift the diagnostic and therapeutic focus of uterine leiomyomas and leiomyosarcomas through genomic characterization

Emerging Researcher

Aymara Mas Perucho

The main objective of this research is focused on understanding those factors that contribute to the pathophysiology of myometrial tumors at the molecular level.

Department of Anesthesiology

Strategic aims

- The effects of advanced monitoring and drugs on hemodynamic management in patients undergoing surgery
- Open Lung Approach for the Acute Respiratory Distress Syndrome
- Study and development of methods of detection of infections
- Development of new strategies and drugs for pain treatment

Main lines of research

- Oxidative stress and protection of organs in ischemia-reperfusion surgery
- Ventilatory and pharmacological strategies to decrease organ damage in the lungs associated with mechanical ventilation in healthy and injured lungs
- Development of hemodynamic monitoring and its application in the field of patients undergoing surgery or admitted to critical care units
- Study and development of methods of detection of infections, especially fungal and virological, and how to prevent them
- Study and development of therapeutic drug monitoring (TDM) to describe antimicrobials pharmacokinetics (PK) and determination of minimum inhibitory concentration (MIC)
- Development of new strategies and drugs for pain treatment
- Development of new strategies and monitoring for Traumatic Brain Injury

scientific activity

Arrhythmia and Cardiac Pacing Unit

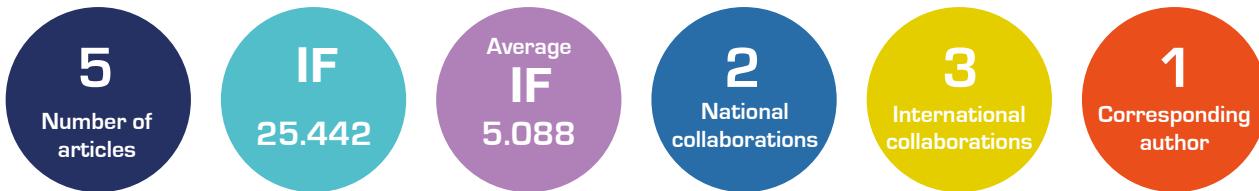

Strategic aims

- Our Unit has received the Excellence Credit in the Program "Atrial Fibrillation Ablation" from the Spanish Society of Cardiology
- The multicentre project "Left atrial geometry and outcome in atrial fibrillation ablation, LAGO-AF" has been concluded. First results have been published

Main lines of research

- Collaboration in the national prospective observational study on Crioballoon ablation of atrial fibrillation (RECABA)
- Leading and Collaboration in the registry on sleep alterations in patients with pacemakers
- Leading a multicenter prospective study on ablation of typical atrial flutter without radioscopy and guided by electrogram amplitudes

Department of Digestive Medicine

Strategic aims

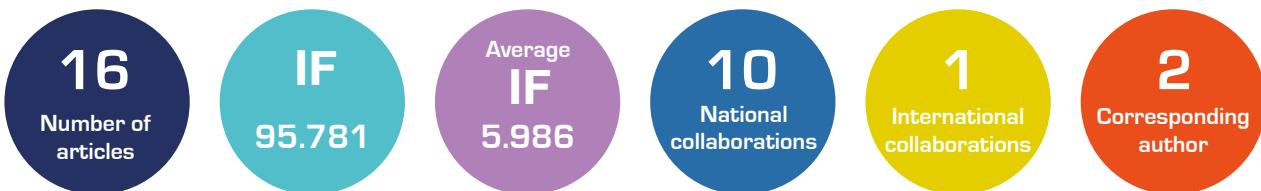

- Update of protocols and clinical guidelines of the Department
- It has been possible to consolidate the relationship of the Unit of Inflammatory Bowel Disease of our Department with the network of National Units, through collaborative studies that have been published in international journals of category Q1 and Q3

scientific activity

Main lines of research

- On the section of gastroenterology, to continue the studies on digestive hemorrhage, acute pancreatitis, inflammatory bowel disease, motion sickness and digestive benign anorectal pathology
- On the hepatology division to continue the analysis of hepatic encephalopathy, the nonalcoholic, epidemiological, therapeutic and immunoprophylaxis on Hepatitis Virus steatohepatitis. Also hepatocellular damage and nitric oxide and liver tumors
- About endoscopy division: study on the therapeutic dilatation, the ecoendoscopia diagnostics and therapeutics, ampulectomia, diverticulotomy of Zenker and digestive prostheses

Department of Hematology and Hemotherapy

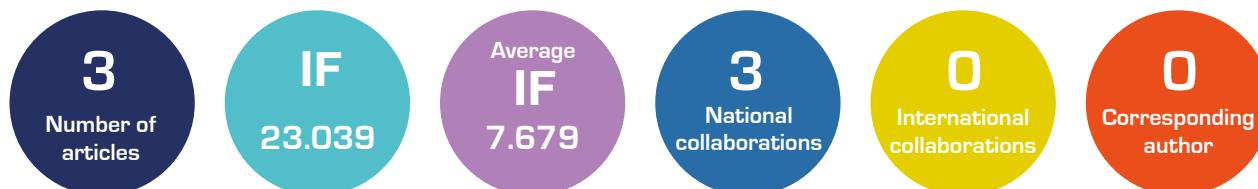

Strategic aims

- To maintain translational research in the lines prioritized: Myeloid Neoplasms, Lymphoid Neoplasms, Coagulopathies, Stem Cell Transplant and Cellular Therapy
- To favor the research collaboration between clinical hematologists and basic investigators
- To develop research projects using experimental models (for GvHD, and Advanced Therapies)
- To increase the number of clinical trials and research projects in Advanced Therapies
- To develop Cellular Therapies in the laboratory throughout collaboration with the Department of Pharmacy and the INCLIVA-IIS La Fe-Centro de Transfusiones CV consortium
- To enhance new research lines in Thrombophilia, Coagulopathies and Thrombopathies
- To improve the impact factor in publications resulting from our research and cooperative projects

Main lines of research

- Hematopoietic Transplantation and Cellular Therapy
- Lymphoproliferative Disorders
- Myeloid Neoplasms
- Hemostasis and Thrombosis

Department of Intensive Medicine

Main lines of research

- Plasma histones and septic shock. Immunosuppression in Critical Patient
- Local ICU epidemiology. Multiresistant bacteria surveillance
- COVID19 pneumonia. Severe ARDS
- Bacterial and opportunistic co-infections in a patient with severe COVID19 pneumonia
- Benefit of corticosteroids in the Severe ARDS
- Severe community pneumococcal fine IV-V pneumonia

Department of Maxillofacial Surgery

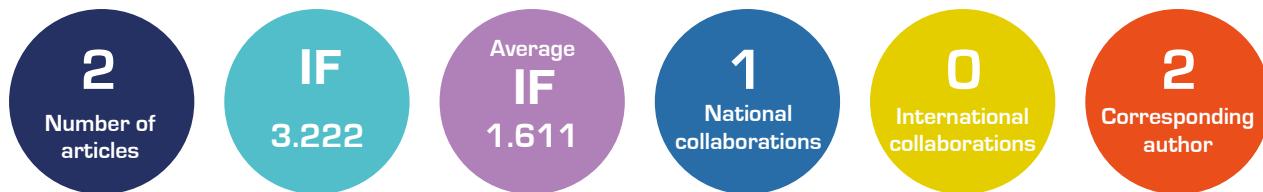

Strategic aims

- Innovation in personalised prosthesis for maxillofacial reconstruction
- Traslational research project for the development of implants with high added value through additive manufacturing
- Innovation in throat pack

Main lines of research

- Cost-effectiveness analysis on the management of oral surgery processes in patients with severe dependence and/or pluryphatological chronicles with comorbidities: proposal for a new organizational model of care
- Radiological evaluation of predictive factors of access to pterygopalatine fossa
- Research on materials involved in bone regeneration
- Research on materials involved in nerve repair
- Project: Mandibular Condylar Hyperplasia: Impact of Bone SPECT on Therapeutic Decision. Proposal of a decision algorithm

scientific activity

Department of Microbiology

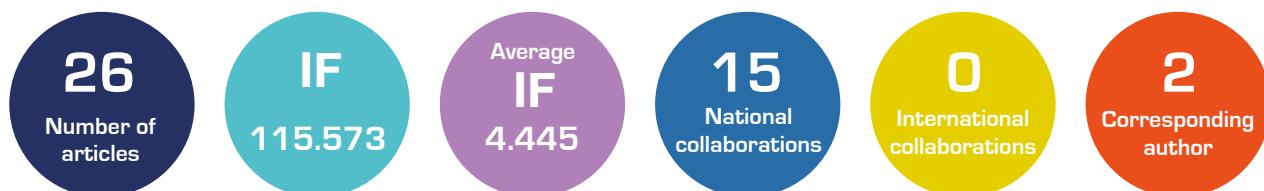

Strategic aims

- We have identified rotavirus and norovirus genotypes infecting populations studied in Valencia during recent years
- We have characterized the most common phenotypes of histo-blood antigens (secretory, Lewis and ABO antigens) in children infected with rotavirus
- Isolation in culture of human enteroids from norovirus strains

Main lines of research

- Phylogenetic analysis of polymerase and capsid genes sequences of norovirus strains in patients with acute gastroenteritis and chronic infections in immunocompromised patients
- Study of association between histo-blood antigens (HBGA) of patients infected with different rotavirus and norovirus genotypes
- Anti-adhesive effect of human milk oligosaccharides against rotavirus and norovirus
- Human norovirus replication in enteroids

Department of Nephrology

Strategic aims

- To work together with cardiology Department in order to explore new developments in treatment of cardio-renal syndrome by peritoneal dialysis
- Diabetic kidney disease: risk factors and progression. Diabetic kidney disease in dialysis patients
- To analyze risk factors for developing hyperkalemia and the adherence to the current treatments
- To establish the picture of the renal problems detected in Oncology and Hematology patients: kidney damage in the onco-hematologic patients
- To analyze the incidence of acute kidney injury in hospitalized patients

Main lines of research

- Treatment of cardio-renal syndrome by peritoneal dialysis
- Diabetic kidney disease and chronic kidney disease: risk factors and progression and proteinuria development. Diabetic kidney disease in dialysis patients
- Hyperkalemia and chronic kidney disease
- Onco-nephrology: kidney damage in the oncologic patient
- Biomarkers of acute kidney injury

THESIS

Thesis title: Exposición de la oliva bulbar mediante los abordajes FAR lateral y retrosigmoideo bajo. Análisis comparativo de la superficie expuesta y ángulo de ataque

Doctoral candidate: Pau Capilla Guasch

Director(s): José Manuel González Darder, Vicent Quilis Quesada

Date of the defense: 02/07/2021

Grade: Sobresaliente "cum laude"

Thesis title: Estudio biomecánico y correlación clínica de los sistemas de artrodesis cervical anterior caja-placa

Doctoral candidate: Félix Pastor Escartín

Director(s): Manuel González Darder, José Florindo Bartolomé Gómez, Vicent Quilis Quesada

Date of the defense: 24/09/2021

Grade: Sobresaliente "cum laude"

