

HOW TO IMPROVE YOUR SCIENTIFIC PRESENTATIONS (ONLINE)

Registration:

<https://form.typeform.com/to/eue4TkqE>

Training by: www.performing-ideas.com

Learner objective:

- Understand the differences between writing scientific papers and making scientific presentations
- Know the ideal structure for a scientific presentation and how to choose what content to put in (and leave out!)
- Discover different structures for presenting complex data and results
- Practice how to open and close a speech, and how to deal with questions and interruptions from the audience.
- Learn how to connect with your body so that you can speak confidently and clearly.
- Learn an efficient and effective process for preparing presentations that will save you time and effort.