Department of Nuclear Medicine

Strategic aims

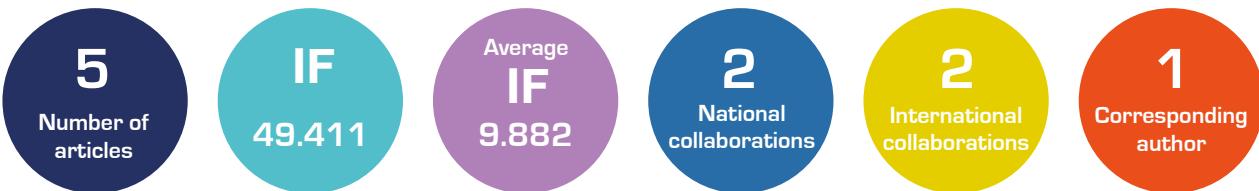

- Comparison of low energy and medium energy collimators in the quantitative assessment of 123I-MIBG cardiac sympathetic innervation imaging
- Quantitation vs visual assessment of 99mTc-DPD cardiac uptake in patients with suspected cardiac amyloidosis
- Evaluation of left ventricular dysynchrony by Gated SPECT myocardial perfusion in the evaluation of cardiac resynchronization therapy
- Radioguided surgery by intraoperative scintigraphy with portable gamma camera in patients with primary hyperparathyroidism and not conclusive pre-surgical scintigraphy

Main lines of research

- Radioguided occult lesion localization of pulmonary nodules in video-assisted thoracic surgery
- Sentinel Lymph Node detection in patients with breast cancer and positive axillary Lymph Node after neoadjuvant chemotherapy
- Evaluation of left ventricular dyssynchrony by Gated SPECT myocardial perfusion in patients with cardiac resynchronization therapy
- Response assessment at one year after 131I treatment in patients with grave's disease and multinodular goiter
- Diagnosis and follow-up of hyperplasia of the mandibular condyles by bone SPECT

Title: *Sistema inteligente de apoyo a la toma de decisiones clínicas en medicina de precisión*

Principal Investigator: Jaime Verdú Amorós

Department of Pharmacy

Strategic aims

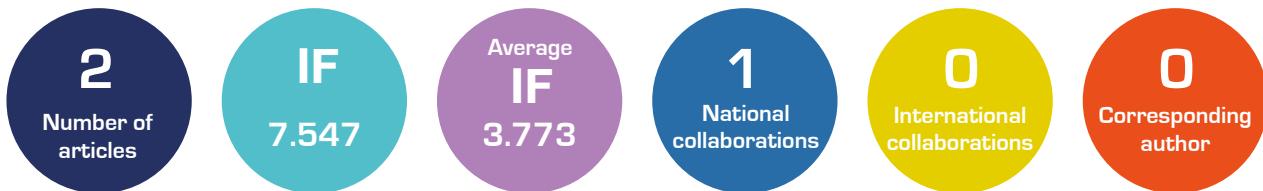

- Implementation of a new therapeutical drug monitoring system in a clinical analytical laboratory for pharmacokinetic control of antibiotic, antifungal and antineoplastic agents in the hospitalized patient, with the aim of optimal and rational use of pharmacological treatment
- Study of pharmacokinetics of caspofungin in patients under hemodiafiltration. Study approved by the *Agencia Española del Medicamento y Productos Sanitarios* with code MER-CAS-2013-01
- Observational Study of population pharmacokinetic model of voriconazole in allogeneic stem cell transplantation. Study approved by the *Agencia Española del medicamento y Productos Sanitarios* with code CSV-VOR-2014-01
- Study of pharmacokinetics of Ceftolozane in critical patients. Study pending of approval by the *Agencia Española del Medicamento y Productos Sanitarios* with code CEFT-TCRR-2017
- Study of Physico-chemical stability of a new mycophenolate mofetil intravenous solution in polypropylene infusion bag at different storage conditions
- Study of Physico-chemical stability of a new ophthalmic eyedrop formulation at different storage conditions

Main lines of research

Department of Traumatology and Orthopedic Surgery

Strategic aims

- Non-invasive image in orthopedics
- Mechanisms of inflammation and oxidative stress in bone pathologies
- New systems of fixation of prostheses applied to Traumatology

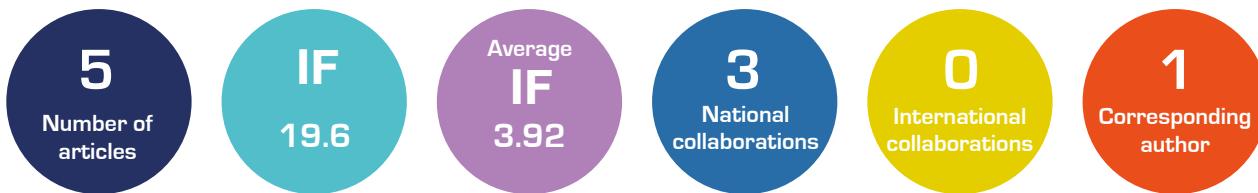

Main lines of research

- Cellular oxidative stress and its relationship with idiopathic femoral osteonecrosis
- Sequentiality of muscle contraction: importance in early detection of lumbopelvic, cervical and shoulder girdle dysfunction
- Diagnosis and monitoring of the diabetic foot using infrared thermography
- Cellular mechanisms to regulate inflammatory response in chronic inflammatory diseases
- Protection strategies against osteoarticular deterioration
- Robotics for precision in orthopedic reconstructive surgery
- Rehabilitation to improve outcomes after total knee arthroplasty prospective randomized study
- Local mechanical stimulation of mesenchymal cells for osteogenic and chondrogenic differentiation in regenerative medicine

scientific activity

RESEARCH PROJECTS AND GRANTS FOR RESEARCH

Reference: DTS18/00177

Title: Desarrollo de un nuevo sistema de fijación intramedular para implantes (prótesis, clavos para fracturas y exoprótesis)

Principal Investigator: Antonio Silvestre Muñoz

Funding Body: Instituto de Salud Carlos III - Co-financed FEDER

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2019-2021

Total Budget: €99.500

Title: Evaluación de la eficiencia de la metodología para el seguimiento de pacientes con prótesis de rodilla

Principal Investigator: Antonio Silvestre Muñoz

Funding Body: Fundación Mutua Madrileña

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2020-2022

Total Budget: €65.000

Department of Urology

Strategic aims

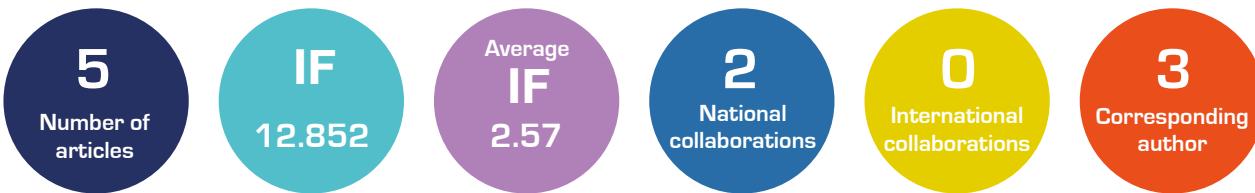

- Study the use of metabolics in urine and tissue in patients with prostate cancer
- Study the use of perform biopsy liquid in bladder cancer using digital PCR

scientific activity

Main lines of research

- Usefulness of metabolomic analysis in the diagnosis and prognosis of prostate cancer: it involves performing a metabolomic analysis of urine and prostate tissue in patients with prostate cancer. The purpose is to define a metabolomic profile that allows establishing a diagnostic suspicion after urinalysis, as well as evaluating the metabolomic profile of prostate tumor tissue. In addition to evaluating its diagnostic utility, its prognostic capacity will be evaluated in patients with prostate cancer
- Liquid biopsy in bladder cancer. The aim is to detect the presence of a certain genetic profile in patients with bladder cancer and to see its diagnostic correlation, as well as the correlation with grade and stage. Preliminary analysis

ACTIVITIES DEVELOPED

Incorporation of samples in pre-existing collections within the biobank regime in 2021:

Oncological Node:

- Collection of solid tumors: 54 new sample donations
- Collection of peripheral blood and derivative products in patients suffering from breast cancer (including cases of Auk-Seom project): 242 new sample donations
- Collections of peripheral blood and derivative products in patients suffering from lung cancer: 219 new sample donations
- Collection of peripheral blood and derivative products in patients suffering from melanoma: 5 new sample donations
- Collection of peripheral blood and derivative products in patients suffering from gastrointestinal cancer (including colorectal, pancreatic and gastric cancer, and cases of TFK project): 1202 new sample donations
- Collection of peripheral blood and derivative products in patients suffering from head and neck tumors: 279 new sample donations
- Collections of peripheral blood and derivative products in patients suffering from brain tumors: 12 new sample donations
- Collections of peripheral blood and derivative products in patients suffering from gynecological tumors (including cases of Auk-Seom project): 39 new sample donations
- Collections of peripheral blood and derivative products in patients suffering from sarcoma: no new sample donations
- Collections of peripheral blood, derivative products and urine in patients suffering from bladder cancer: 16 new sample donations

Immunological Diseases Node:

- Collection of peripheral blood and derivative products in patients suffering from Systemic Lupus Erythematosus or other autoimmune diseases: 12 new sample donations

Cardiovascular Node:

- Collection of peripheral blood and derivative products and urine

in patients suffering from Hyperaldosteronism: no new sample donations

- Collection of peripheral blood and derivative products in patients suffering from Hypertension: no new sample donations
- Collection of peripheral blood and derivative products and urine in patients suffering from Acute heart failure: 97 new sample donations
- Collection of peripheral blood and derivative products and urine in patients suffering from heart failure: 2 new sample donations

Endocrinology Node:

- Collection of peripheral blood and derivative products and urine in patients suffering from endocrine diseases (DM1, DM2 and controls): 69 new sample donations

Other collections:

- Collection of peripheral blood and derivative products in patients suffering from sepsis gravis and septic shock from ICU: 26 new sample donations
- Collection of peripheral blood and derivative products in patients suffering from Multiple Esclerosis: no new cases
- Collection of peripheral blood and derivative products and urine in standard population (including cases of Obenoutec subcollection): no new sample donations
- Collection of peripheral blood and derivative products in patients suffering from COVID-19 disease: no new cases
- Collection of peripheral blood and derivative products in patients suffering from Pulmonary Emphysema disease: 263 sample donations

Incorporation of new collections within the biobank regime in 2021:

- Endocrine Disease Controls subcollection; peripheral blood and derivative products in standard population: 2 sample donations
- Hereditary Cancer Collection: peripheral blood and derivative

- products in patients suffering from this pathology: 12 sample donations
- COVID-19 Vaccinated Collection; peripheral blood mononuclear cells from standard population vaccinated against COVID-19 disease: 428 sample donations
 - Reproductive Medicine Node, including Single Cell Cryopreserved Human Endometrial Sample Collection; viable cells from endometrial biopsy or from endometrial fluid taken from women at different phases of their menstrual cycle: 254 sample donations
 - COVID-19 Disease Follow-up Collection; peripheral blood and derivative products in patients who have suffered from COVID-19 disease under follow-up: 69 sample donations

In summary, 3105 new sample donations have been received, 13108 samples have been processed and 55421 aliquots have been stored in 2021 at INCLIVA Biobank facilities from collections within biobank regime.

In addition, the Biobank has surplus diagnostic samples from the HCUV Pathology and Hematology services that may be used in research provided they have the corresponding Biobank Informed Consent.

Incorporation of samples in pre-existing collections outside the biobank regime in 2021. The collections are outside the organizational structure of the biobank and they are generated in the scope of projects and/or private clinical trials. The biobank manages the storage and custody of the samples, as well as the processing of the same in some cases.

- Amadix Study: processing, conservation and shipment of processed samples for the PancreaDIX study: Study for the development and validation of a genetic fingerprint for the diagnosis of pancreatic cancer and precursor lesions. AMD-CPA-2016-01: 19 new sample donations
- Renas Study: processing, conservation and shipment of processed samples for the study: Effect of CPAP on the deterioration of renal function in early stages of chronic kidney disease. 195/2015: custody of 2 cryoboxes
- Rolando Study: processing, conservation and shipment of processed samples for translational study within the framework of the ROLANDO trial: Multicenter and uncontrolled phase II clinical trial to evaluate the safety and efficacy of the combination of Olaparib and Pegylated Liposomal Doxorubicin (DLP) in patients with peritoneal carcinoma primary ovarian and resistant platinum fallopian tubes. GEICO-1601 ROLANDO: custody of 8 cryoboxes
- European LEGACy Project: processing, conservation and shipment of processed samples for this project: 226 new sample donations

- ROTATE-3 Study: processing, conservation and shipment of processed samples for this clinical trial: 185 new sample donations [Finished project]
- ALFAQMEGA/PEGASUS Study: processing, conservation and shipment of processed samples for this clinical trial: 148 sample donations

Incorporation of new collections outside the biobank regime in 2021:

- Diabetic Nephropathy study: processing, conservation and shipment of processed samples for the study: Early detection of histological lesions in nephrectomy pieces of diabetic patients. Anatomoclinical correlation. Analysis of the expression of Klotho in healthy kidney tissue vs tumor tissue: 61 sample donations
- NIKOLE Study [GEICAM/2018-03]: processing, conservation and shipment of processed samples for the clinical trial: Characterization of innate immune system in patients with luminal advanced breast cancer: 11 sample donations
- VERONA Study [RPL554-CO-302]: processing, conservation and shipment of processed samples for the clinical trial: A Phase III randomized, double-blind, placebo-controlled study to evaluate the efficacy and safety of ensifentript over 24 weeks in patients with moderate to severe Chronic Obstructive Pulmonary Disease: 1 sample donation
- HIPRA HH-2 Study: processing, conservation and shipment of processed samples for the clinical trial: A phase IIb, double-blind, randomised, active-controlled, multicentre, non-inferiority trial followed by a phase III, single-arm, open-label trial to assess immunogenicity and safety of a booster vaccination with a recombinant protein rbd fusion dimer candidate (PHH-1V) against SARS-CoV-2 in adults fully vaccinated against COVID-19: 207 sample donations
- TRANSPAIRE Study: processing, conservation and shipment of processed samples for the study: Radiofrequency-assisted pancreatic transection vs endostapler: 1 sample donation
- Cytosorb Study: processing, conservation and shipment of processed samples for the study: Hemoabsorption with Cytosorb vs usual clinical practice to analyze its effect on kidney damage biomarkers in asystole donation controlled with ECMO: 4 sample donations

In summary, 863 new sample donations have been received in 2021 at INCLIVA Biobank facilities from studies outside biobank regime.

INCLIVA is the only hospital in Valencia performing Phase I cancer clinical trials, and one of the few in Spain. Phase I trials are those in which a substance or product is tested in humans for the first time.

INCLIVA is conducting, through the Oncology Department, 261 clinical trials, 146 of them related to treatment in the early stages of testing (74 phase I or "first in human" and 72 phase II). INCLIVA's new facilities provide a full floor and a half specifically dedicated to host the unit.

The unit aims to develop and select new drugs through clinical trials and to perform studies related to the pathogenesis, prognosis and new experimental therapies in solid tumors

4 scientific activity

FUNCTIONS

The unit implements early clinical trials with experimental agents in the field of Oncology.

EQUIPMENTS

- -80° C Freezer
- -20° C Freezer
- Refrigerated desktop centrifuge
- Scientific refrigerator
- Conventional fridge
- Defibrillator
- Electrocardiographic equipment
- 7 monitors (blood pressure, heart rate and O2 saturation)
- 7 double medication infusion pumps
- 7 heads gases (oxygen and vacuum)

LOCATION

The following facilities are located on the second floor:

- Reception and waiting room
- 2 Consulting rooms
- Staff room
- Meeting room
- Therapy room

The third floor hosts the following facilities:

- Clinical trials office
- Monitoring room
- Clinical trials archives

RESEARCH PROJECTS AND GRANTS FOR RESEARCH

Reference: PT17/0017/0003

Title: Clinical Research and Trials Platform

Principal Investigator: Andrés Cervantes Ruipérez

Funding Body: *Instituto de Salud Carlos III* - Co-financed FEDER

Beneficiary Institution: *Fundación Investigación Hospital Clínico Universitario de Valencia*

Duration: 2017-2021

Total budget: €266.475

From June 2021, INCLIVA has the status of Adhered Center of the ITEMAS Platform of the IDIBELL Node. INCLIVA is part of the Alliance for Health Innovation and Industrialization of the Mediterranean Axis (AISEM) coordinated by the IDIBELL Foundation and created by the following institutions: IIS La Fe, FISABIO, IDIBELL, ISABIAL, IISPV, IdISBa, IDIAP and IMIB. AISEM nodes meet once a month, both the Technical Commission and the Strategic Commission. The Alliance has a 3-year Action or Work Plan divided into 5 key objectives.

UICEC participates in all activities related with the correct development of observational studies and clinical trials, in accordance with the applicable legal regulations and the standards of good clinical practice.

Currently, the portfolio of services includes, among others, the following activities:

1. Methodological and regulatory advice: collaboration tasks in the drafting of the protocol, CRF, Patient Information Sheet and Informed Consent and all documentation necessary for the correct development of the study in accordance with applicable regulations.
2. Start-up activities: in this phase the Unit collaborate with economic viability evaluation; identification and selection of participating sites; submission to national and local Authorities and Ethics Committee; Contract management with the participating sites; Monitoring Plan; Master File creation.
3. Development activities: Project Management activities; notifications; processing of amendments, interim analysis and reports; home visits; maintenance of file and monitoring visits.
4. Completion and closure activities: close-out visits; resolution of queries, elaboration of final reports, closure notifications to national and local Authorities and Ethics Committees.

ACTIVITIES DEVELOPED

During 2021, UICEC had collaborated with the development of the following clinical trials, interventional and observational studies:

CLINICAL TRIALS / Interventional Studies

Study: SEVO-COVID19

Title: Sevoflurane versus propofol sedation in patients with acute respiratory distress syndrome caused by COVID19 infection

EUDRACT: 2020-001379-34

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: IV (Low intervention clinical trial)

Study: SOLIDARITY

Title: An international randomised trial of additional treatments for COVID-19 in hospitalised patients who are all receiving the local standard of care

EUDRACT: 2020-001366-11

Sponsor: Ministerio de Sanidad, Consumo y Bienestar Social

Phase: IV

Study: ESR-17-13447(DAPA-HF)

Title: Short-term effects of Dapagliflozin on Peak VO2 in patients with heart failure with reduced ejection fraction

EUCRACt: 2018-002614-12

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: IV

Study: BBLOQ-2017

Title: Beta-blockers withdrawal in patients with heart failure with preserved ejection fraction and chronotropic incompetence: effect on functional capacity and life quality

EUCRACt: 2017-005077-39

scientific activity

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: IV

Study: ADAMPA
Title: Impact of self-measurement of blood pressure and self-adjustment of antihypertensive medication in the control of hypertension and adherence to treatment. A pragmatic, randomized, controlled clinical trial (ADAMPA Study)
EUCRACT: 2016-003986-25

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: IV [Low intervention clinical trial]

Study: CECUM
Title: Efficacy of high-dose corticosteroid pulses added to conventional oral corticosteroid course in comparison with monotherapy oral corticosteroid course for moderate flares of ulcerative colitis: a randomized multicentre clinical trial
EUCRACT: 2016-001170-15

Sponsor: Grupo Español de Trabajo en Enfermedad de Crohn y Colitis ulcerosa (GETECCU)
Phase: IV

Study: ELECLA
Title: Analysis of the effectiveness of neoadjuvant chemotherapy in treating colon cancer locally advanced
EUCRACT: 2016-002970-10

Sponsor: Jorge Arredondo Chaves, Complejo Asistencial Universitario de León
Phase: IV [Low interventional clinical trial]

Study: X16082
Title: Phase Ib/II trial to evaluate safety and efficacy of oral ixazomib in combination with sirolimus and tacrolimus in the prophylaxis of chronic graft-versus-host disease
EUCRACT: 2016-002503-26

Sponsor: Fundación Pública Andaluza para la Gestión en Salud de Sevilla (FISEVI)
Phase: Ib/II

Study: EXIT
Title: Suspension of anti-tnf treatment in patients with intestinal inflammatory disease: multicenter, prospective and randomized clinical trial
EUCRACT: 2015-001410-10

Sponsor: Fundación de Investigación Biomédica Hospital Universitario de la Princesa
Phase: IV

Study: SECURE
Title: Secondary prevention of cardiovascular disease in the elderly
EUCRACT: 2015-002868-17

Sponsor: Fundación Centro Nacional de Investigaciones Cardiovasculares, Instituto de Salud Carlos III (CNIC)
Phase: III

Study: IGR2009/1593
Title: Intergroup trial for children or adolescents with B-cell NHL or B-AL: evaluation of rituximab efficacy and safety in high risk patients
EUCRACT: 2010-019224-31

Sponsor: Institut Gustave Roussy
Phase: II/III

Study: LINES
Title: European Low and Intermediate Risk Neuroblastoma
EUCRACT: 2010-021396-81
Sponsor: Fundación para la Investigación Hospital Universitario y Politécnico La Fe
Phase: III

Study: RAPIDO
Title: Randomized Multicentre Phase III study of short course radiation therapy followed by prolonged pre-operative chemotherapy and surgery in primary high risk rectal cancer compared to standard chemoradiotherapy and surgery and optional adjuvant chemotherapy
EUCRACT: 2010-023957-12

Sponsor: UMCG, Groningen, The Netherlands
Phase: III

Study: HaploMUDStudy
Title: Matched Unrelated vs. Haploididentical Donor for Allogeneic Stem Cell Transplantation in Patients with Acute Leukemia with Identical GVHD Prophylaxis – A Randomized Prospective European Trial

Sponsor: University Medical Center Hamburg-Eppendorf Investigator Initiated Trial (IIT) [financial support by DKMS]
Phase: Non Observational with no drugs study

Study: DIAL-COVID
Title: Comparison of two types of dialysers (PMMA VS POLYSULPHONE) on cytokine extraction in haemodialysis patients with COVID 19 infection. Prospective study

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: Clinical trial with Medical Device

scientific activity

4

Study: PANGASBLUM

Title: Pancreatic anastomosis following pancreateoduodenectomy: pancreatogastrostomy versus blumgart's anastomosis. A randomized, prospective, multicenter study

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: Non Observational with no drugs study

Study: MOSCA FRAIL

Title: Randomized comparison between the invasive and conservative strategies in elderly frail patients with non-ST elevation myocardial infarction: The MOSCA-FRAIL Clinical Trial

Sponsor: Sociedad Española de Cardiología

Phase: Intervention clinical trial

Study: CETUPANC

Title: Impact of the dissemination of the circulating tumor cells (CTCs) during the cephal duopenopancreotomy at the appearance of metastasis and survival in patients with tumors of pancreas and periampullars (CETUPANC Study)

Sponsor: Fundación Pública Andaluza para la Gestión en Salud de Sevilla (FISEVI)

Phase: Interventional study

Study: FAIR

Title: Intravenous iron in patients with systolic heart failure and iron deficiency to improve morbidity & mortality (FAIR-HF2)

EUCRACT: 2016-000068-40

Sponsor: University Medical Center Hamburg-Eppendorf Investigator Initiated Trial (IIT) (financial support by DKMS)

Phase: IV

Study: COLICA

Title: Randomized double-blind trial to study the benefit of Colchicine in Patients with Acutely Decompensated Heart Failure (IMIB-CO-2020-01)

EUCRACT: 2020-000941-15

Sponsor: Fundación para la Formación e Investigación Sanitarias de la Región de Murcia (FFIS)

Phase: III

Study: ECACIKAGEL

Title: Ensayo Clínico Aleatorizado triple ciego para la evaluación de la seguridad y eficacia de CikaGel ® en el tratamiento de las úlceras de pierna en pacientes sin Enfermedad Arterial Periférica

Sponsor: Georges Klein

Phase: Clinical trial with Medical Device

Study: ASTARTÉ

Title: Temociclina vs Meropenem para el Tratamiento de la Bacteriemia por Enterobacteriales Resistentes a Cefalosporinas de Tercera Generación: Ensayo Aleatorizado y Pragmático

EUCRACT: 2020-000064-39

Sponsor: Fundación Pública para la Gestión de la Investigación en Salud de Sevilla (FISEVI)

Phase: III

Study: CIRCULATE-SPAIN-01

Title: Phase II randomized trial to assess the effect of intensive vs standard adjuvant chemotherapy in localised colon cancer with circulating tumor DNA

EUDRACT: 2021-000507-20

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: II

Study: KEEP ON (ESR-19-20217)

Title: Phase III, multicenter, open-label, randomized clinical trial to evaluate efficacy of Sodium Zirconium Cyclosilicate (Lokelma) compared to standard of care to manage hyperkalemia in patients with chronic kidney disease (CKD) and heart failure history

EUDRACT: 2020-003229-47

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: III (Low intervention clinical trial)

Study: ROTATE

Title: Rotation for Optimal Targeting of Albuminuria and Treatment Evaluation (ROTATE-3)

EUCRACT: 2017-004641-25

Sponsor: University Medical Center Groningen

Phase: III

Observational studies

Study: INC-CVD-2020-01

Title: Study of the occurrence of fibrotic pulmonary changes associated with SARS-CoV-2 infection

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia

Phase: NO-EPA

Study: DNO-IBR-2018-01

Title: Virology and immunology of cytomegalovirus (CMV) infection in patients with hematological malignancies in the time of new biotherapies

scientific activity

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: EPA-AS

Study: TFK-RAM-2018-01
Title: Macrophages associated with tumor, tumor angiogenesis and resistance to therapies in diffuse gastric cancer mesenchymal phenotype

Sponsor: Tania Fleitas Kanonnikoff
Phase: EPA-AS

Study: JFA-ALI-2018-01
Title: Study of inflammatory marker changes associated with endothelial dysfunction in patients treated with PCSK9 inhibitors

Sponsor: Jose T. Real Collado
Phase: EPA-AS

Study: OPTIM-BIOMA FIS-ANT-2017-01
Title: Optimization of antibiotic treatment in recipients of allogeneic LIN transplantation: impact on the intestinal microbiota and on clinical results

Sponsor: Fundación Pública Andaluza para la gestión de la Investigación en Salud de Sevilla (FISEVI)
Phase: EPA-SP

Study: GOLD 0 -DLCO 1
Title: GOLD 0 - DLCO 1: A look beyond obstruction. Is spirometry sufficient in COPD screening?

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: No-EPA

Study: JSC-TAB-2015-01
Title: Effectiveness of an intensive smoking treatment program on the serious exacerbations of smoking patients with moderate severe EPOC

Sponsor: Jaime Signes Costa Miñana
Phase: EPA-SP

Study: JGT-FER-2020-01 (COCOON)
Title: Efecto de la administración intravenosa de hierro carboximaltosa sobre el rendimiento físico, la fatiga y la calidad de vida en pacientes con enfermedad renal crónica no en diálisis y déficit de hierro

Sponsor: José Luis Górriz Teruel
Phase: EPA-SP

Study: HK-01-21

Title: Evidencia en la vida real del uso de patiromer para el tratamiento de pacientes con hipertotasemia crónica en una región de España

Sponsor: Fundación Investigación Hospital Clínico Universitario de Valencia
Phase: EPA-OD

Study: FIS-BAZ-2012-01

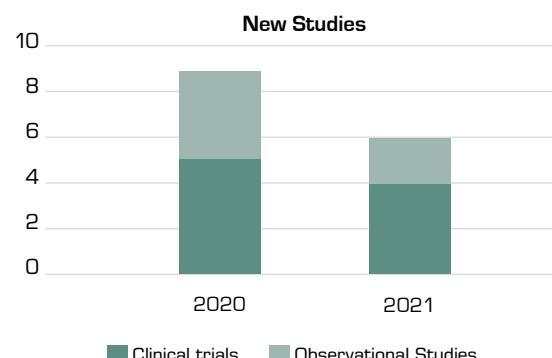

Title: Acción del bazedoxifeno sobre el metabolismo óseo y los factores de riesgo cardiovascular

Sponsor: Antonio Cano Sánchez
Phase: EPA-SP

UNIT ACTIVITY DURING LAST 5 YEARS

During the last five years, the unit has initiated 33 studies (21 clinical trials and 12 observational studies). The following table shows its distribution by year.

	Clinical trials	Observational Studies	Total
2017	5	2	7
2018	3	0	3
2019	4	4	8
2020	5	4	9
2021	4	2	6

scientific activity

As accumulative activity, new and ongoing studies, the Unit maintains an average of 26 active studies, per year, with a clear increasing tendency in the number of studies. Their distribution by type of study and year is detailed in the following table.

	2017	2018	2019	2020	2021
Phase I	1	1	1	1	1
Phasell	0	0	0	0	0
Phase III	7	7	5	3	6
Phase IV	6	8	8	9	10
Other Designs	2	3	4	6	6
Observational	5	5	8	8	9
Total	21	24	26	27	32

4.5.5. Precision medicine unit

Team

ump@incliva.es

PI:

Andrés Cervantes Ruipérez. Hospital. University

Coordinator:

Pilar Rentero Garrido. INCLIVA

Collaborating researchers:

Desamparados Roda Pérez. Hospital

Valentina Gambardella. INCLIVA

Technicians:

Enrique Seda García. INCLIVA

Laura González Castillo. INCLIVA

Sebastián Blesa Luján. INCLIVA

The Precision Medicine Unit was established in March 2018. Since then, the group have developed a robust and wide portfolio of services to support research at INCLIVA.

To date, the unit closely collaborates with the Oncology Phase I Clinical Trial Unit. Together we have developed an integrated screening system to support personalized patient care and hence implementing the latest techniques into the clinical practice. In addition, the unit currently collaborates in several research projects from different groups at INCLIVA.

The group integrates professional profiles from multiple disciplines (Medical Oncology, Molecular Biology, Bioinformatics and Biochemistry) with large professional experience in Human Genetics and Genomics.

FUNCTIONS

Our mission is to impulse, promote and execute quality translational research offering support in Molecular Biology as well as in Data Analysis techniques to the scientific community.

LABORATORY EQUIPMENT

- Two massive sequencers with Illumina chemistry: MiSeq and NextSeq550
- iScan System to scan Illumina microarrays
- nanoString n-Counter platform
- Biorad ddPCR
- Chromium Single Cell System (10X Genomics)
- Glomax Discovery System (Promega)
- Maxwell RSC (Promega)
- Quantitative thermalcycler
- Standard thermalcyclers
- TapeStation system to visualize DNA and RNA
- Laminar cabins, centrifuges, heat blocks, ovens, etc.

LOCATION

- Laboratories: *Facultad de Medicina. Avenida Blasco Ibáñez 15, Building 2, 2nd floor, UCIM Corridor, Laboratory 1*

SERVICES

1. Next-Generation Sequencing (NGS):
 - Design, development, validation and sequencing of custom gene panels
 - Exome sequencing and analysis
 - Whole-genome sequencing
 - Sequencing small genomes “de novo”
 - RNA-sequencing (total RNA, poly(A) fraction, rRNA depleted...)
 - Microtranscriptome sequencing (smallRNA/miRNA...)
2. Microarrays:
 - Genotyping arrays
 - Methylation arrays
3. Digital PCR
4. nanoString platform
5. Chromium Single Cell System (10X genomics)
6. Other molecular biology techniques:
 - Nucleic acid isolation
 - Nucleic acid quantification (absorbance and fluorescence)
 - Luminiscence analysis
 - Uniplex and Multiplex PCR
 - Quantitative PCR

7. Additional services:

- Advice and methodological support in writing protocols, research project proposals, scientific papers
- Mentoring of bachelor, master and doctorate students
- On demand training
- Consulting services

DEVELOPED ACTIVITIES

1800 oncologic patients have been molecularly tested to select the best treatment

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2019-2021

Total budget: €99.000

Title: Whole exome sequencing of circulating tumor DNA and genomic DNA to increase sensitivity in the detection of minimal residual disease and open new mechanisms for personalized medicine in localized colon cancer

Principal Investigator: Noelia Tarazona Llavero

Funding Body: SEOM

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2020-2022

Total budget: €20.000

Title: Molecular mechanisms and tumor heterogeneity associated with primary and acquired resistance to trastuzumab treatment in gastric or gastroesophageal junction cancer

Principal Investigator: Tania Fleitas Kanonnikoff

Funding Body: SEOM

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2019-2021

Title: Patient derived organoids (PDOs) to personalize the treatment of relapsed localized colon cancer (CC) by sequencing the whole exome and genomic DNA

Principal Investigator: Noelia Tarazona Llavero

Funding Body: TTD

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2020-2022

Total budget: €40.000

Title: Tumor microenvironment-derived factors in localized colon cancer: clinical impact and therapeutic implications (TUMMIC)

Principal Investigator: Andrés Cervantes Ruipérez

Funding Body: Fundación AECC

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

Duration: 2020-2025

Total budget: €992.996

Title: Colorectal carcinogenesis: the interaction of the tumor microenvironment and stem cells. Impact on personalized treatment

Principal Investigator: Noelia Tarazona Llavero

Funding Body: Fundación Mutua Madrileña

Beneficiary Institution: Fundación Investigación Hospital Clínico Universitario de Valencia

4 scientific activity

Duration: 2020-2023

Total budget: €130.000

Title: Precision medicine in oncology: development of new technological approaches for personalized treatments in Immunotherapy

Principal Investigator: Desamparados Roda and Sheila Zúñiga

Funding Body: Fundación FERO

Beneficiary Institution: Fundación Investigación Hospital Clínico

Universitario de Valencia

Duration: 2019-2021

Total budget: €240.000

4.5.6. Bioinformatics and Biostatistics Unit

Team	Technician
Coordinator	Fabián Robledo Yagüe. INCLIVA
Sheila Zúñiga Trejos. INCLIVA	Juan Carbonell Asins. INCLIVA
Miguel Herreros Martínez. INCLIVA	Pilar Natividad López. INCLIVA

The Bioinformatics and Biostatistics Unit is a core facility created in 2013. The unit is mainly dedicated to collaborate in different research projects, providing advice and support to researchers in the design, workflow implementation, development of computing strategies and analysis of data.

FUNCTIONS

Our mission is to drive, promote and execute quality translational research through methodological and analytical support.

EQUIPMENT

INCLIVA has a computing facility with 100 cores, 400GB of RAM memory 80TB of redundant network storage and 20TB of fast non-redundant local storage to the nodes for high I/O processes such as those applied to omics data analysis.

In addition, and as part of the Valencian biomedical research community, we also have access to a large computing facility hosted at the Centro de Investigación Príncipe Felipe to cope with large projects.

SERVICES

1. Bioinformatics services:

- Analysis of Next-Generation Sequencing Data (gene panels/exomes and genomes to detect both germline and somatic variants, RNA-Seq and smallRNA data analysis, Methyl-Seq data analysis)
- Microarray data analysis (both expression and methylation arrays)
- Functional enrichment analysis (identification of biological functions, cellular components or molecular functions with gene ontology terms, identification of altered metabolic pathways or related diseases)
- Complex network data integration, analysis and visualization

2. Biostatistics services:

- Design of clinical and epidemiological studies
- Sample size estimation

- Simulation techniques
 - Supervised and unsupervised analysis techniques
 - Predictive modelling
3. Additional services:
- Advice and methodological support to write protocols, research project proposals, articles, doctoral/MSc/BSc thesis
 - Data mining and exploratory analysis of databases
 - Graphical representation of research results
 - Curation and analysis of databases
 - Consulting

RESEARCH PROJECTS AND GRANTS FOR RESEARCH

Title: Legacy: CELAC and European consortium for a personalized medicine approach to Gastric Cancer

cli- cal trials

INCLIVA SCIENTIFIC REPORT 2021

5. Clinical trials and other studies

**5.1 Activity of the Ethical Committee for
investigation with medicinal products (CEIm)**

**5.2 Clinical research activity performed by
Valencia Clínico-Malvarrosa Health Department**

5.1. Activity of the Ethical Committee for investigation with medicinal products (CElm)

The Ethical Committee for Investigation with Medicinal Products are an independent board with a multidisciplinary composition whose main purpose is to oversee the protection of the rights, safety and well-being of subjects participating in clinical studies and biomedical research projects.

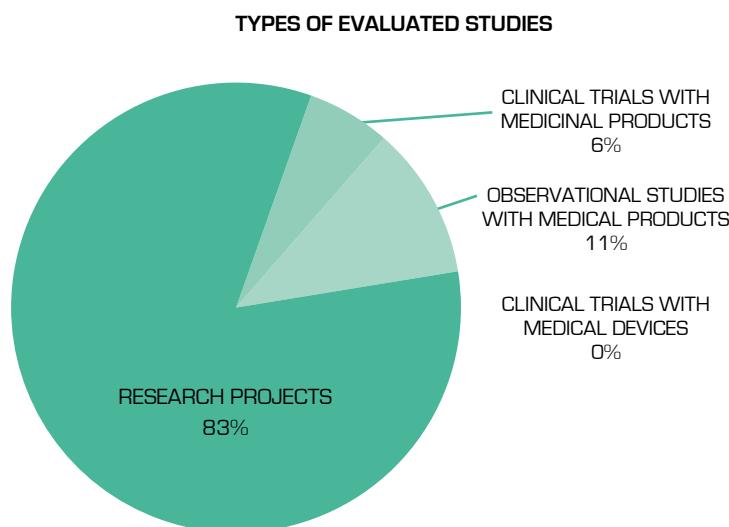

As a result of its activity along 2021, the CElm has processed a total of 38 studies (clinical trials and observational studies): 37 were positively valued, and 1 is in the process of evaluating the response to the requested clarifications.

Of the 38 approved studies, 19 were approved in the first evaluation and 19 after requesting clarification to the promoter.

Of the 13 clinical trials with drugs evaluated, anyone has been evaluated through the Voluntary Harmonisation Procedure (VHP) process.

The following table shows the number of clinical trials and other studies according to their typology.

TYPES OF EVALUATED STUDIES	2021
CLINICAL TRIALS WITH MEDICINAL PRODUCTS	13
Phase 0	0
Phase I	1
Phase II	6
Phase III	6
Phase IV	0

5.2. Clinical research activity performed by Valencia Clínico-Malvarrosa Health Department

5.2.1. Activity during 2021

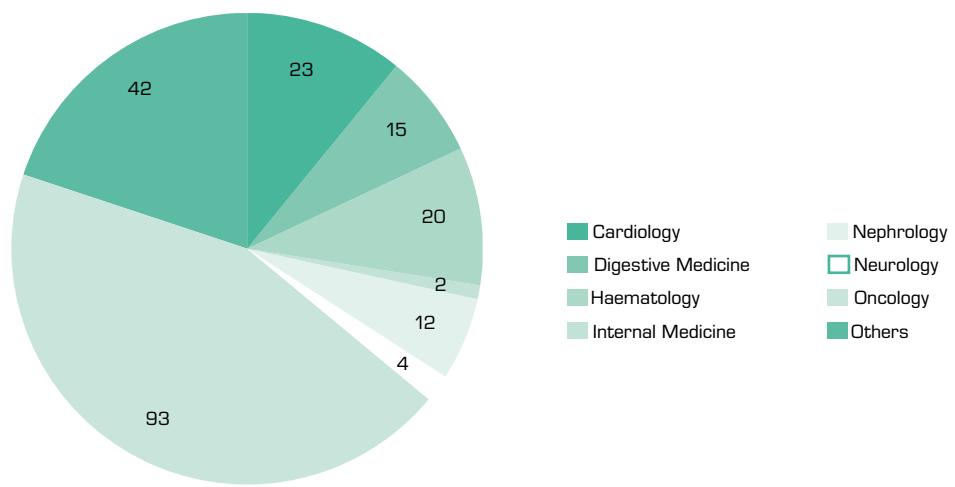

INCLIVA Health Research Institute manages the clinical studies (trials, observational studies, and research projects) carried out by the *Hospital Clínico Universitario de Valencia* and the Valencia Clínico-Malvarrosa Health Department researchers.

As a result of its activity along 2021, the INCLIVA has managed a total of 211 studies (clinical trials and observational studies).

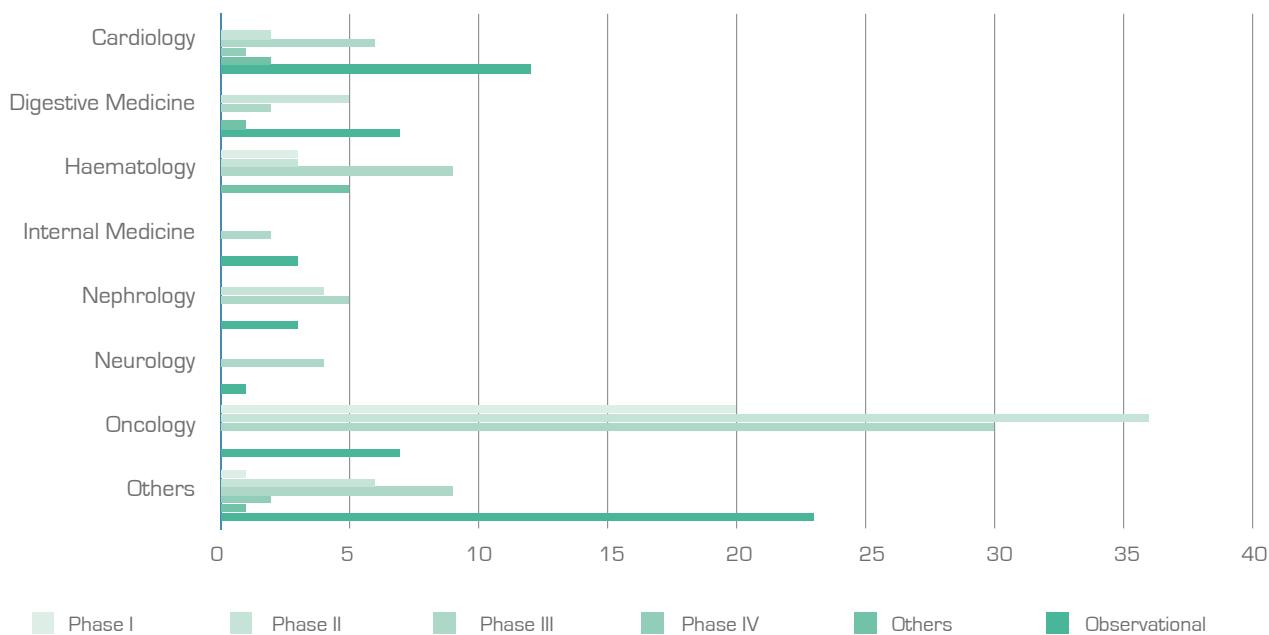

The distribution of these trials by phase is: Phase I: 24, Phase II: 56; Phase III: 67, Phase IV: 3, Observational studies: 57, others: 4. The following table shows the number of clinical trials and other studies according to their phase and department.

	Phase I	Phase II	Phase III	Phase IV	Others	Observational	TOTAL
Cardiology	-	2	6	1	2	12	23
Digestive Medicine	-	5	2	-	1	7	15
Haematology	3	3	9	-	-	5	20
Internal Medicine	-	-	2	-	-	-	2
Nephrology	-	4	5	-	-	3	12
Neurology	-	-	4	-	-	-	4
Oncology	20	36	30	-	-	7	93
Others	1	6	9	2	1	23	42
TOTAL	24	56	67	3	4	57	211

clinical trials

The Department of Medical Oncology leads the number of trials assessed to INCLIVA. It is followed by the departments of Cardiology, Haematology, Neurology, Digestive Medicine and Internal Medicine. These six services make over 75 % of the total processed trials.

Regarding the distribution of studies per promoter, 67 trials are considered as Independent Clinical Research (trials from associations, groups, foundations, and private individuals), 3 of which have been promoted by researchers from the *Hospital Clínico Universitario de Valencia* and INCLIVA and the rest of them have been promoted by the pharmaceutical industry.

PROMOTOR	Nº
HOSPITAL CLÍNICO UNIVERSITARIO DE VALENCIA RESEARCHERS AND INCLIVA	3
INDEPENDENT CLINICAL RESEARCH	67
COMERCIAL RESEARCH	141

clinical trials

5.2.2 Assessment activity during last 5 years

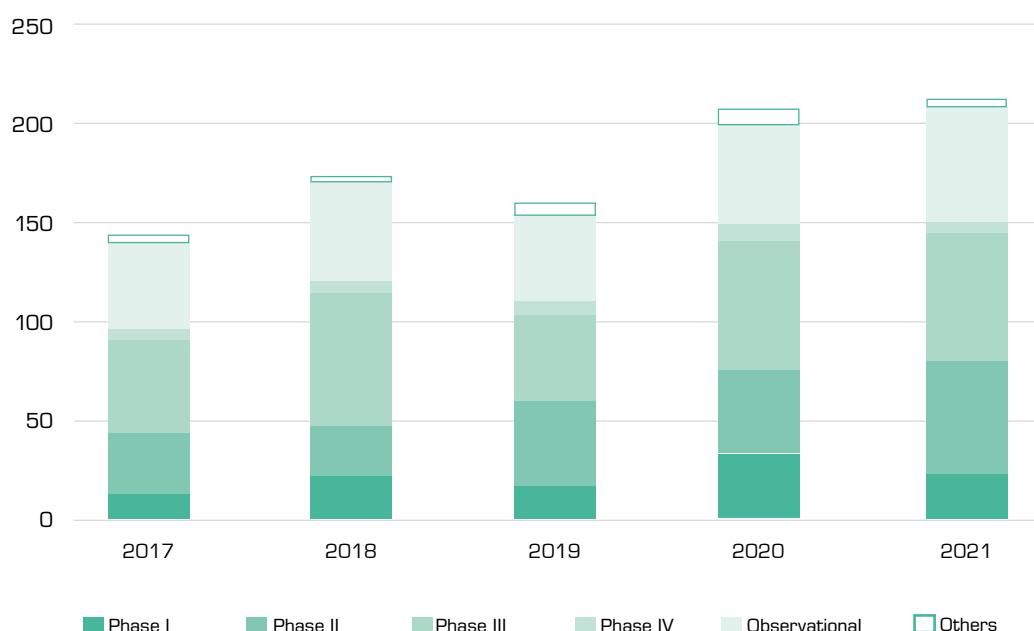

The table below shows the number of studies processed yearly, during 2021 the number of processed studies has increase upper two hundred.

Year	Processed studies
2017	143
2018	172
2019	159
2020	206
2021	211

One of INCLIVA's main goals is to develop clinical research at its early stages, thus contributing to translational research that moves scientific knowledge from bench to bedside. With this regard, during the period 2017-2021, Phase I and Phase II trials are prioritized and its number remains stable as shown in the table and graph below.

PHASE	2017	2018	2019	2020	2021
Phase 0	-	2	-	1	-
Phase I	13	20	17	32	24
Phase II	31	25	43	43	56
Phase III	46	67	43	64	67
Phase IV	6	5	7	8	3
Observational	43	51	42	50	57
Others	4	2	7	8	4

Evolution of clinical trial distribution by phase

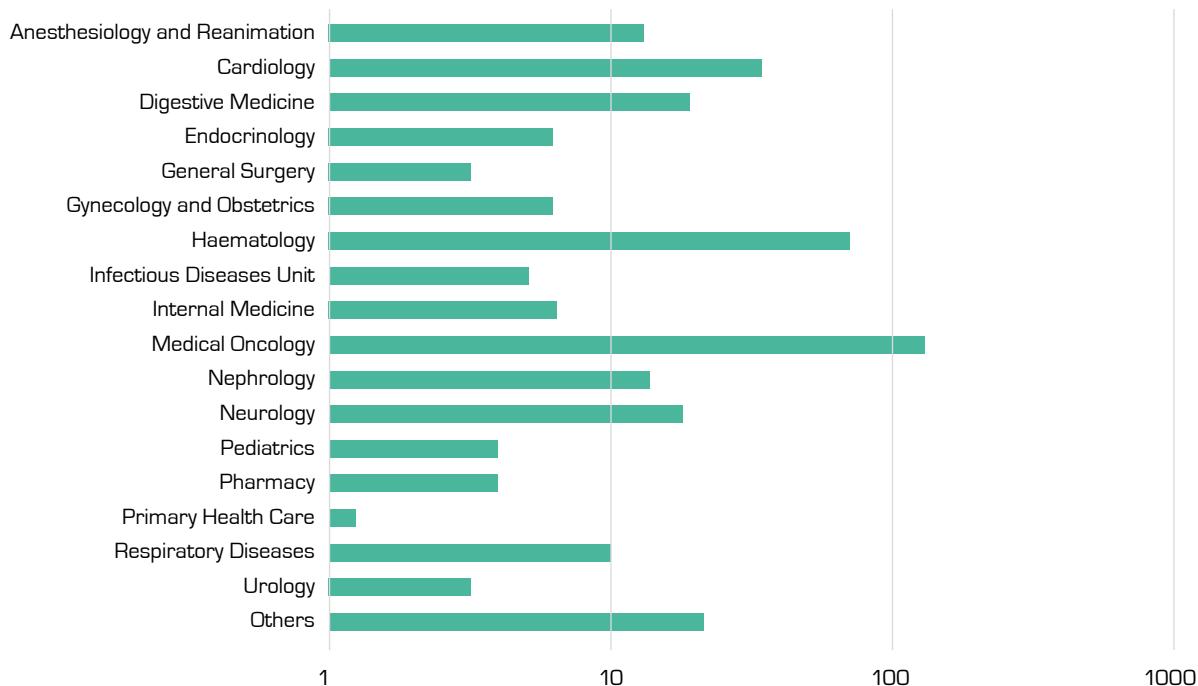

5 clinical trials

5.2.3. Ongoing studies

During 2021, 579 studies have been active. The distribution of clinical trials per department analyzed below uses a semilogarithmic scale due to the great difference between the Department of Medical Oncology and the rest of the Departments.

DEPARTMENT	Nº
Anesthesiology and Reanimation	20
Cardiology	63
Digestive Medicine	38
Endocrinology	8
General Surgery	5
Gynecology and Obstetrics	8
Haematology	85
Infectious Diseases unit	7
Internal Medicine	8
Medical Oncology	209
Nephrology	23
Neurology	35
Pediatrics	6
Pharmacy	6
Primary Health Care	1
Respiratory Diseases	10
Urology	5
Others	42
TOTAL	579

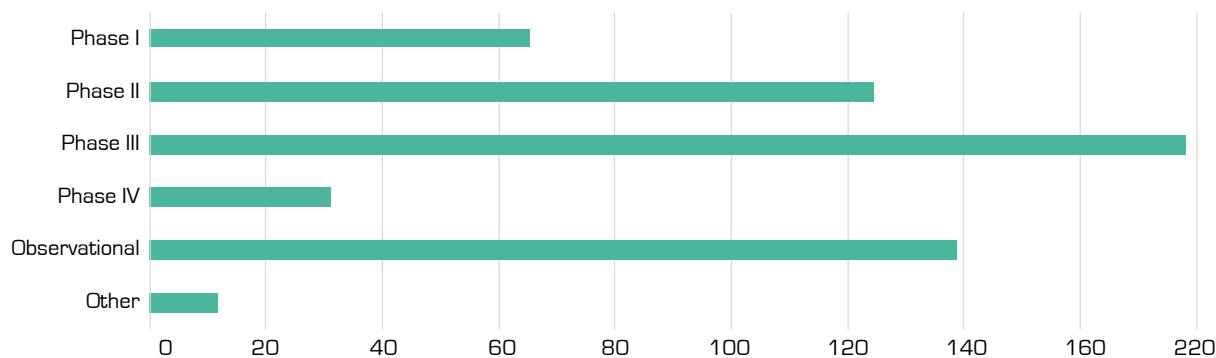

clinical trials

5

The distribution of ongoing trials and other studies according to their typology are the following:

PHASE	Nº
Phase I	64
Phase II	124
Phase III	210
Phase IV	30
Observational	139
Other	12

initia- tives

INCLIVA SCIENTIFIC REPORT 2021

6.1. Grants for external fellowships, Trainee students, Outgoing and Incoming Internships and new initiatives

To allow researchers to acquire new knowledge for clinical and research techniques, every year INCLIVA sponsors its Grants for research internships in centers of excellence.

Since the establishment of this scholarship program, over 158 professionals have visited national and foreign centers. In 2021 the number of grants funded was 17.

List of beneficiaries and destination centers of the IIS INCLIVA Training Stays Grants during 2021:

Ana Aliaga Chueca University of San Francisco. California (USA)	Mariola Hernández Martínez <i>Complejo Quirón Salud (HRJB y HQSJ). Madrid</i>
Mª Pilar Ballester Ferré UCL Medical School-Royal Free Hospital. London (United Kingdom)	Héctor Manuel Merenciano González <i>Hospital Universitario de Bellvitge. Barcelona</i>
Manuel Ballesteros Redondo <i>Hospital Universitario Ramón y Cajal. Madrid</i>	Iria Mestre Díaz <i>Hospital Santa Cristina. Madrid</i>
Silvia Busó Gil <i>Hospital Clínic Barcelona. Barcelona</i>	Marina Miralles Sancho <i>Hospital Psiquiátrico Román Alberca. Murcia</i>
Guillermo Cervera Ygual <i>Hospital Universitario Virgen del Rocío. Sevilla</i>	Alejandro Pérez Mora <i>Hospital Universitario Santa Cristina. Madrid</i>
Leopoldo Fernández Domper <i>Hospital Universitario Ramón y Cajal. Madrid</i>	Andrés Piolatti Luna <i>Hospital Universitario Infantil Niño Jesús. Madrid</i>
Ana Mª Gálvez Llompart <i>Hospital Universitario de Gran Canaria Dr. Negrín. Gran Canaria</i>	Serena Pisoni <i>Istituto Auxologico Italiano. Milan (Italy)</i>
Francisco Gimeno Valiente University College of London. London (United Kingdom)	Mario Rodríguez Rivas <i>Hospital Universitario 12 de Octubre. Madrid</i>
Concepción Gómez Medina University of Pittsburgh Medical Center. Pittsburgh (USA)	

OUTGOING INTERNSHIPS

Researchers from our IIS INCLIVA that during 2021 carried out external fellowships in foreign centers are shown in the following table:

David Martí Aguado University of Pittsburgh Medical Center. Pittsburgh (USA)	Juan Antonio Carbonell Asins <i>Universidad de Puerto Rico. Mayagüez (Puerto Rico)</i>
César Ríos Navarro Universitätsklinikum Essen. Essen (Germany)	Blanca Alabadi Pardiñas <i>ZNA (Ziekenhuis NETWERK Antwerpen). Antwerpen. Belgium</i>
David Martí Aguado <i>Centro Nacional de Investigaciones Cardiovasculares (CNIC). Madrid</i>	Laura Robles Rodríguez <i>University of Colonia. Colonia (Germany)</i>
Ezequiel Monferrer Garzarán Centre for the Cellular Microenvironment University of Glasgow. Glasgow (United Kingdom)	

initiatives

**Granted by Conselleria de Innovación, Universidades,
Ciencia y Sociedad Digital**

Juan José Gallego Roig

Imperial College London. London (United Kingdom)

Ariadna Bargiela Schönbrunn

University of Oxford. Oxford (United Kingdom)

INCOMING INTERNSHIPS

The incoming researchers in 2021 are shown in the following table:

Francisco Lara Hernández

University of Valencia
(Genomics and Diabetes Unit)

Vlad Stefan Hancig

Polytechnic University of Valencia
(Research Group on Hematopoietic Transplantation)

Selene Valero Moreno

University of Valencia
(Research Group on Rare Respiratory Diseases (RRD))

Marcella La Noce

Università della Campania "L.Vanvitelli". Naples (Italy)
(Research Group of Innovative Diagnostic and Therapeutical Developments in Solid Tumors - InDeST)

Estrella Christabel Porrás Núñez

Università Nazionale di Piura (Perú)
(Genomics and Diabetes Unit)

TRAINEE STUDENTS

There is a table attached that includes the number of students of Vocational Qualification, Degree or Master accepted during 2021 in INCLIVA. They have carried out training practices in different research groups:

34 Bachelor Degree students at the University of Valencia (including TFG students)

23 Bachelor Degree students at the Polytechnic University of Valencia (including TFG students)

22 Master's Degree students at the University of Valencia (including TFM students)

6 Master's Degree students at the Polytechnic University of Valencia (including TFM students)

7 Bachelor Degree students from other universities (including TFG students)

8 Master's Degree students from other universities (including TFM students)

25 Higher Vocational Qualification students of public and/or private centers of the Valencian Community
(10 of them were beneficiaries of the Sanec 2020 Program y 5 of them were beneficiaries of the Sanec 2021 Program)

1 ESO students Program for acquiring knowledge about the world of work

Students who benefited from the Sanec 2021 Scholarship for Dual Training program for the academic years 2020-2021 and 2021-2022, promoted by the Bankia Foundation and several Research Institutes, including INCLIVA. There were a total of 5 beneficiaries.

Ana García Gosp - Research Group on Rare Respiratory Diseases (RRD) - Mr. Francisco Dasí Fernández

Alba Gallardo Asunción - Genomics and Diabetes Unit - Mr. Felipe Javier Chaves Martínez

Adrián Pérez Andrés - Research Group on Neurological Impairment - Mrs. Carmina Montoliu Félix

Alejandra Gutiérrez Pérez - Research Group on Lymphoproliferative Disorders - Mrs. Blanca Ferrer Lores

Maria Fernández Caldúch - Group on Translational Research in Ischemic Heart Disease - Mrs. Amparo Ruiz Saurí

NEW INITIATIVES

The first call for applications for TFD and TFM Tutorials was opened in 2021. The call is aimed at university students enrolled in University Degrees and Masters in the Area of Health and Allied Sciences.

The following list shows the students who are going to do their TFD or TFM:

TFG

Malena Parlatore - Genomics and Diabetes Unit - Mrs. Ana Bárbara García García

María Janini Vilarrasa - Research Group on the Study of Cardiometabolic and Renal Risk - Mr. David Martí Aguado

Alexandre Ruix Morell - Research Group of Innovative Diagnostic and Therapeutical Developments in Solid Tumors - InDeST - Mr. Andrés Cervantes

Laura Arias Blanco - Research Group on Breast Cancer Biology - Mrs. Pilar Eroles Asensio

Inés Escobedo Camacho - Research Group on the Study of Cardiometabolic and Renal Risk - Mrs. Raquel Cortés Vergaz

TFM

Victoria Muriach Pérez - Research Group on Neurological Impairment - Mrs. Carmina Montoliu Félix

Adrià López Gramaje - Research Group on Neurological Impairment - Mrs. Carmina Montoliu Félix

Carmen Costa Gregori - Genomics and Diabetes Unit - Mrs. Ana Bárbara García García

Celeste Moya Valera - Genomics and Diabetes Unit - Mr. Felipe Javier Chaves Martínez

Antonio Pérez-Cardona García - Research Group on the Study of Cardiometabolic and Renal Risk - Mr. Josep Redón i Mas

Cristian Martínez Fajardo - Research Group on Healthy Aging - Mr. Juan Gambini Buchón

Noelia Ruiz Alonso - Research Group on Breast Cancer Biology - Mrs. Pilar Eroles Asensio

Ana Mª Agreda Roca - Research Group on Breast Cancer Biology - Mr. Juan Miguel Cejalvo Andújar

Ana Puertes Espada - Research Group on the Study of Cardiometabolic and Renal Risk - Mrs. Raquel Cortés Vergaz

Carme María Ortega Albiach - Bioinformatics and Biostatistics Unit - Mrs. Sheila Zúñiga Trejos

6.2 Training and teaching activities

Courses [14]

- *La Diabetes Tipo 2 desde la Perspectiva de la Multimorbilidad*
- *VII Workshop Internacional Ecografía y Resonancia Anorrectal*
- *C19_SPACE Curso de Preparación de Habilidades*
- *Curso teórico práctico Leucemia Linfocítica Crónica-LLC*
- *I Curso de Laparoscopia Experimental para Residentes de Urología*
- *Estadística Aplicada a la Medicina*
- *Curso Online en Atención Sanitaria Basada en Valor*
- *Curso Catéter Venoso Central de Inserción Periférica-PICC*
- *Formación Progresiva Cirugía Laparoscópica Colorrectal*
- *Curso Buenas Prácticas Clínicas para Investigadores*
- *I Curso sobre Gestión de la Cronicidad*
- *Curso Aspectos Básicos Protección de Datos*
- *9ª Edición Curso de Anatomía Quirúrgica Aplicada HBP*
- *VII Workshop Cirugía Laparoscópica Colorrectal Avanzada*

Scientific Conferences [24]

- *Jornada Personal de Enfermería Hematología*
- *Nueva Normativa de Estudios Observacionales con medicamentos*
- *Jornada Estratégica de Investigación EERR*
- *Normativa de Protección de Datos en los Proyectos*
- *Reunión Virtual THP Domiciliario-Jornada Ruta Asistencial*
- *Visualización del Personal Investigador en Redes Sociales*
- *Con la Igualdad Siempre Ganas 1ª sesión*
- *Requisitos para la presentación de proyectos de investigación*

- Proyecto Formativo para Atención Primaria
- Programa de Formación en Hemopatología 2021
- Proyecto Marco Polo I (3 sesiones)
- Jornada Formativa Acceso a HC en Investigación Biomédica
- Innovación y Transferencia de Conocimientos
- Nuevas tecnologías aparatos W8
- Jornada Enfermedades Raras en Pediatría y Atención Primaria
- Proyecto Marco Polo II (4 sesiones)
- Post-ESMO 2021
- Innova HUB SALUD LANZADERA
- Con la Igualdad Siempre Ganas 2º Sesión
- Formación Sanitaria Especializada
- Actualización Cáncer de Próstata 2021
- Jornada Papel del médico residente en la lucha contra el VIH
- Técnicas de abordaje del paciente con espasticidad post ictus
- Jornada Formativa sobre Patología Hematológica y Oncológica. Evolución de Enfermería: estudio de un caso

INCLIVA Seminars / Meet the Expert [10]

- Los biomarcadores para la Enfermedad de Alzheimer en la práctica clínica
- La Investigación Biomédica del Dolor con Perspectiva de Género
- 2ª Reunión “Los biomarcadores para la Enfermedad de Alzheimer”
- Mitos frente a realidades en el cáncer de próstata avanzado
- Visitas de observación “Shadow Visit”

INCLIVA SCIENTIFIC REPORT 2021

7. Communication

7.1 Highlights

7.2 Communication Indicators 2021

7.1. Highlights

January

- INCLIVA coordinates an international and multicenter study on the prevalence of coma and delirium in ICU patients with COVID-19
- INCLIVA participates in a European project to analyze and reduce energy poverty and its impact on health
- Igenomix-INCLIVA researchers decode for the first time the cellular behavior of the human endometrium

February

- INCLIVA participates in a project to disseminate the contributions of senior female scientists in the field of physical activity and health
- INCLIVA analyzes the effectiveness of 3D printing in understanding neuroblastoma and other tumors
- An INCLIVA study opens up new therapeutic possibilities in patients with Friedreich's Ataxia (FA)
- INCLIVA ends the study of non-invasive stimulation of the vagus nerve in COVID-19 patients with respiratory symptoms

March

- INCLIVA and AVA-ASAJA initiate biomedical projects to study and disseminate the healthy properties of Valencian agricultural products
- An INCLIVA study shows that the increase in potassium level after an episode of severe hyperkalaemia is associated with the risk of death
- INCLIVA research confirms the efficacy of circulating microRNA-30b as a diagnostic marker for breast cancer
- An INCLIVA-CIBERFES study points to a new therapeutic target for satisfactory aging
- An INCLIVA study identifies a molecular profile associated with the development of kidney disease in early stages in patients with hypertension

April

- An INCLIVA study demonstrates the importance of a new molecular target in the treatment of obesity and diabetes
- An INCLIVA investigation opens the doors to a new DAAT study model
- INCLIVA develops, with the support of the AVI, a test that detects early and predicts the evolution of sepsis, one of the main causes of death in hospital
- An INCLIVA study shows that stress in childhood and adolescence can modify the brain

May

- INCLIVA develops a rapid detection kit for COVID-19, highly sensitive and easy to use
- INCLIVA receives funding from FIPSE for the development of a rapid diagnostic and prognostic test for sepsis and septic shock
- INCLIVA, UPV and CIBERBBN develop a new biosensor that helps in the early diagnosis of breast cancer

June

- Professor Cervantes warns of the impact of COVID-19 on women oncologists and highlights the need for more measures to guarantee gender equality
- The College of Customs Agents and ATEIA-Oltra collaborate with INCLIVA to promote research on gastric cancer
- INCLIVA and IATA-CSIC researchers confirm the absence of COVID 19 and the presence of defenses against the virus in breast milk
- INCLIVA participates in a pioneering clinical trial to validate the efficacy of immunotherapy in 29 types of tumors

communication

July

- INCLIVA renews its accreditation as a Health Research Institute
- Big Data & AI: Actionable Insights Transforming European Healthcare shows the results of 12 big data and artificial intelligence pilots that make up this BigMedilytics Project
- II Ideas Contest to stimulate the innovative culture of the *Hospital Clínico Universitario de Valencia* and its department, through the INCLIVA Innovation Support Unit
- INCLIVA and IIS La FE participate in a European clinical trial aimed at reducing infections and rejection in kidney transplant patients

August

- INCLIVA participates in a project funded by the EU to improve post-treatment in breast cancer
- INCLIVA and CIBERONC promote a study aimed at improving the diagnosis of aggressiveness and advancing in personalized therapies in uterine cancer
- An INCLIVA study demonstrates the relationship between chronic kidney disease and heart conditions through the Rabphilin protein

September

- UV and INCLIVA researchers demonstrate for the first time the influence of pheromonal signals on memory generated in the hippocampus
- An INCLIVA study shows the relevance of personalized treatments in patients with advanced tumors and specific molecular abnormalities
- European researchers promote the large-scale integration of Big Data and Artificial Intelligence techniques in health
- INCLIVA demonstrates the usefulness of cardiac magnetic resonance imaging of cardiac function in patients with acute myocardial infarction

October

- INCLIVA demonstrates the impact of the G6PD enzyme in the prevention of frailty in the elderly
- INCLIVA and Boehringer Ingelheim renew their collaboration to promote training and health research
- INCLIVA, AIDIMME and IBV will bring a custom-made maxillo-mandibular prosthesis to the market in collaboration with the 3DSolutions Group
- An international trial shows, for the first time, that associating an immunotherapy with standard chemotherapy improves survival in triple-negative breast cancer
- An INCLIVA study analyzes the potential of microRNAs as biomarkers of osteoporosis and osteoarthritis

November

- An INCLIVA and UV study highlights the importance of combined dietary-nutritional and physical exercise programs during childhood to prevent obesity in adulthood
- About half of the patients admitted for moderate or severe pneumonia due to COVID-19 present alterations in lung function six months after hospital discharge
- Professor Cervantes defends a paradigm shift in oncology based on the molecular abnormalities that cause cancer rather than on the location of the tumor in a specific organ

December

- INCLIVA and the International University of Valencia (VIU) sign an agreement to collaborate in training and research activities
- Professor Cervantes conveys to the deputies and senators of the Health commissions of the Congress and Senate the challenges of Personalized Precision Medicine in a colloquium organized by Diariofarma
- *Fundación Bancaria* and INCLIVA renew the agreement to promote the Precision Medicine Unit in Oncology

In May was held *MedNight 2021: Nit Mediterrànea de les investigadores*, an event associated with the European Union's *Noche Europea de los Investigadores* initiative, funded by the Marie Skłodowska-Curie actions of the Horizon2020 European funding programme.

Its objectives are to value science and the role of women in scientific and technological research in the Region of Murcia and the Valencian Community for the first time jointly, and to promote scientific vocations through formats and attractive activities for all ages and all types of audiences like talks, workshops, virtual exhibitions and scientific shows.

social initia- tives

INCLIVA SCIENTIFIC REPORT 2021

8. INCLIVA social initiatives

8.1 Philanthropic projects

8.2 Private philanthropic donations and acknowledgments

8. INCLIVA social initiatives

In 2021, the Institute of Health Research at the *Hospital Clínico Universitario de Valencia*, INCLIVA, launched an awareness campaign on the importance of health research to guarantee first-rate assistance in the field of public health, and thus save more lives every year.

Under the slogan *I support research*, which is part of its Patronage Plan, INCLIVA underlines the essential nature of research to achieve medical advances that translate into improved quality of life for all citizens.

These are the main highlights:

18 March, 2021. AVA-ASAJA (Valencian association of Farmers) became an honorary ambassador of INCLIVA. The two entities signed a framework collaboration agreement to launch biomedical research projects studying the health properties of different Valencian agricultural products and promoting them within society. This agreement shows the commitment of the agricultural and health sectors to offering consumers a healthy and balanced diet, coinciding with the Covid-19 pandemic which highlighted the importance of health in disease prevention.

CAMPAIGNS

December 2020-January 2021. The INCLIVA Health Research Institute at the Clinical Hospital of Valencia launched the campaign 'Give research as a gift this Christmas', inviting people to make donations to health research as a Christmas present. Running until 6 January, the objective of this campaign was to raise public awareness of the importance of health research and suggest the possibility that by donating, anyone can contribute individually and within their means to the advancement of science and to unravelling unsolved medical problems.

February 2021. Solidarity campaign: "The art of painting to defeat childhood cancer, neuroblastoma". The Research Group led by Dr Rosa Noguera launched a fundraising campaign for research into neuroblastoma, the most common tumour type in childhood. The campaign invited everyone making a donation to this cause to enter a competition to draw a painting by urban artist Dridali. The prize-winner who won the painting was the Iraila National Association, initiatives for funding childhood cancer research.

April 2021. INCLIVA participates in the 'Make history with your story' campaign to help women with breast cancer trying to conceive. Launched by the GEICAM Breast Cancer Research Group to coincide with Mother's Day, the initiative involved mothers with breast cancer explaining their experience and highlighting the importance of both the medical team to overcome the challenges involved, and of research to help other women with this disease become mothers. The aim of the campaign was to advance knowledge of the relationship between breast cancer and pregnancy via the patients themselves, and help women with this disease who are trying to conceive by providing them with the best and most appropriate advice.

June 2021. The *Colegio de Agentes de Aduanas* (Association of Customs Agents) and ATEIA-Oltra (Business Association of Freight Forwarders in Valencia) collaborated with INCLIVA to promote research on gastric cancer, allocating the proceeds from the trilogy 'How much do you know about customs and customs duties?' to INCLIVA to further the study of gastric cancer immune microenvironment.

July 2021. Launch of the charity campaign "When I grow up I want to be like you" supporting childhood cancer research. Promoted by María Ferrer, this initiative aimed to raise funds for childhood cancer research by placing money collection tins in various collaborating restaurants and shops, mainly in the Marina Alta area. The campaign started on July 10 and ran until the end of the Christmas holidays. This campaign aims to raise awareness about childhood cancer and funds to investigate this disease and give children with cancer the opportunity to grow up healthy. The collection tins, prepared by hand by María and her children, will raise life expectancy and hope for children suffering from Neuroblastoma, the most common childhood cancer. Today these children are ill, but thanks to research, we hope that they will become healthy adults who can enjoy life and contribute their full potential to society.

social initiatives

3 November, 2021. INCLIVA Health Research Institute at the Clinical Hospital of Valencia joined the 'ADN Mestalla Solidari' campaign of Valencia CF Football club and Foundation, which gives visibility to the important charitable work of various Valencian organisations. INCLIVA has thus joined entities such as *Cruz Roja Juventud*, Civil Protection, Fivan, *Hogares Compartidos* and Lamma in receiving support and promotion from Valencia CF and the VCF Foundation during *La Liga* matches played at Mestalla football grounds this season.

DONATIONS

January 2021. The Els Generals falla collaborated with INCLIVA as part of its EN VENA initiative. Thanks to the campaign carried out and the "Remember the 80s" concert held before the pandemic, INCLIVA received €2,345 to support precision medicine and liquid biopsy research in their institute.

March 2021. ASPANION (Association of Parents of Children with Cancer in the Valencian Community), together with the charity initiative *Contigo por la Batalla*, made a donation to the INCLIVA Health Research Institute towards development of health research in childhood cancer, from an idea put forth by two women from Castellón with children affected by cancer. The donation of €3,009.64 was allocated specifically to the INCLIVA Pediatric Solid Tumor Translational Research Group, co-directed by Drs. Samuel Navarro and Rosa Noguera from the CIBER Cancer group (CIBERONC), towards research into Ewing's sarcoma, a cancer which although it can occur at any age, is more common in children and adolescents.

15 March, 2021. The *Esperança de Pego* Cancer Association supported INCLIVA with a donation of €3,000 for breast cancer research, adding to a contribution made last year to support ovarian cancer research. This year funds were raised through association member Carlos Siscar Bay. This athletics fan set himself the challenge of running 12 charity marathons in 12 months. Beyond raising money for this cause, he also helped raise awareness of the importance of continuing research and creating hope for everyone living with cancer.

21 May, 2021. *Amunt Contra el Cancer* signed a collaboration agreement with the INCLIVA Health Research Institute, making a donation this year of €12,250 euros to research projects in ovarian cancer, head cancer and neck and liquid biopsy. The agreement, signed by INCLIVA director Dr. Andrés Cervantes and the president of Amunt Contra el Cancer, M^a Isabel Llorca, will increase resources to investigate ovarian cancer (by €4,100), head and neck cancer (€4,000) and liquid biopsy (€4,150).

July 2021. ASPANION (Association of Parents of Children with Cancer in the Valencian Community), together with the solidarity initiative Painting the way in pink made a donation to the INCLIVA Health Research Institute at the Hospital Clinical of Valencia to contribute to the development of health research in childhood cancer. Raised through charity collection tins from collaborating businesses, and donations with fundraising gifts at communions, weddings and baptisms, the final amount collected of €10,000 will be used for translational research in the field of Pediatric Non-Hodgkin's Lymphoma (NHL).

September 2021. The Valencia-Castellón Association of Property Administrators and the Special Section Fallas Federation have awarded the second annual "Specialist Award" to Dr. Ana Lluch, and have made a donation of €1,000 for research in breast cancer. This award, which acknowledges excellence of work in art, science or sports, this year went to our researcher Ana Lluch for her professional dedication and research effort in the fight against breast cancer. Held at the headquarters of the Association of Property Administrators of Valencia-Castellón, this emotive ceremony was attended by the principal falleras of Valencia in 2021, Consuelo Llobell and Carla Gracia, as well as political representatives of the Consell, the Corts and Valencia City Council, the Association of Property Administrators and the Special Selection Fallas Federation.

October 2021. The Le Cadó Foundation donated €12,500 to INCLIVA for research into breast cancer. Founded in 2010, the foundation aims to finance projects for breast cancer research, and in addition to ours, they currently are funding two other studies: "Deciphering the genome of hereditary breast cancer" at the Provincial Hospital of Castellón in conjunction with La Fe Hospital in Valencia, led by Dr María Fonfría Esparcia and Dr Eduardo Martínez de Dueñas, and most recently the BAFC (Benefits of Physical Activity in Cancer) project, a physical exercise program directed at women with breast cancer currently under development at the UJI.

December 2021. The Bancaja Foundation and INCLIVA renewed their collaboration promoting our Precision Medicine Unit, which received a €22,000 contribution from Bancaja on renewal of the agreement. The unit is focused on molecular screening of cancer patients for genetic sequencing of the tumour, which enables a personalized approach through the most appropriate therapy in each case and experimental therapeutic alternatives.

December 2021. The Corazón Solidario Association presented INCLIVA with €10,000 to be used for the NED breast cancer project, coordinated by Dr Juan Miguel Cejalvo of the Breast Cancer Biology Research Group. INCLIVA signed a collaboration agreement with the entity in 2020, becoming the only organisation that receives funds from this Association..

social initiatives

8.1 Philanthropic projects

FUNDACIÓN LE CADÓ

Fundación Le Cadó was created in 2010 under the leadership of its president Elvira Monferrer Daudi. This initiative seeks to unite efforts and resources in supporting this kind of tumor research, which is currently the fourth leading cause of death in women.

Fundación Le Cadó collaborates with INCLIVA in funding the research project "Study of breast cancer in young women under 35 years", conducted by Dr. M^a Teresa Martínez Martínez. It also involves other researchers such as Dr. Isabel Chirivella (a genetic diagnosis specialist physician) and the entire team led by the oncologists Dr. Ana Lluch and Dr. Pilar Eroles.

ASOCIACIÓN NACIONAL DE ALPHA 1

The Alfa-1 Spain Association defends the interests of patients affected by the Deficit, their families and their caregivers, and promotes the research and training of health personnel who treat these patients. The defense of early diagnosis, access to available medical treatments and the daily support of patients and newly diagnosed, are its foundational tasks. This year Alfa-1 Spain Association and INCLIVA had signed a CV. The Research Group on Rare Respiratory Diseases (RRD) has been awarded the 1st Amadeu Monteiro Research Scholarship.

FUNDACIÓN NEOBLASTOMA

The Neuroblastoma Foundation, created in 2017, funds research on neuroblastoma, a particularly aggressive type of childhood cancer that affects the nervous system. Survival figures have not improved in recent years. The Neuroblastoma foundation informs families about existing treatments, and brings together families of sick children, motivating them to raise funds for research through numerous campaigns. The funds are destined to research projects and clinical trials in Spanish laboratories and hospitals, this year this year the donation received has been €14.000.

AMUNT CONTRA EL CÁNCER

Amunt Contra el Cáncer is an association based in Denia, province of Alicante, that carries out different services and actions aimed at improving the quality of life of cancer patients and their families. Organizes informative talks, offers psychological support to patients and promotes various activities to raise funds for research. This year this year the donation received has been €12.250.

FUNDACION SANDRA IBARRA

The Sandra Ibarra Foundation is a non-profit organization with a history of twelve years joining efforts against cancer. During these years, the Foundation has invested its time in promoting campaigns and financing research, awareness and prevention projects against cancer, as well as the development of the humanization of health. This year the donation received has been €10.500.

CORAZÓN SOLIDARIO

Corazón Solidario is an Association born out of the joint project of five colleagues, who having collaborated in various NGOs decided to pool their work to fundraise for the fight against cancer. All profits of this association go to INCLIVA.

8 social initiatives

8.2 Private philanthropic donations and acknowledgments

On behalf of INCLIVA, we want to thank all the people who have helped our research through their donations, for their support and solidarity. For us, this collaboration means much more than an economic contribution: it is the encouragement we need to keep investigating and working in research.
